General MacArthur's Strategic Success During The Early Months Of The Korean War LTC James D. Clay, 2015-11-06 Many military professionals regard General of the Army Douglas MacArthur as a very polarizing figure in military history from his strategic use of maneuver to defeat the Japanese at Leyte to his public defiance of the Commander in Chief President Truman on his policy towards the Korean War Seen by many as a tactical genius while others viewed him as an egomaniac General MacArthur exhibited both sides of this complex character but the evidence shows that MacArthur possessed a level of military competence that set him apart from his contemporaries In 1950 MacArthur demonstrated one of his most embarrassing defeats as well as one of his most brilliant successes within the course of ten weeks MacArthur exemplifies a level of confidence that earned him the modern reputation as an operational artist from his ability to turn the

tide of war and restore South Korea's sovereignty *European Integration and Space Policy* Thomas Hoerber, Antonella Forganni, 2020-12-21 This volume addresses developments in European space policy and its significance for European integration using discourse theory as a framework It seeks to address the developments in European space policy by examining several sensitive security questions linked in general with space activities on the one hand and the interplay between space policy and security policy in the European Union EU on the other The book argues that defence and security matters should be studied for a better understanding of space projects in their historical political economic legal and social context The volume seeks to answer the following key questions What can space policy contribute to European identity formation and the integration process What are the interests of member states EU institutions in space How is space policy perceived by European institutions and how have they been engaged in the policy process to promote activity in space In which ways is the EU engaged in space in terms of policy areas e g foreign policy industrial policy security and defence policies What is the impact of institutions on the policy making process in European space policy This book will be of interest to students of EU policy space policy discourse studies and International Relations in general *Britain and Ballistic Missile Defence, 1942-2002* Jeremy Stocker, 2004-08-02 Britain was the first country to come under sustained ballistic missile attack during 1944-45 Defence against ballistic missiles has been a persistent if highly variable subject of political policy and technical investigation ever since The British Second World War experience of trying to counter the V-2 attacks contained many elements of subsequent responses to ballistic missile threats After the war a reasonably accurate picture of Soviet missile capabilities was not achieved until the early 1960s by which time the problem of early warning had largely been solved From the mid 1960s on British attention shifted away from the development of the country's own defences towards the wider consequences of US and Soviet deployments After the end of the Cold War there was renewed interest in a limited active defence capability against Third World missile threats This well researched book is primarily aimed at students of post war British foreign and defence policies but will also be of interest to informed general readers *Space Warfare* John J. Klein, 2024-09-18 This book examines military space strategy within the context of the land and naval strategies of the past This second edition has been updated and revised with several new chapters included The book examines competition and conflict in the space domain including the methods used and sound counterstrategies to thwart a competitor's efforts Contrary to many spacepower pundits the book explains that neither is the space domain inherently offense dominant nor is there a first mover advantage when incorporating a sound space strategy Offering new insights into the nature of strategic competition in space this second edition leans heavily on the British maritime experience and the work of Julian Corbett to provide a strategic framework for understanding competition crisis and conflict in the space domain It also includes important concepts from leading theorists and strategists both past and present to amplify concepts and provide additional insights into the functioning of space strategy The book provides a foundational framework by underscoring that space

Australia's Defence Strategy Adam Lockyer, 2017-01-30 How would we know a good defence strategy if we saw one The Asian Century is challenging many of the traditional assumptions at the heart of Australian defence policy and strategy Defence scholars have risen to the challenge of these transformational times and have collectively produced a smorgasbord of alternatives for policy makers The problem is that these recommendations all point in very different directions How should we evaluate these options Adam Lockyer tackles this question and develops a novel conceptual framework for evaluating defence strategies By doing so this book breaks new theoretical ground and makes an important contribution to our understanding of strategy in general and defence strategy in particular Lockyer then applies this analytical tool to the leading arguments in Australia's defence debate and finds that there is still substantial work to be done Lockyer concludes by proposing a new Australian defence strategy for a contested Asia that would pass the test for a good defence strategy The result is essential reading for anyone interested in strategy or the future of Australian defence policy

High frontier win 05 , **Thomas Schelling and the Nuclear Age** Robert Ayson, 2020-09-23 An illuminating insight into the work of Thomas Schelling one of the most influential strategic thinkers of the nuclear age By the time of the Cuban Missile Crisis and the United States early forays into Vietnam he had become one of the most distinctive voices in Western strategy This book shows how Schelling's thinking is much more than a reaction to the tensions of the Cold War In a demonstration that ideas can be just as significant as superpower politics Robert

Ayson traces the way this Harvard University professor built a unique intellectual framework using a mix of social scientific reasoning from economics to social theory and psychology As such this volume offers a rare glimpse into the intellectual history which underpins classical thinking on nuclear strategy and arms control thinking which still has an enormous influence in the early twenty first century **Strategists Break All The Rules** Major Adelaido Godinez III,2014-08-15

Emory Upton believed that politicians should leave war to professionals This led to two assumptions that became conventional wisdom first an apolitical army represented a more professional force and second the problems at the tactical and operational level were similar enough to be useful in developing strategic thinking These assumptions resulted in what Samuel P Huntington described as the normal theory relationship between policy makers and generals The assumption made sense for the United States but had one unfortunate result The Army as an institution misread the nature of an apolitical force The essence of an apolitical force should be non partisan Army professionals above political interference or interest There is a difference however between policy and politics While not involving itself in the political life of the nation the Army is vitally concerned with the policies of the nation The discussion strategists must prepare for are political but in the nature of policy as the object of war A historical survey of strategists from General Winfield Scott to General Creighton Abrams suggests that the most successful strategists are life long learners They build holistic understanding of the interdependent and infinite connections of the whole problem Once they develop a hypothesis about the whole problem they reshape those connections to create a better peace for the United States Strategists that take time to understand the whole problem encourage discourse Retaining the Functional Area 59 Strategist program will continue to benefit the force because they do not follow a traditional route to generalship After all few have earned stars by arguing debating and taking intellectual risk

Strategy Richard J Bailey,James W Forsyth,Mark O Yeisley,2016-04-15 How does one engage in the study of strategy Strategy Context and Adaptation from Archidamus to Airpower argues that strategy is not just concerned with amassing knowledge it is also about recognizing our imperfect understanding of the environment and respecting the complex nature of adaptation to the unforeseen or unexpected In essence the strongest strategists are those who commit to an education that cultivates a more holistic and adaptive way of thinking With that thought in mind the contributors to Strategy each a current or former professor at the School of Advanced Air and Space Studies widely considered the Department of Defense s premier school of strategy offer ways of thinking strategically about a variety of subject matters from classical history to cyber power Practitioners in the profession of arms perhaps more than any other profession must employ critical thinking where the application of power on land at sea in the air and in space and cyberspace are concerned Strategy examines various sub disciplines regarding the use of power and illuminates different approaches to thinking which have implications beyond the implementation of force **Warfighting and Disruptive Technologies** Terry Pierce,2004-08-05 Occasionally during times of peace military forces achieve major warfighting innovations Terry Pierce terms these developments disruptive innovations

and shows how senior leaders have often disguised them in order to ensure their innovations survived He shows how more common innovations however have been those of integrating new technologies to help perform existing missions better and not change them radically The author calls these sustaining innovations The recent innovation history suggests two interesting questions First how can senior military leaders achieve a disruptive innovation when they are heavily engaged around the world and they are managing sustaining innovations Second what have been the external sources of disruptive and sustaining innovations This book is essential reading for professionals and students interested in national security military history and strategic issues **Routledge Handbook of Security Studies** Myriam Dunn Cavelty,Thierry
