Recharging China in War and Revolution, 1882-1955 Ying Jia Tan,2021-05-15 In Recharging China in War and Revolution 1882 1955 Ying Jia Tan explores the fascinating politics of Chinese power consumption as electrical industries developed during seven decades of revolution and warfare Tan traces this history from the textile factory power shortages of the late Qing through the struggle over China s electrical industries during its civil war to the 1937 Japanese invasion that robbed China of 97 percent of its generative capacity Along the way he demonstrates that power industries became an integral part of the nation s military industrial complex showing how competing regimes asserted economic sovereignty through the nationalization of electricity Based on a wide range of published records engineering reports and archival collections in China Taiwan Japan and the United States Recharging China in War and Revolution 1882 1955 argues that even in times of peace the Chinese economy operated as though still at war constructing power systems that met immediate demands but sacrificed efficiency and longevity Thanks to generous funding from the Andrew W Mellon Foundation through The Sustainable History Monograph Pilot the ebook editions of this book are available as Open Access volumes from Cornell Open cornellpress.cornell.edu/cornell-open and other repositories

The Cambridge Handbook of Public-Private Partnerships, Intellectual Property Governance, and Sustainable Development Margaret Chon,Pedro Roffe,Ahmed Abdel-Latif,2018-09-20 Public private partnerships PPPs play an increasingly prominent role in addressing global development challenges United Nations agencies and other organizations are relying on PPPs to improve global health facilitate access to scientific information and encourage the diffusion of climate change technologies For this reason the 2030 Agenda for Sustainable Development highlights their centrality in the

implementation of the Sustainable Development Goals (SDGs). At the same time, the intellectual property dimensions and implications of these efforts remain under-examined. Through selective case studies, this illuminating work contributes to a better understanding of the relationships between PPPs and intellectual property considered within a global knowledge governance framework that includes innovation, capacity building, technological learning, and diffusion. Linking global governance of knowledge via intellectual property to the SDGs, this is the first book to chart the activities of PPPs at this important nexus.
