public management have raised new problems which cannot be solved by referring to the traditional bureaucratic ethics Devolution and decentralisation processes have enhanced the responsibility of public servants The increase of transparency and openness and the service orientation of public organisations have challenged the traditional values of discretion and equality before the rule The growing interaction between the public and the private sector have raised the question of integrity In light of these developments it is important to update the ethical system or reversibly the traditional values of the public service can question some actual evolutions in government

*Public Management and the Metagovernance of Hierarchies, Networks and Markets* Louis Meuleman, 2008-04-03 Public managers can to a certain extent choose between various management paradigms which are provided by public and business administration scholars and by politicians as well How do they find their way in this confusing supermarket of competing ideas This book explores how public managers in Western bureaucracies deal with the mutually undermining ideas of hierarchical network and market governance Do they possess a specific logic of action a rationale when they combine and switch between these governance styles This chapter sets the scene for the book as a whole and presents the search topic and the research question

1.1 Problem setting Since the Second World War Western public administration systems have changed drastically The hierarchical style of governing of the 1950s to the 1970s was partly replaced by market mechanisms from the 1980s onwards In the 1990s a third style of governing based on networks further enriched the range of possible steering coordination and organisation interventions In the new millennium public sector organisations seem to apply complex and varying mixtures of all three styles of what we will find as governance in a broad sense This development has brought about two problems

**Citizen, Customer, Partner** John Clayton Thomas, 2014-12-18 For almost a half a century scholars and practitioners have debated what the connections should be between public administration and the public Does the public serve principally as citizen owners those to whom administrators are responsible Are members of the public more appropriately viewed as the customers of government Or in an increasingly networked world do they serve more as the partners of public administrators in the production of public services This book starts from the premise that the public comes to government not principally in one role but in all three roles as citizens and customers and partners The purpose of the book is to address the dual challenge that reality implies 1 to help public administrators and other public officials to understand the complex nature of the public they face and 2 to provide recommendations for how public administrators can most effectively interact with the public in the different roles Using this comprehensive perspective Citizen Customer Partner helps students practitioners and scholars understand when and how the public should be integrated into the practice of public administration Most chapters in Citizen Customer Partner include multiple boxed cases that illustrate the chapter's content with real world examples The book concludes with an extremely useful Appendix that collects and summarizes the 40 Design Principles specific advice for public organizations on working with the public as customers partners and citizens
