Rindi,2012-12-06 This volume contains the lectures presented at the International School of Radiation Damage and Protection at the Ettore Majorana Centre for Scientific Culture in Erice Italy September 6-15 1985 The sixth course of the School entitled Advances in Applications Biological Effects and Dosimetry of Ultrasound provided an in depth review of all facets of ultrasound interactions and their biological effects on living systems allowing an assessment of the hazard potential of the various applications of ultrasound Particular reference was made to possible health risks associated with medical ultrasound exposure since this use is by far the most prevalent Since the initial application of ultrasound to submarine detection medical diagnostic and therapeutic applications have become predominant over the past 20 years The question of safety of this physical agent is an extremely important one In many industrialized countries most pregnant women receive at least one diagnostic ultrasound examination before the birth of the child Thus potential hazards to the fetus are of prime concern This problem has been aggravated by the fact that the medical diagnostic applications of ultrasound have far outpaced research efforts on biological effects A further compounding factor of concern to clinicians and scientists has been the use of higher and higher intensities by the manufacturers of ultrasound equipment particularly higher peak pulse intensities

Defining the Medical Imaging Requirements for a Rural Health Center Cari Borrás,2016-11-05 This book presents the patient management challenges that rural health centers face and establishes the criteria for the type of medical imaging services that should be available in such facilities To make the work of the center's health practitioners more effective and efficient the book assesses what health conditions may require medical attention in those centers Information is provided on how to use basic imaging modalities such as radiography and ultrasound emphasizing the need for thoughtful service planning careful equipment and imaging protocol selection continuous staff training and the implementation of quality control programs The book is also a valuable resource for those physicians medical physicists and service engineers who provide virtual and physical consultations to meet these needs Rural health centers are established to prevent patients from being forced to travel to distant urban medical facilities To manage patients properly rural health centers should be part of regional and more complete systems of medical health care installations in the country on the basis of a referral and counter referral program Thus the centers should have the infrastructure needed to transport patients to urban hospitals when they need more complex health care The coordination of all the activities is possible only if rural health centers are led by strong and dedicated managers

Pathobiology of the Human Atherosclerotic Plaque Seymour Glagov,William P., III Newman,Sheldon A. Schaffer,2012-12-06 Seymour Glagov The last meeting devoted exclusively to an examination of the atherosclerotic plaque took place in Chicago 25 years ago under the joint auspices of the Council on Arteriosclerosis of the American Heart Association and the Chicago Heart Association The proceedings were published subsequently in a volume entitled Evolution of the Atherosclerotic Plaque edited by Richard J Jones 1 Both experimental and human lesions were considered and several provocative new approaches to the disorder were discussed The electron

microscope was being applied systematically to the study of blood vessels at that time so that details of the infrastructure and cellular composition of the artery wall and of atherosclerotic lesions were presented in some detail There was as one result of these explorations considerable discussion of morphologic evidence suggesting that the principal cell involved in the atherogenic process was neither the fibroblast nor the macrophage as had been supposed but the smooth muscle cell In particular the findings indicated that this cell could incorporate lipid and become a foam cell
