life Thayer describes greyhound racing's dynamic growth in the 1920s in places like Saint Louis Chicago and New Orleans then explores its phenomenal popularity in Florida where promoters exploited its remote association with the upper class and helped foster a celebrity culture around it By the end of the century media reports of alleged animal cruelty had surfaced as well as competition from other gaming pursuits such as state lotteries and Indian casinos Greyhound racing became so suspect that even Homer Simpson derided it In exploring the socioeconomic political and ideological factors that fueled the rise and fall of dog racing in America Thayer has consulted participants and critics alike in order to present both sides of a contentious debate She examines not only the impact of animal protectionists but also suspected underworld ties longstanding tensions between dogmen and track owners over racing contracts and the evolving relationship between consumerism and dogs She captures the sport's glory days in dozens of photographs that recall its coursing past or show celebrities like Frank Sinatra and Babe Ruth with winning racing hounds Thayer also records the growth of the adoption movement that rescues ex racers from possible euthanasia Today there are fewer than half as many greyhound tracks in half as many states as there were 10 years ago and half of them are in Florida Thayer's in depth meticulously balanced account is an intriguing look at this singular activity and will teach readers as much about American cultural behavior as about racing greyhounds

Ortiz-Robles, 2016-06-17 Why do animals talk in literature In this provocative book Mario Ortiz Robles tracks the presence of animals across an expansive literary archive to argue that literature cannot be understood as a human endeavor apart from its capacity to represent animals Focusing on the literary representation of familiar animals including horses dogs cats and songbirds Ortiz Robles examines the various tropes literature has historically employed to give meaning to our fraught relations with other animals Beyond allowing us to imagine the lives of non humans literature can make a lasting contribution to Animal Studies an emerging discipline within the humanities by showing us that there is something fictional about our relation to animals Literature and Animal Studies combines a broad mapping of literary animals with detailed readings of key animal texts to offer a new way of organizing literary history that emphasizes genera over genres and a new way of classifying animals that is premised on tropes rather than taxa The book makes us see animals and our relation to them with fresh eyes and in doing so prompts us to review the role of literature in a culture that considers it an endangered art form

Insects Paul Sterry, 2006 The world of insects is a fascinating realm comprising the largest class over two million species of animals on earth In this book the basic orders of insects are detailed followed by a general description of insect anatomy and structure Then there are considerations of life cycles and reproduction food and feeding movement self defense and unusual lifestyles Beetles bees ants butterflies moths grasshoppers termites and many more creatures are discussed with examples from around the world all illustrated with 86 brilliant full color photographs and an engrossing narrative
