Red Earth Revolution In A Chinese Village:

Red Earth Stephen Lyon Endicott, 1989 *Gao Village* Mobo C. F. Gao, 1999-01-01 This book is about Gao Village in Jiangxi province where the author was born and brought up leaving when he was twenty one to study English at Xiamen University Since emigrating to Australia in 1990 he has returned every year to Gao Village where his brother still lives Several accounts of village life in China have been published but all have been by Western or urban Chinese scholars Mobo Gao's account is in every sense one from the inside Though written as an academic work it does not eschew personal stories and experiences relevant to the themes addressed These cover a forty year period and fall into four distinct themes the village before and after land reform the commune system the dismantling of the communes and the unfolding impact of the market economy including increased migration to urban areas from the late 1980s onwards *Village Governance in North China* Huaiyin Li, 2005-03-09 This book is about village governance in China during the late nineteenth and early twentieth centuries Drawing on government archives from Huailu county Hebei province it explores local practices and official systems of social control land taxation and self government at the village level Its analysis of peasant behaviors bridges the gap between the rational choice and moral economy models by taking into account both material and symbolic dimensions of power and interest in the peasant community The author's interpretation of village state relations before 1900 transcends the state and society dichotomy and accentuates the interplay between formal and informal institutions and practices His account of state making after 1900 underscores the continuity of endogenous arrangements in the course of institutional formalization and the interpenetration between official discourse and popular notions in the new process of political legitimization **The Transformation of Rural China** Jonathan Unger, 2016-09-16 During the past quarter century Jonathan Unger has interviewed farmers and rural officials from various parts of China in order to track the extraordinary changes that have swept the countryside from the Maoist era through the Deng era to the present day A leading specialist on rural China Professor Unger presents a vivid picture of life in rural areas during the Maoist revolution and then after the post Mao disbandment of the collectives This is a story of unexpected continuities amidst enormous change Unger describes how rural administrations retain Mao era characteristics despite the major shifts that have occurred in the economic and social hierarchies of villages as collectivization and class struggle gave way to the slogan to get rich is glorious A chapter explores the private entrepreneurship that has blossomed in the prosperous parts of the countryside Another focuses on the tensions and exploitation that have arisen as vast numbers of migrant laborers from poor districts have poured into richer ones Another based on five months of travel by jeep into impoverished villages in the interior describes the dilemmas of under development still faced by many tens of millions of farmers and the ways in which government policies have inadvertently hurt their livelihoods **Power over Property** Matthew Noellert, 2020-10-13 Following the end of World War II in 1945 the Chinese Communist Party CCP spent the next three decades carrying out agrarian reform among nearly one third of the

world's peasants This book presents a new perspective on the first step of this reform when the CCP helped redistribute over 40 million hectares of land to over three hundred million impoverished peasants in the nationwide land reform movement This land reform the founding myth of the People's Republic of China 1949 present and one of the largest redistributions of wealth and power in history embodies the idea that an equal distribution of property will lead to social and political equality Power Over Property argues that in practice however the opposite occurred the redistribution of political power led to a more equal distribution of property China's land reform was accomplished not only through the state's power to define the distribution of resources but also through village communities prioritizing political entitlements above property rights Through the systematic analysis of never before studied micro level data on practices of land reform in over five hundred villages Power Over Property demonstrates how land reform primarily involved the removal of former power holders the mobilization of mass political participation and the creation of a new social political hierarchy Only after accomplishing all of this was it possible to redistribute land This redistribution moreover was determined by political relations to a new structure of power not just economic relations to the means of production The experience of China's land reform complicates our understanding of the relations between economic social and political equality On the one hand social equality in China was achieved through political not economic means On the other hand the fundamental solution was a more effective hierarchy of fair entitlements not equal rights This book ultimately suggests that focusing on economic equality alone may obscure more important social and political dynamics in the development of the modern world

China During the Cultural Revolution, 1966-1976 Tony H. Chang, 1999-01-30 One of the most tumultuous periods in modern Chinese history the Cultural Revolution affected virtually all Chinese people and all aspects of Chinese life including art music and drama education factory management economic planning and medical care Studies of the Cultural Revolution in both Chinese and Western languages have burgeoned over the past three decades This comprehensive easy to use bibliography provides a guide to published English language sources on the Cultural Revolution With over a thousand entries it includes books monographs dissertations and audio visual materials on a broad range of topics from the military education religion and economics to foreign relations population art literature and drama Including titles published through the end of 1997 and a few in 1998 the book provides a general overview of the literature on the Chinese Cultural Revolution and its impact on China Its scope and coverage make it a useful resource for any library whose readers have an interest in modern Chinese history

Mao S.G. Breslin, 2014-06-17 A lucid analysis of Mao as revolutionary general ideologist and astute political manipulator this introduction to the life and career of Mao Zedong provides an excellent introduction to modern Chinese history and its enigmatic protagonist

The Battle For China's Past Mobo Gao, 2008-02-20 Shows that the Mao era was beneficial for most Chinese citizens A powerful mixture of political passion and original research a brave polemic against the fashionable view on China Aims a knockout blow at Jung Chang's recent book on Mao which Bush and the conservatives rave

reviewed Gregor Benton Professor of Chinese History University of Cardiff This important book opens a much needed window onto Chinese perceptions of the country's post Mao direction Highlights the renewal of popular support for socialism and the growing opposition to contemporary state policies Martin Hart Landsberg Professor of Economics Lewis Clark College Portland Oregon Mao and his policies have long been demonised in the West with the Cultural Revolution considered a fundamental violation of human rights As China embraces capitalism the Mao era is being surgically denigrated by the Chinese political and intellectual elite This book tackles the extremely negative depiction of China under Mao in recent publications and argues most people in China including the rural poor and the urban working class actually benefited from Mao's policy of a comprehensive welfare system for the urban and basic health and education provision for the rural which is being reversed in the current rush towards capitalism By a critical analysis of the mainstream account of the Mao era and the Cultural Revolution and by revealing what is offered in the unofficial e media debates this book sets the record straight making a convincing argument for the positive effects of Mao's policies on the well being of the Chinese people The Making of Anthropology in East and Southeast Asia Shinji Yamashita, Joseph Bosco, Jeremy Seymour Eades, 2004 In a path breaking series of essays the contributors to this collection explore the development of anthropological research in Asia The volume includes writings on Japan China Taiwan Korea Malaysia and the Philippines *Mao Zedong and Contemporary China* Katsuji Nakagane, 2024-05-11 What did Mao Zedong bring to China Mao Zedong a rare leader who is still regarded as a great hero on the Chinese continent despite the large number of victims caused by the Great Leap Forward and the Cultural Revolution He called himself Qin Shi Huang First Emperor of Qin plus Marx It can be said that he is an entity that combines the power of the emperor and the authority of Marx into one person This book analyzes the features of Mao Zedong's thought and philosophy his understanding of Marxism and class struggle in particular his peculiar attitude toward intellectuals his actions leading to the Great Leap Forward and the Cultural Revolution which he initiated and involved the entire nation as well as the analysis of the mechanisms that caused such catastrophes and tragedies Finally through these analyses this book attempts to evaluate Mao Zedong with diverse personalities and his behavior positive and negative whether in political social economic or philosophical areas *Calamity and Reform in China* Dali L. Yang, 1996 This is the first book length treatment of the political causes and consequences of the Great Leap Famine 1959-61 one of the worst tragedies in human history Collective Villages in the Chinese Market Dev Nathan, Govind Kelkar, 2000-04 The growth of the Chinese economy in the last decade or so has attracted a lot of analytical attention This report addresses the functioning of collectives in a market system specifically the village of Nanjie in Henan Province which had recollectivized and the village of Liuminying near Beijing which had never decollectivized The authors briefly introduce these villages as well as Hanchunhe also near Beijing and Huaxi in Jiangsu Province and their history and then analyze various aspects of the functioning of collective villages in the Chinese market Chapters org and mgmt wage and labor system welfare and benefits gender roles

and relations the corp village Politics in China Since 1949 Robert Weatherley, 2007-01-24 Since the victory of the 1949 revolution the incumbency of the Chinese Communist Party has been characterized by an almost relentless struggle to legitimize its monopoly on political power During the Mao era attempts to derive legitimacy focused primarily on mass participation in political affairs a blend of Marxist and nationalist ideology and the charismatic authority of Mao Zedong The dramatic failure of the Cultural Revolution forced the post Mao leadership to discard these discredited paradigms of legitimacy and move towards an almost exclusively performance based concept founded on market economic reform The reforms during the 1980s generated a number of unwelcome but inevitable side effects such as official corruption high unemployment and significant socio economic inequality These factors culminated ultimately in the 1989 demonstrations in Tiananmen Square and throughout China Since Tiananmen the party has sought to diversify the basis of its legitimacy by adhering more closely to constitutional procedures in decision making and to a certain extent by reinventing itself as a conservative nationalist party This probing study of post communist revolution Chinese politics sets out to discover if there is a plausible alternative to the electoral mode or if legitimacy is the exclusive domain of the multi party system Reading with a Difference Arthur F. Marotti, 1993 Reading with a Difference is a collection of eighteen essays that examines how issues of gender race and cultural identity inform texts from the seventeenth century to the present Together the contributions document recent significant shifts occurring in the theoretical approach to the texts they study and illustrate how shifts in each of these categories affect how the others are viewed The first section of this anthology explores the notion that identity particularly gender identity is a cultural construct The essays in the second section consider ways in which race and gender intersect with cultural identity and how encounters between different cultures challenge any identity constructed in isolation First published in the journal Criticism these essays offer no blueprint for reading Instead they encourage a rereading of canonical texts and a questioning of how these texts face matters of gender race and cultural identity how they respond to the differences and the incongruities within the cultures from which they arise and to which they speak BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved The Red Flag David Priestland, 2016-05-03 The best and the most accessible one volume history of communism now available A far reaching vividly written account Foreign Affairs In The Red Flag Oxford professor David Priestland tells the epic story of a movement that has taken root in dozens of countries across two hundred years from its birth after the French Revolution to its ideological maturity in nineteenth century Germany to its rise to dominance and subsequent fall in the twentieth century Beginning with the first modern Communists in the age of Robespierre Priestland examines the motives of thinkers and leaders including Marx Engels Lenin Stalin Castro Che Guevara Mao Ho Chi Minh Gorbachev and many others Priestland also shows how Communism in all its varieties appealed to different societies for different reasons in some as a response to inequalities and in others more out of a desire to catch up with the West But paradoxically while destroying one web of

inequality Communist leaders were simultaneously weaving another It was this dynamic together with widespread economic failure and an escalating loss of faith in the system that ultimately destroyed Soviet Communism itself At a time when global capitalism is in crisis and powerful new political forces have arisen to confront Western democracy The Red Flag is essential reading if we are to apply the lessons of the past to navigating the future Detailed and scholarly but written in lively prose this is a rich satisfying account of the most successful utopian political movement in history Publishers Weekly starred review

Forthcoming Books Rose Arny,1990 **Rise of the Red Engineers** Joel Andreas,2009-03-10 Rise of the Red Engineers explains the tumultuous origins of the class of technocratic officials who rule China today In a fascinating account author Joel Andreas chronicles how two mutually hostile groups the poorly educated peasant revolutionaries who seized power in 1949 and China s old educated elite coalesced to form a new dominant class After dispossessing the country s propertied classes Mao and the Communist Party took radical measures to eliminate class distinctions based on education aggravating antagonisms between the new political and old cultural elites Ultimately however Mao s attacks on both groups during the Cultural Revolution spurred inter elite unity paving the way after his death for the consolidation of a new class that combined their political and cultural resources This story is told through a case study of Tsinghua University which as China s premier school of technology was at the epicenter of these conflicts and became the party s preferred training ground for technocrats including many of China s current leaders
