Social Structures of Accumulation David M. Kotz,Terrence McDonough,Michael Reich,1994-08-26 The social structure of accumulation SSA approach seeks to explain the long term fortunes of capitalist economies in terms of the effect of political and economic institutions on growth rates This book offers an ideal introduction to this powerful tool for understanding capitalist growth analysing the social and economic differences between countries and the reasons for the successes and failures of institutional reform The contributors cover a wide range of topics including the theoretical basis of the SSA approach the postwar financial system Marxian and Keynesian theories of economic crisis labour management relations race and gender issues and the history of institutional innovation Combining newly written essays with classic articles of the SSA school the book examines the international economy and the economies of Japan South Africa and Puerto Rico as well as the United States

Technological Transformation in the Third World: Volume 3 Surendra J. Patel,2018-03-26 Originally published in 1993 this book contains 3 studies from Latin America Mexico Puerto Rico and Venezuela These studies bring out sharply the processes at work in Latin America between 1950 and 1980 which were responsible for the crisis that the continent faced in the 1980s In each case there was a striking failure in building up national technological capability so that the country could grapple with the problems it faced

Integrated renewable resource management for U.S. insular areas. ,1986 International Travel United States. Congress. Senate. Committee on Interstate and Foreign Commerce,1961 Perfect Communities Edward Berenson,2025-04-22 The rise and fall of William J Levitt the man who made the suburban house a mass commodity Two material artifacts defined the middle class American lifestyle in the mid twentieth century the automobile which brought gas stations highways commercial strips and sprawl and the single family suburban home the repository of many families long term wealth While the man who did the most to make the automobile a mass commodity Henry Ford is well known few know the story of the man who did the same for the suburban house Edward Berenson describes the remarkable career of William Levitt who did more than anyone else to create the modern suburb In response to an unprecedented housing shortage as veterans returned home from World War II his Levittown developments provided inexpensive mass produced housing that was wildly popular prospective buyers would camp out in line for two days for the chance to put down a deposit on a Levitt house He was a celebrity a life changing hero to tens of thousands and the pitchman of a renewed American Dream But

Levitt also shared Ford's dark side. He refused to allow Black people to buy or rent in his developments and doggedly defended this practice against legal challenges. Leading the way for other developers who emulated his actions, he helped ensure that suburbs nationwide remained white enclaves. These legacies are still with us. Levitt made a major contribution to the stubborn wealth disparity between white families and Black families and his solution to the housing crisis of the 1940s—the detached house and surrounding yard—is a primary cause of the housing crisis today. As a person, Levitt was a strangely guileless and tragic figure. He accumulated vast wealth but after losing control of his building company, surrendered it all through foolish investments and a lavish lifestyle that included a Long Island mansion and a two hundred foot yacht. Just weeks before his death as a charity patient in a hospital to which he had once given millions, he was still imagining his great comeback.

U.S. Emergency Management in the 21st Century Claire B. Rubin, Susan L. Cutter, 2019-12-06

U.S. Emergency Management in the 21st Century From Disaster to Catastrophe explores a critical issue in American public policy: Are the current public sector emergency management systems sufficient to handle future disasters given the environmental and social changes underway? In this timely book, Claire B. Rubin and Susan L. Cutter focus on disaster recovery efforts, community resilience, and public policy issues related to recent disasters and what they portend for the future. Beginning with the external societal forces influencing shifts in policy and practice, the next six chapters provide in-depth accounts of recent disasters: the Joplin, Tuscaloosa, Birmingham, and Moore tornadoes; Hurricanes Sandy, Harvey, Irma, Maria; and the California wildfires. The book concludes with a chapter on loss accounting and a summary chapter on what has gone right, what has gone wrong, and why the federal government may no longer be a reliable partner in emergency management. Accessible and clearly written by authorities in a wide range of related fields, with local experiences, this book offers a rich array of case studies and describes their significance in shifting emergency management policy and practice in the United States during the past decade. Through a careful blending of contextual analysis and practical information, this book is essential reading for students, an interested public, and professionals alike.
