to the expression of individual autonomy and responsibility and the perceived need for prevention as a condition for the security of autonomy and the promotion of welfare The book then traces this tension back to an intrinsic ambivalence within the modern conception of individual liberty which is both repressed and preserved by liberal conceptions of responsibility and punishment It finds that it is this tension that ultimately grounds the rise of preventive criminal offences in recent times The Preventive Turn in Criminal Law engages with the main contemporary literature on criminal law prevention risk security and criminalisation by deploying a theoretical perspective from both classical and contemporary works of social and political theory including the works of Hobbes Locke Hegel and Bentham It does so in order to reveal that the pervasiveness of prevention in twenty first century criminal law not only represents the consequence of new and unprecedented features of contemporary politics and society but also embeds long established features of the liberal legal and political tradition

**Pain and Retribution** David Wilson, 2014-03-15 Today the Tower of London is a tourist site home only to the crown jewels but not long ago the imposing structure held traitors political prisoners and more often on their way to the chopping block Even outside of this famous building prisons have changed radically since the Norman Conquest in 1066 In the first book on the history of prisons in Britain former prison governor and professor of criminology David Wilson offers unrivaled insight into the penal system in England Scotland and Wales charting the rise and fall of forms of punishments that take place behind their walls Pain and Retribution explores prisons as an institution and examines how they are designed organized and managed Wilson reveals that prisons have to satisfy the demands of three interested parties the public from politicians and media commentators to everyday citizens the prison staff and the prisoners themselves He shows how prevailing concerns and issues of the times allow one faction or another to have more power at varying points in history and he considers how prisons are unable to satisfy all three at the same time leading to the system being seen as a failure despite rising numbers of prisoners and growing funds invested in keeping them incarcerated With intriguing comparisons between the prisons of New York City and Britain and searching questions about the purposes of the current penal system Pain and Retribution provides unparalleled access to prison landings staffs and the people behind the locked doors **Decolonising**

**Criminology** Harry Blagg, Thalia Anthony, 2019-11-23 This book undertakes an exploratory exercise in decolonizing criminology through engaging postcolonial and postdisciplinary perspectives and methodologies Through its historical and political analysis and place based case studies it challenges criminological inquiry by installing colonial structures of power at the centre of the contemporary criminological debate This work unseats the Western nation state as the singular point of departure for comparative criminological and socio legal research Decolonising Criminology argues that postcolonial and postdisciplinary critique can open up new pathways for criminological investigation It builds on recent debates in criminology from outside of the Anglosphere The authors deploy a number of heuristic devices perspectives and theories generally ignored by criminologists of the Global North and engage perspectives concerned with articulating new decolonised

epistemologies of the Global South This book disputes the view that colonisation is a thing of the past and provides lessons for the Global North

Serious Offenders Barry S. Godfrey, David J. Cox, Stephen Farrall, 2010 *Serious Offenders A Historical Study of Habitual Criminals* examines the persistent offending careers of men and women operating in northwest England between the 1840s and 1940s The book focuses on a group of serious and persistent offenders who as well as offending in the region had lengthy offending careers spanning several decades in various other locations These were highly mobile persistent serious offenders who appear not to have been so closely bound in to the processes and structures which aided desistance from offending for the vast majority of the petty offenders The authors discuss questions such as Why did some people remain minor offenders whilst others developed into serious offenders What were the triggers which propelled previously minor offenders towards persistent serious criminality What part did changes in criminal legislation play in these processes They conclude by drawing on the lessons to be learnt for today's debates about the regulation and surveillance of serious habitual offenders

Peculiar Institution David Garland, 2011-02-01 The U S death penalty is a peculiar institution and a uniquely American one Despite its comprehensive abolition elsewhere in the Western world capital punishment continues in dozens of American states a fact that is frequently discussed but rarely understood The same puzzlement surrounds the peculiar form that American capital punishment now takes with its uneven application its seemingly endless delays and the uncertainty of its ever being carried out in individual cases none of which seem conducive to effective crime control or criminal justice In a brilliantly provocative study David Garland explains this tenacity and shows how death penalty practice has come to bear the distinctive hallmarks of America's political institutions and cultural conflicts America's radical federalism and local democracy as well as its legacy of violence and racism account for our divergence from the rest of the West Whereas the elites of other nations were able to impose nationwide abolition from above despite public objections American elites are unable and unwilling to end a punishment that has the support of local majorities and a storied place in popular culture In the course of hundreds of decisions federal courts sought to rationalize and civilize an institution that too often resembled a lynching producing layers of legal process but also delays and reversals Yet the Supreme Court insists that the issue is to be decided by local political actors and public opinion So the death penalty continues to respond to popular will enhancing the power of criminal justice professionals providing drama for the media and bringing pleasure to a public audience who consumes its chilling tales Garland brings a new clarity to our understanding of this peculiar institution and a new challenge to supporters and opponents alike
