**Reconstructing American Education** Michael B. Katz, 2009-07-01 One of the leading historians of education in the United States here develops a powerful interpretation of the uses of history in educational reform and of the relations among democracy education and the capitalist state Michael Katz discusses the reshaping of American education from three perspectives First is the perspective of history How did American education take shape The second is that of reform What can a historian say about recent criticisms and proposals for improvement The third is that of historiography What drives the politics of educational history Katz shows how the reconstruction of America s educational past can be used as a framework for thinking about current reform Contemporary concepts such as public education institutional structures such as the multiversity and modern organizational forms such as bureaucracy all originated as solutions to problems of public policy The petrification of these historical products which are neither inevitable nor immutable has become Katz maintains one of the mighty obstacles to change The book s central questions are as much ethical and political as they are practical How do we assess the relative importance of efficiency and responsiveness in educational institutions Whom do we really want institutions to serve Are we prepared to alter institutions and policies that contradict fundamental political principles Why have some reform strategies consistently failed On what models should institutions be based Should schools and universities be further assimilated to the marketplace and the state Katz s iconoclastic treatment of these issues vividly and clearly written will be of interest to both specialists and general readers Like his earlier classic *The Irony of Early School Reform* 1968 this book will set a fresh agenda for debate in the field

**Reconstructing the "Uni-versity"** Harvey J. Graff, 2025-09-14 Slogans myths and isolated anecdotes are inadequate substitutes for documented history and contextual understanding Literature on the history of higher education is dominated by ahistorical and contextually ignorant slogans Seldom acknowledged in discussions of the decline or failure of the modern university is 1 how long it has been going on at least since the 1960s and 2 universities own complicity in this long complicated and contradictory process Myths intertwine inseparably with slogans to echo yet another lost cause Our collective as well as individual pasts provide essential lessons if we know how to read and learn from them More complicated is imagining a plausible better future for universities In *Reconstructing the Uni-versity* From the Ashes of the Mega and Multi

versity to the Futures of Higher Education Harvey J Graff bringing experience from over 50 years as a professor provides an accurate history of higher education redefining the issues and terms to establish a new agenda **Second Home** Timothy A. Hacsí, 1997 As Timothy Hacsí shows most children in nineteenth century orphan asylums were half orphans children with one living parent who was unable to provide for them The asylums spread widely and endured because different groups churches ethnic communities charitable organizations fraternal societies and local and state governments could adapt them to their own purposes In the 1890s critics began to argue that asylums were overcrowded and impersonal By 1909 advocates called for aid to destitute mothers and argued that asylums should be a last resort for short term care only Yet orphanages continued to care for most dependent children until the Depression strained asylum budgets and federally funded home care became more widely available Yet some Catholic asylums in particular cared for poor children into the 1950s and 1960s

**No Child Left Behind and the Transformation of Federal Education Policy, 1965-2005** Patrick J. McGuinn, 2006 Education is intimately connected to many of the most important and contentious questions confronting American society from race to jobs to taxes and the competitive pressures of the global economy have only enhanced its significance Elementary and secondary schooling has long been the province of state and local governments but when George W Bush signed into law the No Child Left Behind Act in 2002 it signaled an unprecedented expansion of the federal role in public education This book provides the first balanced in depth analysis of how No Child Left Behind NCLB became law Patrick McGuinn a political scientist with hands on experience in secondary education explains how this happened despite the country's long history of decentralized school governance and the longstanding opposition of both liberals and conservatives to an active reform oriented federal role in schools His book provides the essential political context for understanding NCLB the controversies surrounding its implementation and forthcoming debates over its reauthorization how the struggle to define the federal role in school reform took center stage in debates over the appropriate role of the government in promoting opportunity and social welfare He places the evolution of the federal role in schools within the context of broader institutional ideological and political changes that have swept the nation since the 1965 Elementary and Secondary Education Act chronicles the concerns raised by the 1983 report A Nation at Risk and shows how education became a major campaign issue for both parties in the 1990s McGuinn argues that the emergence of swing issues such as education can facilitate major policy change even as they influence the direction of wider political debates and partisan conflict McGuinn traces the Republican shift from seeking to eliminate the U S Department of Education to embracing federal leadership in school reform then details the negotiations over NCLB the forces that shaped its final provisions and the ways in which the law constitutes a new federal education policy regime against which states have now begun to rebel and that only by understanding the unique dynamics of national education politics will reformers be able to craft a more effective national role in school reform **The Political Education of Democratus** Brian W. Dotts, 2012-03-15 Thomas Paine described the

American Revolution as educative However as examined in Brian W Dotts The Political Education of Democratus Negotiating Civic Virtue during the Early Republic what was learned was neither standardized nor uniform The Federalists for example viewed the revolution as a triumph for representative government but one intended to maintain many remnants of the colonial experience Anti Federalists saw a confirmation of representative government at the state and local levels and considered the revolution as authenticating Montesquieu s theories of republicanism A third more extreme interpretation of the revolution emerged from radical democrats who viewed the revolution as a fundamental break with mainstream thinking about republicanism These radicals helped turn conventional understanding of representative government upside down taking part in unconventional or extra constitutional action during their negotiation of citizen virtue during the 1790s Members of each of the societies took an active part in trying to fulfill their expectations for the new American experiment by contributing to the democratization of republicanism The Political Education of Democratus illuminates the emergence of democratic thought from Aristotle and Machiavelli to more contemporary influences from the British Commonwealth tradition Dotts examines how the radical ideas of Algernon Sidney James Harrington John Milton Joseph Priestley and Thomas Paine develop a rich tapestry among the democratic society s correspondence constitutions resolutions and early media Individual members of the Democratic Republican Societies including Philip Freneau Robert Coram Benjamin Bache George Logan and others energized these radical interpretations of civic republican thought and plunged headlong into party politics educating early Americans about the practical potentialities of democratic action

**Classical Investigation Conducted by the Advisory Committee of the American Classical League ...** American Classical League,1924     *Someone Has to Fail* David F. Labaree,2012-04-02 What do we really want from schools Only everything in all its contradictions Most of all we want access and opportunity for all children but all possible advantages for our own So argues historian David Labaree in this provocative look at the way this archetype of dysfunction works so well at what we want it to do even as it evades what we explicitly ask it to do Ever since the common school movement of the nineteenth century mass schooling has been seen as an essential solution to great social problems Yet as wave after wave of reform movements have shown schools are extremely difficult to change Labaree shows how the very organization of the locally controlled administratively limited school system makes reform difficult At the same time he argues the choices of educational consumers have always overwhelmed top down efforts at school reform Individual families seek to use schools for their own purposes to pursue social opportunity if they need it and to preserve social advantage if they have it In principle we want the best for all children In practice we want the best for our own Provocative unflinching wry *Someone Has to Fail* looks at the way that unintended consequences of consumer choices have created an extraordinarily resilient educational system perpetually expanding perpetually unequal constantly being reformed and never changing much     *The Classical Investigation Conducted by the Advisory Committee of the American Classical League: General report.
