Chaco Canyon Robert H. Lister, Florence C. Lister, 1981 The first complete account of Chacoan archaeology from the discovery of the ruins by Spanish soldiers in the seventeenth century through the scientific analyses of the 1970s **The Architecture of Chaco Canyon, New Mexico** Stephen H. Lekson, 2007-06-13 A fresh volume on the ancient structures of Chaco Canyon built by native peoples between AD 850 and 1130 that unifies older information on the area with new advanced research techniques focusing on studies of technology and building types analyses of architectural change and readings of the built environment aided by over 150 maps floor plans elevations and photos *Mysteries and Discoveries of Archaeoastronomy* Giulio Magli, 2009-04-09 The book is divided into two parts In the first the reader is taken on an ideal world tour of many wonderful and enigmatic places in almost every continent in search of traces of astronomical knowledge and lore of the sky In the second part Giulio Magli uses the elements presented in the tour to show that the fundamental idea which led to the construction of the astronomically related giant monuments was the foundation of power a foundation which was exploited by replicating the sky A possible interpretive model then emerges that is founded on the relationship the ancients had with nature in the sense of everything that surrounded them the cosmos The numerous monumental astronomically aligned structures of the past then become interpretable as acts of will expressions of power on the part of those who held it the will to replicate the heavenly plane here on earth and to build sacred landscapes Finally having formulated his hypothesis Professor Magli returns to visit one specific place in detail searching for proof This in depth examination studies the most compelling the most intensively studied the most famous and until recently the most misunderstood sacred landscape on the planet Giza in Egypt The archaeoastronomical analysis of the orientation of the Giza pyramids leads to the hypothesis that the pyramids of Cheops and Chephren belong to the same construction project

Chaco's Northern Prodigies Paul F Reed, 2008-08-05 A timely synopsis of the archaeology of the Middle San Juan region bringing recent work at Salmon Ruins into the context of thirty five years of research there *New Mexico - A Guide To The Colorful State* Joseph Miller, 2011-12-01 Many of the earliest books particularly those dating back to the 1900s and before are now extremely scarce and increasingly expensive We are republishing these classic works in affordable high quality modern editions using the original text and artwork Publications in Archeology , 1984 *Practicing Materiality* Ruth M. Van Dyke, 2015-11-12 It is little wonder that relationships between things and humans are front and center in the contemporary social sciences given the presence of technologies in every conceivable aspect of our lives From Bruno Latour to Ian Hodder anthropologists and archaeologists are embracing thing theory and the ontological turn In Practicing Materiality Ruth M Van Dyke cautions that as anthropologists turn toward animals and things they run the risk of turning away from people and intentional actions Practicing Materiality focuses on the practical job of applying materiality to anthropological investigations but with the firm retention of anthropocentrism The philosophical discussions that run through the nine chapters develop practical applications for material studies including Heideggerian phenomenology Gellian secondary agency object life histories and bundling Seven case studies are flanked by an introduction and a discussion chapter The case studies represent a wide range of archaeological and anthropological contexts from contemporary New York City and Turkey to fifteenth century Portugal the ancient southwest United States and the ancient Andes Authors in every chapter argue for the rejection of subject object dualism regarding material things as actively involved in the negotiation of power within human social relationships Practicing Materiality demonstrates that it is possible to focus on the entangled lives of things without losing

sight of their political and social implications

Anasazi America David E. Stuart, Susan B.

Moczygemba-McKinsey, 2000-05 At the height of their power in the late eleventh century the Chaco Anasazi dominated a territory in the American Southwest larger than any European principality of the time A vast and powerful alliance of thousands of farming hamlets and nearly 100 spectacular towns integrated the region through economic and religious ties and the whole system was interconnected with hundreds of miles of roads It took these Anasazi farmers more than seven centuries to lay the agricultural organizational and technological groundwork for the creation of classic Chacoan civilization which lasted about 200 years only to collapse spectacularly in a mere 40 Why did such a great society collapse Who survived Why In this lively book anthropologist archaeologist David Stuart presents answers to these questions that offer useful lessons to modern societies His account of the rise and fall of the Chaco Anasazi brings to life the people known to us today as the architects of Chaco Canyon the spectacular national park in New Mexico that thousands of tourists visit every year
