Stephens,2020-09-17 The climate crisis is a crisis of leadership For too long too many leaders have prioritized corporate profits over the public good exacerbating climate vulnerabilities while reinforcing economic and racial injustice Transformation to a just sustainable renewable based society requires leaders who connect social justice to climate and energy During the Trump era connections among white supremacy environmental destruction and fossil fuel dependence have become more conspicuous Many of the same leadership deficiencies that shaped the inadequate response in the United States to the coronavirus pandemic have also thwarted the US response to the climate crisis The inadequate and ineffective framing of climate change as a narrow isolated discrete problem to be solved by technical solutions is failing The dominance of technocratic white male perspectives on climate and energy has inhibited
