Abstract

Aim: The increase in the number of people with chronic obstructive pulmonary disease (COPD) and the disease burden, has prompted concerted efforts to improve healthcare, particularly outpatient services. In line with these attempts the Partnership-Based Nursing Practice Theoretical Framework for People with COPD was developed to guide outpatient nursing care. The principal approach of the framework is a 'Dialogue' with the patients, which has four components: 'Establishing family involvement', 'Assisting living with symptoms' and 'Facilitating access to healthcare', with the primary goal being 'Enhancement of the health experience'. With new knowledge, research on the framework, and extensive experience in using it, a need arose to modify the framework to maximize its clinical utility.

Design: Discursive paper.

Methods: A narrative review and critical reflection was conducted to revise the nursing practice framework via selected literature search from 2012 to 2022, research on the framework, and the authors' reflections on the clinical experience of using the framework.

Results: The nursing practice framework highlights capacities and possibilities that lie in the nurse–patient relationship. The overarching dialogue in the revised framework includes both patients and families. The action-related component 'Assisting living with the disease' was added to the framework to underscore the significance of attempting to understand what may lie ahead for patients and families. The other action-related components are as follows: 'Assisting living with symptoms' and 'Facilitating access to healthcare'. The primary goal remains unchanged: enhancing the 'Health experience'.

Conclusion: Using the revised nursing practice framework in outpatient care may help to enhance the lives of people with COPD and their families, particularly at advanced stages of the disease. It may have transferability to other groups of people living with progressive diseases dealing with complicated health problems, and to reduce the usage of costly healthcare resources such as hospital care.

Handbook of Research on Instructional Technologies in Health Education and Allied Disciplines Garcia, Manuel B.,Lopez Cabrera, Mildred Vanessa,de Almeida, Rui Pedro
Pereira,2023-03-13 Instructional technologies used to be optional and supplemental pedagogical tools until the global health crisis of 2020 compelled education systems to rely on digital devices and services to guarantee academic continuity. Suddenly, the contemporary principles and practices utilized in delivering health education curricula were insufficient and ineffective. Acknowledging the vital role of technology in shaping the future of education, there is now a greater demand to foster innovative interventions and continuous improvement in strategies, methodologies, and systems to empower learners, educators, and leaders in the digital age. This paradigm shift requires a fundamental transformation in the way we approach teaching and learning and a willingness to embrace new approaches and tools that can enhance the quality of education and support student success. The Handbook of Research on Instructional Technologies in Health Education and Allied Disciplines provides comprehensive coverage of innovative methods and strategies to produce the next generation of health professionals. The book lays the groundwork for implementable teaching and learning models that facilitate knowledge acquisition, enhance perceptual variation, improve skill coordination, and develop a scientific and technological mindset. Each chapter provides an in-depth examination of instructional technologies contextualized in various medical and health domains, including nursing, physiotherapy, radiology, neurophysiology, physical health, dentistry, clinical medicine, and more. This reference work is a must-read for all stakeholders in health education and related fields, including educators, students, researchers, administrators, and healthcare professionals.

A Clinical Approach To Medicine Han Seong Ng,Yong Yau Ong,Patrick H C Tan,Keng Thye Woo,2001-01-30
Ong Yong Yau and his team of editors have successfully assembled a panel of leading clinicians and researchers to provide an integrative review of the key areas of medicine: cardiology, endocrinology, gastroenterology, haematology, neurology, oncology, rheumatology, renal and respiratory medicine. This book is unique in that it reflects the knowledge and experience of leading experts on patterns of disease in the Asia Pacific region. Currently, there are several other similar books, but these are by authors from the west and therefore reflect the western perspectives. In addition, the book also includes discussions on genetic diseases, infectious diseases, and the pattern of antimicrobial resistance to antibiotics, highlighting local incidence and statistics. Each chapter starts with the basic concepts of a particular topic and

gradually develops the theme to present the state of the art on the topic With its focus on practices and expertise unique to the Asia Pacific this book is a must read for the student practicing clinician and research scientist interested in the latest developments in the important fields
