one last glimpse of outmoded Italian operatic traditions In order to evaluate *Il Trittico*'s importance in the history of Italian opera this study will first review the musically changing landscape in Italy during the early to mid nineteenth century then the second part of the nineteenth and beginning of the twentieth century when German French and eventually Russian music were starting to influence audience taste Puccini who over the course of his compositional life absorbed and incorporated these different styles realized that long held Italian operatic tradition had reached a fork in the road One path would ensure Italian composers a place in this new order and the other a stagnant dead end Even though Puccini's triptych garnered primarily negative reviews the basis for this negativity was the perception that *Il Trittico* had broken with the historically traditional Italian musical styles Though the present study acknowledges that break to a degree it will also present a historically based rationale for the deviation one left largely unnoticed by Puccini's critics In the end this author plans to realize their symbolic importance as a farewell to three uniquely Italian styles and a departure point for a new operatic tradition Looking forward to the centenary of the work this author seeks to illuminate how Puccini reached the pinnacle of firmly rooted genres of Italian opera Ultimately this might help to unravel the enigma of *Il Trittico* while it continues to secure its rightful place as one of the masterpieces of the Puccini canon
