**Undoing Ethics** Natasha Whiteman, 2012-01-07 Over the past decade researchers from different academic disciplines have paid increasing attention to the productivity of online environments The ethical underpinnings of research in such settings however remain contested and often controversial As traditional debates have been reignited by the need to respond to the particular characteristics of technologically mediated environments researchers have entered anew key debates regarding the moral legal and regulative aspects of research ethics A growing trend in this work has been towards the promotion of localized and contextualized research ethics the suggestion that the decisions we make should be informed by the nature of the environments we study and the habits expectations of participants within them Despite such moves the relationship between the empirical theoretical and methodological aspects of Internet research ethics remains underexplored Drawing from ongoing sociological research into the practices of media cultures online this book provides a timely and distinctive response to this need This book explores the relationship between the production of ethical stances in two different contexts the ethical manoeuvring of participants within online media fan communities and the ethical decision making of the author as Internet researcher manoeuvring as it were in the academic community In doing so the book outlines a reflexive framework for exploring research ethics at different levels of analysis the empirical settings of research the theoretical perspectives which inform the researcher's objectification of the research settings and the methodological issues and practical decisions that constitute the activity as research The analysis of these different levels develops a way of thinking about ethical practice in terms of stabilizing and destabilizing moves within and between research and researched communities The analysis emphasizes the continuities and discontinuities between both research practice and online media fan activity and social activity in on and offline environments

**Cinema, Censorship and Sexuality 1909-1925 (Routledge Revivals)** Annette Kuhn, 2016-04-06 First published in 1988 This book shows how censorship as a set of institutions practices and discourses was involved in the struggle over the nature of cinema in the early twentieth century It also reveals the part played in this struggle by other institutions practices and discourses for example new knowledge about sexuality and organisations devoted to the promotion of public morality Instead of censorship simply being an act of prohibition by a special institution this work reveals the issues at work were far more complex and contradictory opening up critical scrutiny and challenging assumptions This title will be

of interest to students of media and film studies      **Stages of Capital** Ritu Birla,2009-01-14 An argument that contemporary India's market society and its concepts of the market and the public emerged from commercial laws implemented by the British between 1870 and 1930      **The Public in Law** Gregor Clunie,Haris Psarras,2016-02-24 Bringing together established academics and new researchers the chapters in this collection interrogate the operation of the public in a range of different legal illegal and alegal spaces The key question which frames the contributions is whether and in what manner the public operates as an interface between law and society allowing the interests and opinions of the population at large to be represented and reflected in legal discourse such that collectively generated imperatives may be imposed upon political and economic actors Multi disciplinary in its approach the volume reflects an understanding that there is more to the role of the public in relation to law than the conventional demarcation of the field of public law and that this relationship is open to comment from a wide range of actors      *Negotiating Friendships* Shuo Wang,2020-08-10 Social network are nowadays inherent parts of our lives and highly developed communication technique helps us maintain our relationships But how did it work in the early 19th century in a time without cell phones and internet A Chinese Hong Merchant in Canton Trade named Houqua 1769 1843 who lived in isolated Qing China gives us an outstanding answer Despite various barriers in cultures languages political situations and his identity as a Chinese merchant strictly under control of the Qing government Houqua established a commercial network across three continents Asia North America and Europe This book will not only uncover his secrets and actions in his Chinese social network especially patronage relationships in traditional Chinese society but also reconstruct his intercultural network including his unique and even modern friendship with some American traders which lasted almost half a century after Houqua's death      **The Problem of Trust** Adam B. Seligman,2021-06-08 The problem of trust in social relationships was central to the emergence of the modern form of civil society and much discussed by social and political philosophers of the early modern period Over the past few years in response to the profound changes associated with postmodernity trust has returned to the attention of political scientists sociologists economists and public policy analysts In this sequel to his widely admired book *The Idea of Civil Society* Adam Seligman analyzes trust as a fundamental issue of our present social relationships Setting his discussion in historical and intellectual context Seligman asks whether trust which many contemporary critics from Robert Putnam through Francis Fukuyama identify as essential in creating a cohesive society can continue to serve this vital role Seligman traverses a wide range of examples from the minutiae of everyday manners to central problems of political and economic life showing throughout how civility and trust are being displaced in contemporary life by new external system constraints inimical to the development of trust Disturbingly Seligman shows that trust is losing its unifying power precisely because the individual long assumed to be the ultimate repository of rights and values is being reduced to a sum of group identities and an abstract matrix of rules The irony for Seligman is that in becoming postmodern we seem to be moving backward to a

premodern condition in which group sanctions rather than trust are the basis of group life      **International Satellite Issues** United States. Congress. House. Committee on Energy and Commerce. Subcommittee on Telecommunications, Consumer Protection, and Finance,1985      The Routledge Handbook of Law and Society Mariana Valverde,Kamari M. Clarke,Eve Darian Smith,Prabha Kotiswaran,2021-03-03 This innovative handbook provides a comprehensive and truly global overview of the main approaches and themes within law and society scholarship or social legal studies A one volume introduction to academic resources and ideas that are relevant for today s debates on issues from reproductive justice to climate justice food security water conflicts artificial intelligence and global financial transactions this handbook is divided into two sections The first Perspectives and Approaches accessibly explains a variety of frameworks through which the relationship between law and society is addressed and understood with emphasis on contemporary perspectives that are relatively new to many socio legal scholars Following the book s overall interest in social justice the entries in this section of the book show how conceptual tools originate in and help to illuminate real world issues The second and largest section of the book 42 short well written pieces presents reflections on topics or areas concerning law justice and society that are inherently interdisciplinary and that are relevance to current but also classical struggles around justice Informing readers about the lineage of ideas that are used or could be used today for research and activism the book attends to the full range of local national and transnational issues in law and society The authors were carefully chosen to achieve a diverse and non Eurocentric view of socio legal studies This volume will be invaluable for law students those in inter disciplinary programs such as law and society justice studies and legal studies and those with interests in law but based in other social sciences It will also appeal to general readers interested in questions of justice and rights including activists and advocates around the world      **International Communication and Information Policy** United States. Congress. Senate. Committee on Foreign Relations. Subcommittee on Arms Control, Oceans, International Operations, and Environment,1983      The Politics of Secularism in International Relations Elizabeth Shakman Hurd,2009-01-10 Conflicts involving religion have returned to the forefront of international relations And yet political scientists and policymakers have continued to assume that religion has long been privatized in the West This secularist assumption ignores the contestation surrounding the category of the secular in international politics The Politics of Secularism in International Relations shows why this thinking is flawed and provides a powerful alternative Elizabeth Shakman Hurd argues that secularist divisions between religion and politics are not fixed as commonly assumed but socially and historically constructed Examining the philosophical and historical legacy of the secularist traditions that shape European and American approaches to global politics she shows why this matters for contemporary international relations and in particular for two critical relationships the United States and Iran and the European Union and Turkey The Politics of Secularism in International Relations develops a new approach to religion and international relations that challenges realist liberal and constructivist assumptions that religion has been excluded from

politics in the West The first book to consider secularism as a form of political authority in its own right it describes two forms of secularism and their far reaching global consequences      **Negotiating Death in Contemporary Health and Social Care** Margaret Holloway,2007-10-17 This book brings together perspectives from social science health care and pastoral theology looking at the way death is handled in contemporary society and the sensitive ethical and practical dilemmas facing nurses social workers doctors and chaplains      Methods and Concepts of Land Management: Diversity, Changes and New Approaches Erwin Hepperle,Jenny Paulsson,Vida Maliene,Reinfried Mansberger,Armands Auzins,Jolanta Valciukiene,2020-10-08 The peer reviewed papers in this new volume of the European Academy of Land Use and Development EALD inform about investigations on the common subject land management due to the interdisciplinary nature of the EALD from very different views The spectrum of contributions covers regulations governance and the implementation of land management as well as the assessment of relevant data supporting these tasks Various approaches methods systems and understanding of the government s role in the different countries of Europe are highlighted Committed to sustainability the articles give evidence that Europe provides an experimental field for land management issues and they enable to increase knowledge of new practices to verify them and to learn from each other      *Negotiating Tradition* Stefan Groth,2012 Communicative interactions in international negotiations on cultural property not only provide information about the emergence and proliferation of arguments rhetorics and registers but also permit valuable insights into actors positions strategies and alliances They significantly influence local and national practices and views related to cultural property debates What can be gained from a deep analysis of the communicative patterns and strategies that actors engage in the entailing text and talk of negotiations is a better understanding of the process itself how do different actors argue what kind of strategies and rhetorics do they use to which instruments and institutions do they refer and in what way do actors react to each other An analysis of communicative interactions contributes to the question of how international negotiations work The analytic inclusion of sociolinguistic practices allows insights into positions strategies and perspectives pertaining to cultural property By looking at not only what actors say but also at how and in what contexts they do so it is possible to make more accurate statements about their positions and perceptions in cultural property debates As these communicative interactions influence outcomes considerably an approach from linguistic anthropology is not only beneficial for an understanding of specific negotiations but also for the analysis of broader cultural property issues Provided by publisher      Negotiated Rulemaking Act of 1987 United States.
