

Always start with the basics

Upper airway obstruction

Croup

- Epinephrine (nebulized)
- Corticosteroids

Anaphylaxis

- Epinephrine (IM)
- Albuterol
- Antihistamines
- Corticosteroids

Foreign body obstruction

- Clear the airway
- Position of comfort (if moving air)
- Speciality consult

Lower airway obstruction

Asthma

- Albuterol + Ipratropium
- Corticosteroids
- Subcutaneous epinephrine
- Magnesium sulfate
- Terbutaline

Bronchiolitis

- Nasal suctioning
- Bronchodilator

Disordered work of breathing

Intracranial pressure increase

- Avoid hypoxemia
- Avoid hypercarbia
- Avoid hyperthermia

Neuromuscular

- Ventilation support if applicable

Overdose/Poisoning

- Individual antidote if known or available
- Contact poison control for specific treatment

Lung tissue disease

Pulmonary edema

- Consider ventilation support
- Consider PEEP
- Vasoactive support
- Diuretic

Pneumonia

- Albuterol
- Antibiotics (as indicated)
- CPAP if needed

Pulse Pediatric Respiratory Emergencies

A Parthasarathy

Pulse Pediatric Respiratory Emergencies:

Pediatric Respiratory Emergencies ANONIMO, Delmar Thomson Learning, 1998-04-01 Whether it is asthma or croup the pediatric patient in respiratory distress is an emergency you want to be prepared for This program will take a look at the anatomy of the pediatric airway as well as some of the more common pediatric respiratory emergencies Duration 29 59

Florida Regional Common EMS Protocols Jones & Bartlett Learning, 2010-10-22 Physicians EMS Chiefs Training Officers and Field Paramedics throughout Florida developed the Florida Regional Common EMS Protocols These protocols are based on National Standards and the most recent clinical studies regarding the delivery of prehospital care Medical experts in the specialized areas of the protocols were an integral part of the protocol development process In addition an in depth peer review was conducted to provide all participating agencies the opportunity to give input into the design and content of the protocols

Pediatric Education for Prehospital Professionals (PEPP), Fourth Edition American Academy of Pediatrics (AAP), 2020-02-24 Pediatric Education for Prehospital Professionals PEPP Fourth Edition is an evidence based resource of essential medical content for the assessment and management of infants and children in the field This respected and ground breaking program paired physicians and EMS providers together to ensure the content reflects current best practices and the realities of the field Developed by the American Academy of Pediatrics PEPP is designed to give prehospital professionals the knowledge skills and confidence they need to effectively assess and manage pediatric patients PEPP combines world class content with engaging features and an interactive course to truly prepare prehospital professionals to care for pediatric patients The Fourth Edition Includes A new chapter on Behavioral Emergencies A top flight EMS author team working with AAP physician reviewers to ensure exceptional medical content with a focus on how it is applied in the streets New procedures on tourniquet application and intranasal medication administration Features Include The Pediatric Assessment Triangle PAT represents the essence of the PEPP patient assessment method which includes assessing appearance work of breathing and circulation to the skin The Patient Assessment Flowchart provides students with an easy to understand reference of the pediatric patient assessment process Case Studies provide an opportunity for students to apply the foundational knowledge presented in the chapter and strengthen their critical thinking skills Procedures provide step by step explanations and visual summaries of vital BLS and ALS pediatric care skills Flexible Course Options PEPP Course Coordinators may offer a 2 day onsite course or a 1 day enhanced hybrid course at the BLS or ALS level The onsite course features interactive case based lectures where students apply their knowledge in a safe environment The hybrid course features case based online modules with engaging interactivities including rapid skills demonstration videos that students complete before attending the onsite portion for hands on skill station coaching and small group discussions The BLS level courses are geared toward emergency responders and EMTs while the ALS level courses are geared toward AEMTs and Paramedics

Florida Regional Common EMS Protocols Michael Hohl, Jones & Bartlett Publishers, 2004 The

protocols are divided into adult and pediatric section each with three parts Supportive Care Actions authorized For The EMS or paramedic that are supportive in nature ALS Level 1 Actions authorized only For The paramedic prior to physician contact ALS Level 2 Actions authorized only For The paramedic that require a physician consult This protocol manual is part of the medical direction program for participating Emergency Medical Services EMS agencies in Florida and as such The medical treatment protocols are designed as clinical guides for EMS providers the protocol manual in its entirety is designed to be a one stop source of information for on scene patient care medical reference and training purposes The medical treatment protocols outline care for a typical case and follow the case step by step the treatment protocols are divided into adult and pediatric sections each with three parts Supportive Care Actions authorized For The EMS or Paramedic that are supportive in nature EMT BLS and Paramedic BLS and ALS actions are specified within each of these protocols ALS Level 1 Actions authorized only For The Paramedic prior to physician contact ALS Level 2 Actions authorized only For The Paramedic that require a physician consult

The Respiratory Tract in Pediatric Critical Illness and Injury Derek S. Wheeler, Hector R. Wong, Thomas P. Shanley, 2008-12-18 The principal role of the respiratory system is to permit efficient exchange of respiratory gases O₂ and CO₂ with the environment The respiratory system is unique in that it is constantly exposed to a barrage of foreign substances from both the internal environment at any one point in time approximately one half of the cardiac output is received by the lungs and the external environment with each breath the respiratory tract is exposed to pollens viruses bacteria smoke etc According to the Centers for Disease Control and Prevention diseases of the respiratory system were the seventh and eighth leading causes of deaths in children aged 1 to 19 years in 2003 1 Dr George A Gregory one of the founding fathers of pediatric critical care medicine once estimated that acute respiratory failure accounts for nearly 50% of all admissions to the pediatric intensive care unit PICU 2 Just as important are the many diseases that affect the respiratory system that are not associated with acute respiratory failure but nevertheless constitute a major portion of the practice of pediatric critical care medicine some of which account for significant morbidity and mortality 3 Once again we would like to dedicate this textbook to our families and to the physicians and nurses who provide steadfast care every day in pediatric intensive care units across the globe Derek S Wheeler Hector R Wong Thomas P

Acharya Textbook Of Pediatrics (4Th Edn) Swarna Rekha Bhat (ed.), Since the publication of the first edition in 1973 Achar's Textbook of Pediatrics has quickly established its reputation as one of the classic textbooks on the subject In this the fourth edition of the book the content has been updated and revised to reflect current approaches and knowledge New images colour photographs a CD with additional content and up to date tables and graphs have also been added This textbook is aimed at providing medical undergraduates with a solid grounding on the diseases management and care of infants and children while also addressing the needs of and problems faced by today's adolescents Special Features Updated information on all topics Algorithms for diagnosis Approach to a patient Clinical features highlighted for easy access Colour photographs and illustrative figures to
