Disciplinary Measures from the Metrical Psalms to Milton Kenneth J.E. Graham, 2016-02-26 *Disciplinary Measures from the Metrical Psalms to Milton* studies the relationship between English poetry and church discipline in four carefully chosen bodies of poetry written between the Reformation and the death of John Milton. Its primary goal is to fill a gap in the field of Protestant poetics which has never produced a study focused on the way in which poetry participates in and reflects on the post-Reformation English Church's attempts to govern conduct. Its secondary goal is to revise the understandings of discipline which social theorists and historians have offered and which literary critics have largely accepted. It argues that knowledge of the early modern culture of discipline illuminates some important poetic traditions and some major English poets, and it shows that this poetry in turn throws light on verbal and affective aspects of the disciplinary process that prove difficult to access through other sources, challenging assumptions about the means of social control, the structures of authority, and the practical implications of doctrinal change. More specifically, *Disciplinary Measures* argues that while poetry can help us to understand the oppressive potential of church discipline, it can also help us to recover a more positive sense of discipline as a spiritual cure.

Crimes of Punishment Theodore L. Dorpat, 2007 This groundbreaking book by an award-winning psychoanalyst and forensic psychiatrist presents a comprehensive exploration of a timely but often taboo topic: the failure of punishment to deter crime and violence, an issue that affects us both individually and as a culture. Written at the culmination of the author's fifty-year career as a psychoanalyst, forensic psychologist, and scholar, this wide-ranging work identifies the origins of violence and investigates the surprising consequences of punishment from a multitude of perspectives. In his treatment of the topic, Dr. Dorpat utilizes scientific research, ethical reasoning, and his vast clinical experience and insight. He also suggests the benefits of new and emerging humane alternatives to the revenge punishment model currently entrenched in our society, such as restorative justice. In contrast to most contemporary measures

these new approaches while still imprisoning dangerous individuals effectively stress reparation and forms of sanctioning other than incarceration When restitution replaces revenge everyone benefits Crimes of Punishment examines four key interrelated social methods of punishment These are 1 the corporal punishment of children 2 the incarceration of adults in prisons 3 capital punishment the death penalty and 4 emotional verbal abuse As he elucidates and analyzes each of these forms of punishment Dr Dorpat clearly and logically makes the case that punishment is not only ineffectual but that it also engenders more of what it ostensibly aims to stop violence and misbehavior Both children and adults who are subjected to punishment tend to become more violent individuals In covering the full scope of our contemporary justice system Dr Dorpat brings to the forefront those who are often overlooked or dismissed the victims of crime His concluding chapters present and clarify the psychological wounds and needs of these individuals and demonstrate how restorative justice is effective in attending to victims in an ethical and healing manner In a humane and ethically evolved society restitution replaces punishment Market Comparison Crimes of Punishment is unique in that it covers not just one but four different types of punishment the corporal punishment of children the incarceration of adults the death penalty and verbal emotional abuse Two earlier books written by psychiatrists expose the terrible conditions in America's prisons They are The Crime of Punishment New York Viking 1968 by Karl Menninger and Prison Madness by Terry Kupers San Francisco Jossey Bass 1999 This book differs in two important ways from the books written by Menninger and Kupers First The Crimes of Punishment covers other kinds of punishment while those authors deal only with the punishment of incarceration Secondly the reforms they recommend are merely piecemeal modifications of the present criminal justice systems whereas Dr Dorpat argues for a radical change that includes the abolition of today's punitive prison Retributive Justice system and the establishment of a new and different system namely Restorative justice a system that has been developed over the past decade in Australia and New Zealand The Crimes of Punishment differs from Menninger's book in covering the many changes that have occurred in prisons since 1968 In several short chapters on restorative justice the book also explores this exciting new approach and serves as an informed introduction to a new important and effective moral approach to the treatment of criminals

In Our Best Interest Jason Hanna, 2018-09-21 When if ever is it permissible to intervene in a person's affairs for his or her own good This in essence is the moral problem of paternalism Many consider paternalism morally objectionable In this book Jason Hanna argues boldly for an alternative pro paternalist view that intervention is permissible so long as it serves the best interest of the person subject to it without thereby wronging others To Hanna the moral debate over paternalism is most fundamentally a debate about the weight and relevance of a certain kind of reason or rationale for intervention In arguing

that paternalistic rationales provide valid and weighty reasons Hanna considers the objections that paternalism is disrespectful that it wrongly imposes values on people that it violates individual rights and that it is likely to be misapplied or abused He argues that each of these objections fails to demonstrate that there is anything distinctively problematic about paternalism Moreover he attempts to situate pro paternalism within a popular rights based moral theory Hanna shows that popular alternatives to pro paternalism confront serious problems of their own especially insofar as they attempt to distinguish permissible intervention on behalf of incompetent persons from impermissible intervention on behalf of competent adults Although the book's central aim is to defend a moral view it suggests how this view can be fruitfully applied in a number of real world contexts

Preventive Justice Andrew Ashworth, Lucia Zedner, 2014-03-27 This book arises from a three year study of Preventive Justice directed by Professor Andrew Ashworth and Professor Lucia Zedner at the University of Oxford The study seeks to develop an account of the principles and values that should guide and limit the state's use of preventive techniques that involve coercion against the individual States today are increasingly using criminal law or criminal law like tools to try to prevent or reduce the risk of anticipated future harm Such measures include criminalizing conduct at an early stage in order to allow authorities to intervene incapacitating suspected future wrongdoers and imposing extended sentences or indefinite on past wrongdoers on the basis of their predicted future conduct all in the name of public protection and security The chief justification for the state's use of coercion is protecting the public from harm Although the rationales and justifications of state punishment have been explored extensively the scope limits and principles of preventive justice have attracted little doctrinal or conceptual analysis This book re-assesses the foundations for the range of coercive measures that states now take in the name of prevention and public protection focussing particularly on coercive measures involving deprivation of liberty It examines whether these measures are justified whether they distort the proper boundaries between criminal and civil law or whether they signal a larger change in the architecture of security In so doing it sets out to establish a framework for what we call

Preventive Justice **Restorative Justice** Heather Strang, John Braithwaite, 2017-09-19 The astonishing development of restorative justice practice over the past decade has inspired creative new thinking about the philosophy of punishment and principles of justice. Many of the questions raised in this book such as the relationship between restorative and retributive justice and the values and processes which should guide restorative practice are the subject of intense debates. With contributions from many of the most distinguished scholars in the field, this book analyzes the gap between philosophy and practice and the need for practice to be more informed by philosophy. This volume is a milestone in the development of those underlying principles which will direct the progress of restorative justice in the future.

Objectivity and the Rule of Law Matthew Kramer, 2007-06-11 What is objectivity? What is the rule of law? Are the operations of legal systems objective? If so, in what ways, and to what degrees, are they objective? Does anything of importance depend on the objectivity of law? These are some of the principal questions addressed by Matthew H. Kramer in this lucid and wide-ranging study that introduces readers to vital areas of philosophical enquiry. As Kramer shows, objectivity and the rule of law are complicated phenomena, each comprising a number of distinct though overlapping dimensions. Although the connections between objectivity and the rule of law are intimate, they are also densely multi-faceted.

The Injustice of Punishment Bruce N. Waller, 2017-10-19 *The Injustice of Punishment* emphasizes that we can never make sense of moral responsibility while also acknowledging that punishment is sometimes unavoidable Recognizing both the injustice and the necessity of punishment is painful but also beneficial It motivates us to find effective means of minimizing both the use and severity of punishment and encourages deeper inquiry into the causes of destructive behavior and how to change those causes in order to reduce the need for punishment There is an emerging alternative to the comfortable but destructive system of moral responsibility and just deserts That alternative is not the creation of philosophers but of sociologists criminologists psychologists and workplace engineers it was developed tested and employed in factories prisons hospitals and other settings and it is writ large in the practices of cultures that minimize belief in individual moral responsibility The alternative marks a promising path to less punishment less coercive control deeper common commitment and more genuine freedom
