High-Grade Gliomas Gene H. Barnett, 2007-11-21 This is truly an exciting time in the field of neuro oncology particularly in the area of high grade gliomas The management of patients with high grade gliomas has historically been one of the most challenging and disheartening fields in medicine where failure is the rule and longevity is the exception The jaded often state that despite purported advances in surgical and radiotherapeutic techniques and a myriad of clinical trials of medical therapies the survival statistics for glioblastoma have not changed in the last three decades The nihilism associated with these tumors is such that some practitioners still advise against treatment or even biopsy recommending palliative care with the diagnosis based only on history and an MRI scan If the current state of the art in the diagnosis and management of high grade gliomas was truly so bleak there would be no reason to compile and publish a monograph on the subject The fact is that we have recently entered an era where real progress is being made in our understanding and treatment of high grade gliomas that is directly benefiting some patients We are slowly but surely chipping away at this problem One approach has exploited correlations between particular molecular markers and therapeutic response The first such breakthrough in high grade glioma was the observation that loss of chromosomes 1p and 19q uniformly predict chemosensitivity in anaplastic oligodendrogliomas 1

Treatment of Acute Leukemias Ching-Hon Pui, 2002-11-14 In *Treatment of Acute Leukemias* international experts not only review the state of the art in managing children and adults with acute leukemia but also debate the pros and cons of current controversial and problematic issues The book summarizes the best diagnostic and treatment practices for acute leukemias in children adolescents and adults Among the therapies discussed are methotrexate asparaginase antipurines epipodophyllotoxins hematopoietic stem cell transplantation hematopoietic growth factors and immunotherapy
