## **Public Power The Fight For Publicly Owned Electricity:**

Public Power Howard Hampton, 2009-09-24 Deregulating electricity prices and privatizing publicly owned power system assets has been an economic disaster in North America and elsewhere. Instead of the promised abundance of lower priced power, states and provinces that have embraced deregulation and privatization are now experiencing astonishing price spikes and unexpected shortages. Taking us from the very beginnings of the electricity industry in the 1880s right up to the present day, Howard Hampton vividly recounts the dramatic political struggles between public and private power in both Canada and the United States, a moving story that links Ontario's Sir Adam Beck, founder of North America's largest public power system, with Franklin D. Roosevelt, who established the still public New York Power Authority and Tennessee Valley Authority, and Cleveland Mayor Dennis Kucinich, who sacrificed his political career rather than sell his city's municipally owned electric utility.

*An Environmental History of Canada* Laurel Sefton MacDowell, 2012-07-31 Throughout history, most people have associated northern North America with wilderness, with abundant fish and game, snow-capped mountains, and endless forest and prairie. Canada's contemporary picture gallery, however, contains more disturbing images: deforested mountains, empty fisheries, and melting ice caps. Adopting both a chronological and thematic approach, Laurel MacDowell examines human interactions with the land and the origins of our current environmental crisis, from first peoples to the Kyoto Protocol. This richly illustrated exploration of the past from an environmental perspective will change the way Canadians and others around the world think about and look at Canada.

*Social Economy in China and the World* Ngai Pun, Ben Hok-bun Ku, Hairong Yan, Anita Koo, 2015-08-20 Thirty years of economic transformation has turned China into one of the major players in the global capitalist economy. However, its economic growth has generated rising problems in inequality, alienation, and sustainability, with the agrarian crises of the 1990s giving rise to real social outcry to the extent that they became the object of central government policy reformulations. Contributing to a paradigm shift in the theory and practices of economic development, this book examines the concept of social economy in China and around the world. It offers to rethink space, economy, and community in a trans-border context which moves us beyond both planned and market economies. The chapters address theoretical issues, critical reflections, and case studies on the practice of social economy in the context of globalization and its attempt to create an alternative modernity. Through this, the book builds a platform for further cross-disciplinary and cross-boundary dialogue on the future of social economy in China and the world. With examples from Asia, North America, Latin America, and Europe, this book will not only appeal to students and scholars of Chinese and Asian social policy and development but also those of social economy from an international perspective.
