voices within and between countries The International School Leadership Development Network ISLDN was formed in 2009 and has had scholars from more than 20 countries involved Barnett Woods 2021 In response to the pandemic the ISLDN embarked on a study that analyzed the impact Covid 19 had on the school leaders and the way that they lead The study captures a unique timeframe as the school leaders were still leading through the pandemic and adjusting to leadership after a global pandemic In this book we are using these cases to describe how principals not only led their schools during the pandemic but what they are doing as we come out of the pandemic What makes this book different from many of the other publications about education and the pandemic is A Principal voice is often missing from research and writing about the educational impact of the COVID pandemic B The book draws upon empirical research conducted in 2022 It is reporting on principal case studies collected as part of the research of the International School Leadership Development Network There are 37 principal cases from seven countries and 25 writers These cases have not been reported elsewhere and were collected especially for the book C The cases are focused not only on how principals led their school through the pandemic but how they are leading beyond the pandemic A feature of the cases is reflection on enduring changes to education and the implications for future educational leadership D Whilst principals discuss their responses to the various mandates and pressures and what worked well and what could have been done better they also reflect on the support they gave others and the support they got

Educational Leadership and Pierre Bourdieu Pat Thomson, 2016-11-03. Pierre Bourdieu was one of the most important thinkers of the twentieth century. He argued for and practiced rigorous and reflexive scholarship, interrogating the inequities and injustices of modern societies. Through a lifetime's explication of the ways in which schooling both produces and reproduces the status quo, Bourdieu offered a powerful critique and method of analysis of the history of schooling and of contemporary educational policies and trends. Though frequently used in educational research, Bourdieu's work has had much less take up in Educational Leadership Management and Administration. Educational Leadership and Pierre Bourdieu argues that ELMA scholars have much to gain by engaging more thoroughly with his work. The book explains each of the key terms in Bourdieu's thinking tool kit, showing how the tripartite concepts of field, habitus, and capitals offer a way through which to understand the interaction of structure and agency and the limits on the freedom of an individual in this case, an educational leader, to act. Educational Leadership and Pierre Bourdieu offers an analysis of dominant trends in ELMA research, examining the kinds of questions asked, projects undertaken, and methods used. It provides alternative questions and methods based on a Bourdieusian approach, further readings, and a range of exemplars of the application of these tools. The book will be of interest to those whose primary focus is the utility of Bourdieu's social theory.

International Handbook of Educational Change Andy Hargreaves, A. Lieberman, M. Fullan, D.W. Hopkins, 2014-11-14. The International Handbook of Educational Change is a state-of-the-art collection of the most important ideas and evidence of educational change. The book brings together some of the most influential thinkers and writers on educational change. It deals with issues like educational innovation, reform, restructuring, culture building, inspection, school review, and change management. It asks why some people resist change and what their resistance means. It looks at how men and women, older teachers and younger teachers, experience change differently. It looks at the positive aspects of change but does not hesitate to raise uncomfortable questions about many aspects of educational change, either. It looks critically and controversially at the social, economic, cultural, and political forces that are driving educational change. School leaders, system administrators, teacher leaders, consultants, facilitators, educational researchers, staff developers, and change agents of all kinds will find this book an indispensable resource for guiding them to both classic and cutting-edge understandings of educational change. No other work provides as comprehensive coverage of the field of educational change.
