Razavi, 2012-03-06 Contributors analyze the care economy in the developing world at a moment when existing systems are under strain and new ideas are coming into focus Offers the first global regionally diverse study of the invisible economy of care including case studies from diverse regional contexts of Africa Asia and Latin America Frames the debate on care and highlights policy experimentation and ideas currently in flux Includes new research and data on developing countries showing how where care options for the socially disadvantaged are limited failing to socialize the costs of care exacerbates existing inequalities Comes at a moment when if not yet marked by a generalized care crisis the world's existing systems are under strain and in need of rethinking Features introductory chapters that set out the conceptual framework and findings on individual country studies and a concluding chapter that draws out the transnational dimensions of care *Private Wealth and Public Life* Judith Sealander, 1997-04-21 An analysis of the role played by private philanthropic foundations in shaping public policy during the early years of this century focusing on foundation sponsored attempts to influence policy in the areas of education social welfare and public health Winner of the Outstanding Book Award from the Ohio Academy of History In *Private Wealth and Public Life* historian Judith Sealander analyzes the role played by private philanthropic foundations in shaping public policy during the early years of this century Focusing on foundation sponsored attempts to influence policy in the areas of education social welfare and public health she addresses significant misunderstandings about the place of philanthropic foundations in American life Between 1903 and 1932 fewer than a dozen philanthropic organizations controlled most of the hundreds of millions of dollars given to various causes Among these Sealander finds seven foundations attempted to influence public social policy in significant ways four were Rockefeller philanthropies joined later by the Russell Sage Rosenwald and Commonwealth Fund foundations Challenging the extreme views of foundations either as benevolent forces for social change or powerful threats to democracy Sealander offers a more subtle understanding of foundations as important players in a complex political environment The huge financial resources of some foundations bought access she argues but

never complete control Occasionally a foundation s agenda became public policy often it did not Whatever the results the foundations and their efforts spurred the emergence of an American state with a significantly expanded social policy making role Drawing on a wealth of archival materials much of it unavailable or overlooked until now Sealander examines issues that remain central to American political life Her topics include vocational education policy parent education juvenile delinquency mothers pensions and public aid to impoverished children anti prostitution efforts sex research and publicly funded recreation Foundation philanthropy s legacy for domestic social policy she writes raises a point that should be emphasized repeatedly by students of the policy process Rarely is just one entity a policy s sole author almost always policies in place produced unintended consequences *State and Local Pension Systems* Richard J.
