## **Reclaiming Africa:**

**Reclaiming Africa** Sam Moyo, Praveen Jha, Paris Yeros, 2018-09-03 This book presents the findings of research conducted by scholars and activists associated with the Agrarian South Network based mainly in Africa, Asia and Latin America. The research articulates a Southern perspective on the new scramble for Africa with a view to strengthen tri-continental solidarities. The book explains the significance of the new scramble in terms of the economic structures inherited from the late nineteenth century scramble and the subsequent post-independence period. The renewed competition for Africa's land and natural resources and the resumption of economic growth at the turn of the millennium have revived concerns regarding the continent's position in the world economy and the prospects for its development in the twenty-first century. In this regard, the book addresses two related issues: the character of the expansion of Southern competitors in relation to the more established Western strategies and the impact of the renewed influx of investments in land, minerals and associated infrastructure. The findings are presented with empirical rigor and conceptual clarity to enable the reader to grasp what really is at stake in the twenty-first century: an epic struggle to reclaim Africa from the monopolies that exercise control over its land, minerals, labour and destiny.

**Reclaiming Africa** James Shikwati, 2004 *Reclaiming Economic Sovereignty in Africa* Horman Chitonge, 2025-04-08 This book has examined the way African countries utilise their natural wealth. It has illustrated that weak economic sovereignty accounts for the irony that the most endowed continent on the planet has ended being the most impoverished. It is argued in this book that weak economic sovereignty in Africa has several implications, including the situation where the continent is unable to make the most out of its abundant natural wealth. Weak economic sovereignty on the continent is manifested in the low levels of financial and monetary sovereignty among African countries, but most importantly in low productive capabilities. The conditions of low productive capabilities prevailing on the African continent have created a situation where most African countries are locked into economically debilitating dependencies, including dependence on commodity export such that they only get a tiny proportion of the value generated from natural resources extracted from their territories. The book has also argued that the persisting weak economic sovereignty on the continent is a clear indication that while African countries attained political sovereignty six decades ago, attaining economic sovereignty has remained an incomplete liberation project that requires a new strategy to accomplish.

On Transforming Africa Kofi Buenor Hadjor, 1987 **Reclaiming the Nation** Sam Moyo, Paris Yeros, 2011-03-04 This book compares the trajectories of states and societies in Africa, Asia and Latin America under neoliberalism, a time marked by serial economic crises, escalating social conflicts, the remilitarisation of North-South relations and the radicalisation of social and nationalist forces. Sam Moyo and Paris Yeros bring together researchers and activists from the three continents to assess the state of national sovereignty and the challenges faced by popular movements today. They show that global integration has widened social and regional inequalities within countries, exacerbated ethnic, caste and racial conflicts and generally reduced the

bureaucratic capacities of states to intervene in a defensive way Moreover inequalities between the countries of the South have also widened These structural tensions have all contributed to several distinct political trajectories among states from fracture and foreign occupation to radicalisation and uncertain re stabilisation This book redraws the debate on the political economy of the contemporary South and provides students of international studies with an important collection of readings
