**Lash-Up** Larry Bond, 2024-06-04 The New York Times bestselling author puts a fresh spin on a near future war between the US and China in this military technothriller. Publishers Weekly: In a bid to dominate Asia and the western Pacific, China provokes a military crisis with the United States and then starts shooting down GPS satellites. America must suddenly devise a plan to protect its remaining satellites before China achieves an enormous advantage in the coming conflict. The satellites can only be protected from orbit so an armed spacecraft must be quickly designed, built, and launched to fight on this new battlefield. With the fate of the United States resting on their shoulders, a team of soldier-scientists must construct a craft capable of knocking space weapons out of the sky and enter the ultimate trial by fire.

**Information Warfare** Daniel Ventre, 2016-02-15 Cyberspace is one of the major bases of the economic development of industrialized societies and developing. The dependence of modern society in this technological area is also one of its vulnerabilities. Cyberspace allows new power policy and strategy, broadens the scope of the actors of the conflict by offering to both state and non-state new weapons, new ways of offensive and defensive operations. This book deals with the concept of information war, covering its development over the last two decades and seeks to answer the following questions: is the control of the information space really possible, remains or is it a utopia? What power would confer such control, what are the benefits?

Trading with the Enemy Hugo Meijer, 2016-02-02 In light of the intertwining logics of military competition and economic interdependence at play in US-China relations, *Trading with the Enemy* examines how the United States has balanced its potentially conflicting national security and economic interests in its relationship with the People's Republic of China (PRC). To do so, Hugo Meijer investigates a strategically sensitive yet under-explored facet of US-China relations: the making of American export control policy on military-related technology transfers to China since 1979. *Trading with the Enemy* is the first monograph on this dimension of the US-China relationship in the post-Cold War. Based on 199 interviews, declassified documents, and diplomatic cables leaked by Wikileaks, two major findings emerge from this book. First, the US is no longer able to apply a strategy of military technology containment of China in the same way it did with the Soviet Union during the Cold War. This is because of the erosion of its capacity to restrict the transfer of military-related technology to the PRC. Secondly, a growing number of actors in Washington have reassessed the nexus between national security and economic interests at stake in the US-China relationship by moving beyond the Cold War trade-off between the two in order to maintain American military preeminence vis-à-vis its strategic rivals. By focusing on how states manage the

heterogeneous and potentially competing security and economic interests at stake in a bilateral relationship this book seeks to shed light on the evolving character of interstate rivalry in a globalized economy where rivals in the military realm are also economically interdependent      *Arctic Gambit* Larry Bond,2018-05-29 Jerry Mitchell returns in Arctic Gambit an explosive military thriller by New York Times bestselling author Larry Bond Jerry Mitchell now the commodore of submarine Development Squadron Five is dismayed when USS Toledo is reported missing in Arctic waters close to Russian territory The vessel is captained by his former shipmate and close friend Lenny Berg Eager to investigate Jerry convinces the Navy to redirect one of his squadron s boats to find out what happened It turns out Toledo was sunk just outside of Russian territorial waters by a torpedo launched from a naval mine Even more disturbing is the discovery that Russia is building a deadly weapon Engineers have modified the STATUS 6 a strategic nuclear propelled nuclear armed torpedo that is already operational into a stealthy first strike weapon Drakon This new tool would allow the Russians to launch a completely covert nuclear decapitation strike on the USA The new Russian president has plans for Europe and is more than willing to use nuclear blackmail or an actual attack to keep the Americans from interfering To avoid a Russian war in Europe and a nuclear catastrophe at home Mitchell must find a way to destroy the Drakon launcher before it s too late At the Publisher s request this title is being sold without Digital Rights Management Software DRM applied      **Shattered Trident** Larry Bond,2013-05-07 Witnessing a torpedo attack on a Vietnamese merchant ship by a Chinese nuclear sub USS North Dakota captain Jerry Mitchell helps to forge a tenuous new alliance with Western Pacific nations in a covert submarine campaign aimed at crippling China s economy and preventing a full scale war      Compilation of Hearings Held Before the U.S.-China Security Review Commission U.S.-China Security Review Commission,2002
