silence     Interdisciplinary Approaches to Pedagogy and Place-Based Education Deric Shannon, Jeffery Galle, 2017-06-05 This book brings together scholars from a wide range of disciplines to creatively engage with place in the context of pedagogy Beginning with an exploration of traditional place based forms of education such as outdoor education travel courses and courses on sustainability the authors go on to expand our popular notions of place including the classroom the campus our interior selves and our digital ecosystems This reconsideration of place based education represents not only an engagement of prior literature on pedagogy and place but also a re imagining of the role that place might play in education Authors stretch the notion of place arguing for a holistic approach to disciplines in the humanities social sciences and natural sciences bringing into focus an array of contentious issues in philosophies and methods of teaching for multiple academic disciplines and their many intersections     *Materializing Silence in Feminist Activism* Jessica Rose Corey, 2021-10-27 This book examines how rhetorically effective uses of silence and materiality mediate feminist activism and discusses the implications of these dynamics for pedagogy Specifically the text establishes a theoretical foundation for what the author terms psychosocial composing or the metaphorical composing and revising of individual participants and society and the contribution of written and visual texts as an input and output of the relationships between individuals and social culture This idea is examined through primary research on the Clothesline Project an international event that invites people who have experienced gender violence directly or indirectly to decorate tee shirts that get hung on clotheslines in public places Through looking at values and roles of silence in global cultures and the use of material arts in activist efforts the author argues for the unique value of silence and materiality in individual and collective spaces The manuscript includes discussion questions and sample teaching materials Overall making connections among composition and rhetoric psychology sociology politics women s studies art and design pedagogy and history this book further demonstrates the potential interdisciplinary approaches to rhetoric and communication     **Mysticism, Ineffability and Silence in Philosophy of Religion** Laura E. Weed, 2023-01-13 The authors in this volume explore a wide variety of the contemporary approaches to mystical and religious experience to elucidate what religious experience is in its own terms and how its practitioners understand it This anthology features contributions that point out that contemporary studies of consciousness sociology hermeneutics neuroscience medicine and other fields are revealing that there is much more to be said for the inner life of a human s consciousness than reductionists and behaviorists will allow This book is one of very few that primarily takes the stance of academic practitioners explaining their own experience rather than that of academics trying to explain the phenomena away as really politics or sociology or delusion or psychological pathology or literary flights of fancy or an aberration of any of the other academic fields Most of the authors in this volume embrace the task of explaining and analyzing religious experience mysticism and the healing power of silence and presence using the resources of all of the academic disciplines as appropriate The essays contained analyze religious and non religious mystical and profoundly personal experiences across several world

religions and in areas such as art and music as well as in solving personal crises such as family disruption and patriarchal oppression. The authors address the subject matter through analyses of the frequent and destructive failures of language or just noise to capture or express the nuances of the inner life of a person. It is this very ineffability of self that renders the spiritual, emotional, and interior life of individuals beyond cognition and perception of the straightforward sorts embraced by most cognitive disciplines. The contributors come from a variety of cross-disciplinary fields to bring forth the possibilities for an intuitive and creative, rich and growing inner life for a human. This text appeals to students, researchers, and practitioners.

**Survival of Weak Countries in the Face of Globalization** Raffaello Benetti, Raffaello Benetti, 2003 *Accidental Ethnography* Christopher N. Poulos, 2018-08-15 Each family has its secrets, ones that shape family communication and relationships in a way generally unknown to the outsider and often the family itself. Autoethnographers, students of these relationships, confront many silences in their attempts to understand these social worlds. Now issued as a Routledge Education Classic Edition, *Accidental Ethnography* delves into this shadowy world of pain and loss in the hopes of finding productive, ethical avenues for transforming the secret lives of families into powerful narratives of hope. It merges the autoethnographic method with the therapeutic power of storytelling to heal family wounds. A new preface text by the author reflects on the changes in the field of qualitative research and on his own research journey since the publication of the original edition.

**Enfolding Silence** Brett J. Esaki, 2016-05-02 This book demonstrates how Japanese Americans have developed traditions of complex silences to survive historic moments of racial and religious oppression and how they continue to adapt these traditions today. Brett Esaki offers four case studies of Japanese American art, gardening, origami, jazz, and monuments and examines how each artistic practice has responded to a historic moment of oppression. He finds that these artistic silences incorporate and convey obfuscated and hybridized religious ideas from Buddhism, Christianity, Confucianism, Shinto, indigenous religions, and contemporary spirituality. While silence is often thought of as the binary opposite and absence of sound, Esaki offers a theory of non-binary silence that articulates how multidimensional silences are formed and how they function. He argues that non-binary silences have allowed Japanese Americans to disguise, adapt, and innovate religious resources in order to negotiate racism and oppressive ideologies from both the United States and Japan. Drawing from the fields of religious studies, ethnic studies, theology, anthropology, art, music, history, and psychoanalysis, this book highlights the ways in which silence has been used to communicate the complex emotions of historical survival, religious experience, and artistic inspiration.
