Regimes Of Description In The Archive Of The Eighteenth Century:

Regimes of Description John B. Bender, Michael Marrinan, 2005 *Regimes of Description* responds to the perception however imprecise that forms of knowledge in every sector of contemporary culture are being fundamentally reshaped by the digital revolution music speech engineering diagrams weather reports works of visual art even the words most of us write are now subject as Lyotard points out in *The Inhuman* to a logic of the bit the elemental unit of electronic information It is now possible to slice graft and splice this knowledge in ways never before imagined using technologies that treat vast bodies of information as a stream of data bits Programs and technical algorithms specify the criteria for discriminating between the data stream of a Mozart string quartet and the CAT scan of a diseased organ But are these machine instructions and design parameters descriptions or merely mechanical filters And if the latter what constitutes a description of digitally encoded knowledge As a group the essays in this volume pose that question as a first attempt to write the archaeology of the nature and history of description in the digital age

The Oxford Handbook of Eighteenth-Century Satire Paddy Bullard, 2019-07-30 Eighteenth century Britain thought of itself as a polite sentimental enlightened place but often its literature belied this self image This was an age of satire and the century's novels poems plays and prints resound with mockery and laughter with cruelty and wit The street level invective of Grub Street pamphleteers is full of satire and the same accents of raillery echo through the high scepticism of the period's philosophers and poets many of whom were part time pamphleteers themselves The novel a genre that emerged during the eighteenth century was from the beginning shot through with satirical colours borrowed from popular romances and scandal sheets This Handbook is a guide to the different kinds of satire written in English during the long eighteenth century It focuses on texts that appeared between the restoration of the Stuart monarchy in 1660 and the outbreak of the French Revolution in 1789 Outlier chapters extend the story back to first decade of the seventeenth century and forward to the second decade of the nineteenth The scope of the volume is not confined by genre however So prevalent was the satirical mode in writing of the age that this book serves as a broad and characteristic survey of its literature The Oxford Handbook of Eighteenth Century Satire reflects developments in historical criticism of eighteenth century writing over the last two decades and provides a forum in which the widening diversity of literary intellectual and socio historical approaches to the period's texts can come together

Mariette and the Science of the Connoisseur in Eighteenth-Century Europe Kristel Smentek, 2017-07-05 Celebrated connoisseur drawings collector print dealer book publisher and authority on the art of antiquity Pierre Jean Mariette 1694 1774 was a pivotal figure in the eighteenth century European art world Focusing on the trajectory of Mariette's career this book examines the material practices and social networks through which connoisseurs forged the idea of art as an object of empirical and historical analysis Drawing on significant unpublished archival material as well as on histories of science publishing collecting and display this book shows how Mariette and his colleagues practices of classification and interpretation of the graphic arts gave

rise to new conceptions of artistic authorship and to a history of art that transcended the biographies of individual artists To follow Mariette's career through the eighteenth century is to see that art was consolidated as a specialized category of intellectual inquiry and that style emerged as its structuring analytic device in the overlapping spaces of the collector's cabinet, the connoisseur's portfolio and the dealer's shop

Air's Appearance Jayne Elizabeth Lewis, 2024-05-31 In *Air's Appearance* Jayne Elizabeth Lewis enlists her readers in pursuit of the elusive concept of atmosphere in literary works She shows how diverse conceptions of air in the eighteenth century converged in British fiction producing the modern literary sense of atmosphere and moving novelists to explore the threshold between material and immaterial worlds *Air's Appearance* links the emergence of literary atmosphere to changing ideas about air and the earth's atmosphere in natural philosophy as well as to the era's theories of the supernatural and fascination with social manners or as they are now known airs Lewis thus offers a striking new interpretation of several standard features of the Enlightenment: the scientific revolution, the decline of magic, character-based sociability and the rise of the novel that considers them in terms of the romance of air that permeates and connects them As it explores key episodes in the history of natural philosophy and in major literary works like *Paradise Lost*, *The Rape of the Lock*, *Robinson Crusoe* and *The Mysteries of Udolpho*, this book promises to change the atmosphere of eighteenth century studies and the history of the novel

Human Empire Ted McCormick, 2022-04-21 Shows how modern demographic thought began not with counting individuals but with manipulating marginalized and colonized groups

Companion to the History of the Book Simon Eliot, Jonathan Rose, 2019-08-15 The celebrated text on the history of the book completely revised, updated and expanded The revised and updated edition of *The Companion to the History of the Book* offers a global survey of the book's history through print and electronic text Already well established as a standard survey of the historiography of the book, this new expanded edition draws on a decade of advanced scholarship to present current research on paper, printing, binding, scientific publishing, the history of maps, music and print, the profession of authorship and lexicography The text explores the many approaches to the book from the early clay tablets of Sumer, Assyria and Babylonia to today's burgeoning electronic devices The expert contributions delve into such fascinating topics as archives and paperwork and present new chapters on Arabic script, the Slavic, Canadian, African and Australasian book, new textual technologies and much more Containing a wealth of illustrative examples and case studies to dramatize the exciting history of the book, the text is designed for academics, students and anyone interested in the subject

The Cambridge Companion to the French Enlightenment Daniel Brewer, 2014-10-27 The Enlightenment has long been seen as synonymous with the beginnings of modern Western intellectual and political culture As a set of ideas and a social movement, this historical moment, the age of reason of the seventeenth and eighteenth century, is marked by attempts to place knowledge on new foundations *The Cambridge Companion to the French Enlightenment* brings together essays by leading scholars representing disciplines ranging from philosophy, religion and literature to art, medicine, anthropology and

architecture to analyse the French Enlightenment Each essay presents a concise view of an important aspect of the French Enlightenment discussing its defining characteristics internal dynamics and historical transformations The Companion discusses the most influential reinterpretations of the Enlightenment that have taken place during the last two decades reinterpretations that both reflect and have contributed to important re evaluations of received ideas about the

Enlightenment and the early modern period more generally **The Unfinished Enlightenment** Joanna

Stalnaker,2011-05-02 In *The Unfinished Enlightenment* Joanna Stalnaker offers a fresh look at the French Enlightenment by focusing on the era's vast collective attempt to compile an ongoing and provisional description of the world Through a series of readings of natural histories encyclopedias scientific poetry and urban topographies the book uncovers the deep epistemological and literary tensions that made description a central preoccupation for authors such as Buffon Bernardin de Saint Pierre Diderot Delille and Mercier Stalnaker argues that Enlightenment description was the site of competing truth claims that would eventually resolve themselves in the modern polarity between literature and science By the mid nineteenth century the now habitual association between description and the novel was already firmly anchored in French culture but just a century earlier in the diverse network of articles on description in Diderot and d'Alembert's *Encyclopédie* and in the works derived from it there was not a single mention of the novel Instead we find articles on description in natural history geometry belles lettres and poetry Stalnaker builds on the premise that the tendency to view description as the inevitable and subservient partner of narration rather than as a universal tool for making sense of knowledge in all fields has obscured the central place of description in Enlightenment discourse As a result we have neglected some of the most original and experimental works of the eighteenth century **Releasing the Image** Jacques Khalip,Robert Mitchell,2011-08-09

From painting to poetry to new media technologies this book theorizes the image beyond the logic of representationalism and provokes new ways of engaging topics of embodiment agency history and technology *Infowhelm* Heather

Houser,2020-06-16 How do artists and writers engage with environmental knowledge in the face of overwhelming information about catastrophe What kinds of knowledge do the arts produce when addressing climate change extinction and other environmental emergencies What happens to scientific data when it becomes art In *Infowhelm* Heather Houser explores the ways contemporary art manages environmental knowledge in an age of climate crisis and information overload Houser argues that the *infowhelm* a state of abundant yet contested scientific information is an unexpectedly resonant resource for environmental artists seeking to go beyond communicating stories about crises *Infowhelm* analyzes how artists transform the techniques of the sciences into aesthetic material repurposing data on everything from butterfly migration to oil spills and experimenting with data collection classification and remote sensing Houser traces how artists ranging from novelist Barbara Kingsolver to digital memorialist Maya Lin rework knowledge traditions native to the sciences entangling data with embodiment quantification with speculation precision with ambiguity and observation with feeling Their works

provide new ways of understanding environmental change while also questioning traditional distinctions between types of knowledge Bridging the environmental humanities digital media studies and science and technology studies this timely book reveals the importance of artistic medium and form to understanding environmental issues and challenges our assumptions about how people arrive at and respond to environmental knowledge
