## **Reconstructing Old Age:**

Reconstructing Old Age Chris Phillipson, 1998-10-26 In this timely and authoritative overview on social gerontology and social theory Chris Phillipson outlines the changing contexts and experiences associated with later life as we move into a new century The book critically reviews the different theoretical explanations which attempt to explain these changes Phillipson shows how in late modernity changes to pensions employment and retirement and intergenerational relations are placing doubt on the meaning of growing old He suggests that later life is being reconstructed as a period of potential choice on the one hand but also of risk and danger on the other This book will be essential reading for students and academics in social gerontology as well as for students and academics in sociology social policy and related disciplines interested in the future of an ageing population and the future of social gerontology

**Reconstructing Retirement** David Lain, 2018-01-24 In the United Kingdom retirement programs are being reconstructed to follow the American practice of abolishing mandatory retirement and increasing state pension ages This timely book compares prospects for work and retirement at age sixty five plus in both the United States and the United Kingdom After exploring the shifting logic behind both nations policies policies that increase both the need and opportunities to work past age sixty five David Lain presents an original comparative statistical analysis on the wide range of factors influencing employment at this age from the ability to move between jobs in order to remain employed to changing employment trends He then proposes a series of policies to address these factors across the life course and promote security and autonomy for older people Pathways to employment after sixty five are complex and pressures to work at this age are likely to result in very unequal outcomes This book will play a vital role in creating a more positive more equitable future for late careers and retirement

Reconstructing Postmodernism Jason L. Powell, Tim Owen, 2007 There has been an array of literature on the notion of postmodernism in social science literature in recent years This exciting book focuses on three broad continuities one debunking the central theoretical tenets of postmodernism with reference to identity methodology governance and modernist theory two the book engages with current social issues and events in popular culture for example film professional power masculinity and terrorism three the book also rethinks postmodernism in light of under researched variables of analysis of time and ageing the body biology and choice

**Reconstructing Empedocles' Thought** Chiara Ferella, 2024-02-08 To understand Empedocles thought one must view his work as a unified whole of religion and physics Only a few interpreters however recognise rebirth as a positive doctrine within Empedocles physics and attempt to reconcile its details with the cosmological account This study shows how rebirth underlies Empedocles cosmic system being a structuring principle of his physics It reconstructs the proem to his physical poem and then shows that claims to disembodied existence individual identity and personal survival of death s prove central to his physics that knowledge of the cosmos is the path to escape rebirth that purifications are essential to comprehending the world and changing one s being and that the cosmic cycle with its ethical import is the ideal backdrop for Empedocles

over the last two decades with their particular manifestations in the European context has evoked the feeling of living in exceptional times as captured in the recurrent claim that we live in the age of anxiety. The main aim of this collection is to analyse from a multidisciplinary perspective the causes and consequences of the current dominance of the discourse of fear, anxiety and crisis through the experience of distinct and often interdependent moral panics in twenty first century Europe. With its multidisciplinary approach this volume sheds light on the need to view the interrelationship between different crises and their associated affects as crucial in attaining a more nuanced understanding of the aetiology and effects of the current age of anxiety. This multidisciplinary scrutiny of the interrelationship of twenty first century fears, anxiety and crises signals an original engagement with these complex phenomena in order to make their emergence and profound effects on contemporary society more comprehensible. The timeliness of the thematic focus and the rigorous in depth analyses make this collection relevant to students and academics within the fields of sociology, literary and cultural studies, political science and anthropology as well as to those in European studies and global studies.

Learning to Be Old Margaret Cruikshank, 2013-02-14 Margaret Cruikshank's *Learning to Be Old* examines what it means to grow old in America today. The book questions social myths and fears about aging, sickness and the other social roles of the elderly, the over medicalization of many older people and ageism. In this book Cruikshank proposes alternatives to the ways aging is usually understood in both popular culture and mainstream gerontology. *Learning to Be Old* does not propose the ideas of successful aging or productive aging but more the idea of learning how to age. Featuring new research and analysis, the third edition of *Learning to be Old* demonstrates more thoroughly than the previous editions that aging is socially constructed. Among texts on aging, the book is unique in its clear focus on the differences in aging for women and men as well as for people in different socioeconomic groups. Cruikshank is able to put aging in a broad context that not only focuses on how aging affects women but men as well. Key updates in the third edition include changes in the health care system, changes in how long older Americans are working, especially given the impact of the recession, and new material on the brain and mind/body interconnections. Cruikshank impressively challenges conventional ideas about aging in this third edition of *Learning to be Old*. This will be a must read for everyone interested in new ideas surrounding aging in America today.
