Reckless Mind:

The Reckless Mind: Intellectuals in Politics Mark Lilla, 2016-09-06 European history of the past century is full of examples of philosophers writers and scholars who supported or excused the worst tyrannies of the age How was this possible How could intellectuals whose work depends on freedom defend those who would deny it In profiles of six leading twentieth century thinkers Martin Heidegger Carl Schmitt Walter Benjamin Alexandre Kojve Michel Foucault and Jacques Derrida Mark Lilla explores the psychology of political commitment As continental Europe gave birth to two great ideological systems in the twentieth century communism and fascism it also gave birth to a new social type the philotyrannical intellectual Lilla shows how these thinkers were not only grappling with enduring philosophical questions they were also writing out of their own experiences and passions These profiles demonstrate how intellectuals can be driven into a political sphere they scarcely understand with momentous results In a new afterword Lilla traces how the intellectual world has changed since the end of the cold war The ideological passions of the past have been replaced in the West he argues by a dogma of individual autonomy and freedom that both obscures the historical forces at work in the present and sanctions ignorance about them leaving us ill equipped to understand those who are inflamed by the new global ideologies of our time Reckless Mind Christopher M. Psychiatry in the Scientific Image Dominic Murphy, 2012-01-13 An analysis of the understanding classification and explanation of mental disorders that proposes that psychiatry adopt the best practices of the cognitive sciences In *Psychiatry in the Scientific Image* Dominic Murphy looks at psychiatry from the viewpoint of analytic philosophy of science considering three issues how we should conceive of classify and explain mental illness If someone is said to have a mental illness what about it is mental What makes it an illness How might we explain and classify it A system of psychiatric classification settles these questions by distinguishing the mental illnesses and showing how they stand in relation to one another This book explores the philosophical issues raised by the project of explaining and classifying mental illness Murphy argues that the current literature on mental illness exemplified by the Diagnostic and Statistical Manual of Mental Disorders is an impediment to research it lacks a coherent concept of the mental and a satisfactory account of disorder and yields too much authority to commonsense thought about the mind He argues that the explanation of mental illness should meet the standards of good explanatory practice in the cognitive neurosciences and that the classification of mental disorders should group symptoms into conditions based on the causal structure of the normal mind

Gates of Hell Daniel Jupp,2023-09-26 In this powerful and hard hitting analysis Daniel Jupp examines the enormous personal power and political influence of one of the world s richest men The Gates of Hell covers

everything from the childhood influences that shaped Bill Gates to the Microsoft years and his current incarnation as the most powerful philanthropist on the planet Jupp traces just how vast and unaccountable the influence of Gates has become including his leading role in current global health policies and the drive toward a net zero Green Revolution which threatens the economic and social fabric of the entire western world Firmly asking the questions that mainstream commentators often avoid Jupp supplies a damaging criticism not just of Gates himself but of the political corruption and inertia which has allowed one man to effectively direct key global policies adopted by multiple nations without any democratic accountability From educational and health campaigns of dubious efficacy and unexamined risk to green policies that make little rational sense Jupp shows how the public private funding hybrid championed by The Gates Foundation allows a powerful billionaire to push health agriculture and science policies in directions which profit investors whilst harming others who have no say in any part of the process Now more than ever following the COVID 19 pandemic the consequences of lockdowns mass mRNA vaccinations and the advances of net zero policy questioning why one man who has never been elected to office has such influence on these decisions is vital
