Christianity and Global Law Rafael Domingo, John Witte, Jr., 2020-03-31 This book explores both historical and contemporary Christian sources and dimensions of global law and includes critical perspectives from various religious and philosophical traditions Two dozen leading scholars discuss the constituent principles of this new global legal order historically comparatively and currently The first part uses a historical biographical approach to study a few of the major Christian architects of global law and transnational legal theory from St Paul to Jacques Maritain The second part distills the deep Christian sources and dimensions of the main principles of global law historically and today separating out the distinct Catholic Protestant and Orthodox Christian contributions as appropriate Finally the authors address a number of pressing global issues and challenges where a Christian informed legal perspective can and should have deep purchase and influence The work makes no claim that Christianity is the only historical shaper of global law nor that it should monopolize the theory and practice of global law today But the book does insist that Christianity as one of the world's great religions has deep norms and practices ideas and institutions prophets and procedures that can be of benefit as the world struggles to find global legal resources to confront humanity's greatest challenges The volume will be an essential resource for academics and researchers working in the areas of law and religion transnational law legal philosophy and legal history

Recovering the Monstrous in Revelation Heather Macumber, 2021-08-30 This book reads Revelation through the lens of the monster

Using monster theory Heather Macomber approaches the cosmic beings in John's Apocalypse as other and monstrous regardless of whether they are found in heaven or the abyss with significant attention paid to the monstrous body and how it causes both unease and wonder. Intertwined with descriptions of cosmic monsters, this book also interrogates the role of John as a maker of horror stories who casts his opponents as the other and monstrous. Despite the tendency to view John and the heavenly creatures as the heroes of this apocalyptic tale, Macomber aims to recover their own liminal and hybrid characteristics that mark them as monstrous.

Mary Douglas Mary Douglas, 2002. Mary Douglas is a central figure within British social anthropology. Studying under Evans Pritchard at Oxford immediately after the second world war, she formed part of the group of anthropologists who established social anthropology's standing in the world of scholarship. Her works spanning the second half of the twentieth century have been widely read and her theories applied across the social sciences and humanities. While her research in the Congo clearly inspired her later studies, Douglas also applied her theories to Western societies and thus played a crucial role in normalizing the contemporary acceptance of the West as a legitimate field of anthropological investigation. Douglas's work has excited debate in such diverse areas as economics, religion, philosophy, the sociology of food, and risk analysis. This collection reproduces in facsimile twelve of Mary Douglas's groundbreaking works, all of which are also available for individual purchase. The first volume includes a new introduction written by Douglas for this collection.

Dystopia Gregory Claeys, 2016-11-24. *Dystopia: A Natural History* is the first monograph devoted to the concept of dystopia. Taking the term to encompass both a literary tradition of satirical works, mostly on totalitarianism, as well as real despotisms and societies in a state of disastrous collapse, this volume redefines the central concepts and the chronology of the genre and offers a paradigm-shifting understanding of the subject. Part One assesses the theory and prehistory of dystopia. By contrast to utopia, conceived as promoting an ideal of friendship defined as enhanced sociability, dystopia is defined by estrangement, fear, and the proliferation of enemy categories. A natural history of dystopia thus concentrates upon the centrality of the passion or emotion of fear and hatred in modern despotisms. The work of Le Bon, Freud, and others is used to show how dystopian groups use such emotions. Utopia and dystopia are portrayed not as opposites but as extremes on a spectrum of sociability defined by a heightened form of group identity. The prehistory of the process whereby enemies are demonised is explored from early conceptions of monstrosity through Christian conceptions of the devil and witchcraft and the persecution of heresy. Part Two surveys the major dystopian moments in twentieth-century despotisms, focussing in particular upon Nazi Germany, Stalinism, the Chinese Cultural Revolution, and Cambodia under Pol Pot. The concentration here is upon the political religion hypothesis as a key explanation for the chief excesses of communism in particular. Part Three examines literary dystopias. It commences well before the usual starting point in the secondary literature in anti-Jacobin writings of the 1790s. Two chapters address the main twentieth-century texts usually studied as representative of the genre: Aldous Huxley's *Brave New World* and George Orwell's *Nineteen Eighty-Four*. The remainder of the section examines

the evolution of the genre in the second half of the twentieth century down to the present **East Anglian Church**

Urban Neighbourhood Formations Hilal Alkan,Nazan Maksudyan,2020-03-04 This book examines the formation of

urban neighbourhoods in the Middle East Africa and South Asia It departs from neighbourhoods to consider identity coexistence solidarity and violence in relations to a place Urban Neighbourhood Formations revolves around three major aspects of making and unmaking of neighbourhoods spatial and temporal boundaries of neighbourhoods neighbourhoods as imagined and narrated entities and neighbourhood as social relations With extensive case studies from Johannesburg to Istanbul and from Jerusalem to Delhi this volume shows how spatial amenities immaterial processes of narrating and dreaming and the lasting effect of intimacies and violence in a neighbourhood are intertwined and negotiated over time in the construction of moral orders urban practices and political identities at large This book offers insights into neighbourhood formations in an age of constant mobility and helps us understand the grassroots level dynamics of xenophobia and hostility as much as welcoming and openness It would be of interest for both academics and more general audiences as well as for students of undergraduate and postgraduate courses in Urban Studies and Anthropology

Futurism and Politics Gunter Berghaus, 1996-04-15 Futurism was the state of the Fascist regime this is the view one encounters in most books written on Futurist art and literature Whilst there can be no doubt about Futurist involvement with the founding of the fascist movement little is known about the internal relationship between Futurists and Fascists in the years 1918 22 nor about the reasons for the Futurists departure from the Fascist movement in 1920 or about Futurist opposition to and even armed struggle against the Fascist regime after 1924 Whilst the public documents testifying to Futurist support of Mussolini are well known little has been written about Futurist anti fascism camouflaged as official adherence to the regime This study based primarily on unknown or unpublished documents discovered in state archives and private collections presents a new and far more complex picture of the relationship of the two movements than has previously been shown by critics and historians
