The Reconstruction of Southern Education Gary Orfield,1969 **The Influence of Reconstruction on Education in the South** Edgar Wallace Knight,1913 **The Impact of Civil War and Reconstruction on Southern Public Education, 1865-1920** Victoria Macdonald Huntzinger,1989 *Southern Education as a Phase of Reconstruction* Howland Heyward Paddock,1921 *The Influence of Reconstruction on Education in the South* Edgar Wallace Knight,1969

Schools for All William Preston Vaughn,2021-10-21 Schools for All provides the first in depth study of black education in Southern public schools and universities during the twelve year Reconstruction period which followed the Civil War In the antebellum South the teaching of African Americans was sporadic and usually in contravention to state laws During the war Northern religious and philanthropic organizations initiated efforts to educate slaves The army and later the Freedmen s Bureau became actively involved in freed men s education By 1870 however a shortage of funds for the work forced the bureau to cease its work at which time the states took over control of the African American schools In an extensive study of records from the period William Preston Vaughn traces the development the successes as well as the failures of the early attempts of the states to promote education for African Americans and in some instances to establish integration While public schools in the South were not an innovation of Reconstruction their revitalization and provision to both races were among the most important achievements of the period despite the pressure from whites in most areas which forced the establishment of segregated education Despite the ultimate failure to establish an integrated public school system anywhere in the South many positive achievements were attained Although the idealism of the political Reconstructionists fell short of its immediate goals in the realm of public education precedents were established for integrated schools and the constitutional revisions achieved through the Fourteenth and Fifteenth amendments laid the groundwork for subsequent successful assaults on segregated education Educational Reconstruction Hilary N. Green,2016-04-01 Tracing the first two decades of state funded African American schools Educational Reconstruction addresses the ways in which black Richmonders black Mobilians and their white allies created developed and sustained a system of African American schools following the Civil War Hilary Green proposes a new chronology in understanding postwar African American education examining how urban African Americans demanded quality public schools from their new city and state partners Revealing the significant gains made after the departure of the Freedmen s Bureau this study reevaluates African American higher education in terms of developing a cadre of public school educator activists and highlights the centrality of urban African American protest in shaping educational decisions and policies in their respective cities and states *Building a New Educational State* Joan Malczewski,2016-11-30 Joan Malczewski investigates the relationship in postwar America between northern philanthropies and southern states exploring how education reform did or did not come about and by extension how state and local systems developed in response Highly attuned to foundations limitations in this time Malczewski focuses on the ways that the state as

an actor enabled or inhibited different foundation initiatives She zeroes in on Mississippi and North Carolina which had different objectives and thus had distinct relationships with northern foundations These state responses illuminate the interrelationships among institutions with varying capacities to set agendas or to effect or resist change **Schooling for All** Ira Katznelson, Margaret Weir, 1988-01-01 *Essays in Twentieth-Century Southern Education* Wayne Urban, 2014-03-05 A comprehensive treatment of the defining issues race class reform regarding education in this century of the American South The approaches range from broad based historical comparisons to analyses of select case studies **Contributions to Education** Columbia University. Teachers College, 1913 **Along Freedom Road** David S. Cecelski, 2000-11-09 David Cecelski chronicles one of the most sustained and successful protests of the civil rights movement the 1968 69 school boycott in Hyde County North Carolina For an entire year the county s black citizens refused to send their children to school in protest of a desegregation plan that required closing two historically black schools in their remote coastal community Parents and students held nonviolent protests daily for five months marched twice on the state capitol in Raleigh and drove the Ku Klux Klan out of the county in a massive gunfight The threatened closing of Hyde County s black schools collided with a rich and vibrant educational heritage that had helped to sustain the black community since Reconstruction As other southern school boards routinely closed black schools and displaced their educational leaders Hyde County blacks began to fear that school desegregation was undermining rather than enhancing this legacy This book then is the story of one county s extraordinary struggle for civil rights but at the same time it explores the fight for civil rights in all of eastern North Carolina and the dismantling of black education throughout the South **Republicans and Race** Timothy N. Thurber, 2023-04-14 Skeptics might rationalize that Mitt Romney received a scant 6 percent of the black vote in 2012 only because African Americans would naturally favor one of their own But since 1964 no Republican presidential candidate has attracted more than 15 percent of the black electorate and few GOP candidates for other offices have fared much better No segment of the American electorate is more reliably Democratic than African Americans The GOP meanwhile remains nearly an all white party In this path breaking book historian Timothy Thurber illuminates the deep roots of this gulf by exploring the contentious and sometimes surprising relationship between African Americans and the Republican Party from the end of World War II through Richard Nixon s presidency The GOP he shows shaped the modern civil rights movement but the struggle for racial equality also transformed the GOP Thurber challenges conventional wisdom that the party of Lincoln disappeared in the mid 1960s Prior to 1964 the GOP was indifferent or hostile to many of the demands from civil rights activists During the height of the civil rights revolution Republicans were essential to enacting federal policies that made American society more egalitarian The GOP helped defend and sometimes expanded those reforms in the early 1970s Conservatives were not as dominant after 1964 as scholars and pundits often portray Yet throughout these three decades the rift between African Americans and the GOP remained substantial They disagreed often sharply over the role of the federal

government particularly regarding economic matters and the integration of schools and neighborhoods They had different views about race and American society They also clashed in the political arena where Republicans wrote off the black vote as unwinnable irrelevant or counterproductive to their drive to supplant the Democrats as the nation's majority party The GOP preferred to court whites nationwide sometimes by appealing to their racial animosities That strategy often yielded electoral success but the legacy of the past looms large in the early twenty first century With its depth of research and insight Republicans and Race will stand as a definitive study as the GOP ponders the composition of its base in future elections

The Education of Blacks in the South, 1860-1935 James D. Anderson, 2010-01-27 James Anderson critically reinterprets the history of southern black education from Reconstruction to the Great Depression By placing black schooling within a political cultural and economic context he offers fresh insights into black commitment to education the peculiar significance of Tuskegee Institute and the conflicting goals of various philanthropic groups among other matters Initially ex slaves attempted to create an educational system that would support and extend their emancipation but their children were pushed into a system of industrial education that presupposed black political and economic subordination This conception of education and social order supported by northern industrial philanthropists some black educators and most southern school officials conflicted with the aspirations of ex slaves and their descendants resulting at the turn of the century in a bitter national debate over the purposes of black education Because blacks lacked economic and political power white elites were able to control the structure and content of black elementary secondary normal and college education during the first third of the twentieth century Nonetheless blacks persisted in their struggle to develop an educational system in accordance with their own needs and desires

The Two Reconstructions Richard M. Valelly, 2009-10-02 Winner of the 2005 J David Greenstone Book Award from the Politics and History section of the American Political Science Association Winner of the 2005 Ralph J Bunche Award of the American Political Science Association Winner of the 2005 V O Key Jr Award of the Southern Political Science Association The Reconstruction era marked a huge political leap for African Americans who rapidly went from the status of slaves to voters and officeholders Yet this hard won progress lasted only a few decades Ultimately a second reconstruction associated with the civil rights movement and the Voting Rights Act became necessary How did the first reconstruction fail so utterly setting the stage for the complete disenfranchisement of Southern black voters and why did the second succeed These are among the questions Richard M Valelly answers in this fascinating history The fate of black enfranchisement he argues has been closely intertwined with the strengths and constraints of our political institutions Valelly shows how effective biracial coalitions have been the key to success and incisively traces how and why political parties and the national courts either rewarded or discouraged the formation of coalitions Revamping our understanding of American race relations The Two Reconstructions brilliantly explains a puzzle that lies at the heart of America's development as a political democracy
