Introduction to the Art of Singing by Johann Friedrich Agricola Pier Francesco Tosi, Johann Friedrich Agricola, 1995-05-26 An English translation with commentary of an important first treatise on singing by Agricola **Introduction to the Physics and Psychophysics of Music** Juan G. Roederer, 2012-12-06 VIII book we shall refer a great deal to the discipline of psychophysics which in a broad sense tries to establish in a quantitative form the causal relationship between the physical input from our senses and the psychological sensations and physiological reactions evoked in our mind and body respectively Actually we shall try to

weave a rather close mesh between physics and psychophysics or more precisely psychoacoustics. After all they appear naturally interwoven in music itself not only pitch loudness and timbre are a product of physical and psychoacoustical processes but so are the sensations related to consonance and dissonance tonic dominance trills and ornamentation vibrato phrasing beats tone attack duration and decay rhythm and so on. Many books on physics of music or musical acoustics are readily available. An up to date text is the treatise of John Backus 1969. No book on psychoacoustics is available at the elementary level though. Several review articles on pertinent topics can be found in Tobias 1970 and in Plomp and Smoorenburg 1970. A comprehensive discussion is given in Flanagan's book on speech 1972. And of course there is the classical treatise of von Békésy 1960. A comprehensive up to date analysis of general brain processes can be found in Sommerhoff 1974. Musical psychology is discussed in classical terms in Lundin 1967.

Introduction to Psychology Robert Mearns Yerkes, 1911

An Introduction to Discourse Analysis Malcolm Coulthard, 2014-09-25

The central concern of this book is the analysis of verbal interaction or discourse. This first six chapters report and evaluate major theoretical advances in the description of discourse. The final chapters demonstrate how the findings of discourse analysis can be used to investigate second language teaching and first language acquisition and to analyse literary texts.
