Regional Development In Greece:

Regional Development in Greece Nikolaos Konsolas, A. Papadaskalopoulos, I. Plaskovitis, 2002-01-11 This book is based on the Regional Section of the Development Plan 2000 2006 prepared by the Regional Development Institute according to the Greek Ministry of National Economy's directions and available data. The different development proposals coming from the Country's Regions were also taken into account. The information contained in the Regional Development Institute's database and the conclusions of the studies made by the Institute's collaborators were also used. The thematic maps in this edition were also produced by the Regional Development Institute's GIS Geographical Information System laboratory. The Development Plan 2000 2006 was submitted by the Ministry of National Economy to the European Union in September 1999 and represents the basis for the 3rd Community Support Framework's acceptance. The book is organized into four parts. Part one contains six chapters reflecting the evolution of the Greek and European Regional Policy as well as the trends for the coming period. More specifically the first part refers to the Greek Regional Policy of the 1950 1985 period, the EEC Regional Policy, the twenty years of Operational Programme 1986 2006, the evolution of the main objectives and priorities for this period, the evolution of means and processes and the new trends in Regional Policy and Planning. In the second part the basic figures and trends of Regional Development in Greece are analysed. Specifically we refer here to the population concentration, the regional distribution of GDP, the employment and unemployment rates and the sector specialisation.

Regional Analysis and Policy Harry Coccossis, Yannis Psycharis, 2009-08-29 Regional development is attracting the attention of policy makers and scientists again as regions, urban centers and rural areas experience substantial pressures particularly in Europe as a consequence of globalization and geopolitical changes which lead to changes in spatial structures and dynamics. This book is based on the contributions of Greek regional science research presented at the 2006 Congress of the European Regional Science Association at Volos, Greece. The contributions selected to be presented in this book address these changes, offering a fresh look into regional development. They provide an overview of regional development concerns from Greek regional scientists but the issues discussed pervade Greek particularities and stimulate thinking about regional science, regional development and regional policy in the early twenty-first century. **Agriculture and Regional**

Development in Greece Dimitrios Kyrkilis, Simeon Semasis, 2012 This paper attempts to explore the effects of post-war economic development model followed in Greece. The model is characterized by both the neglect of Greek agriculture and the emphasis on industrialization mainly around the two major cities, Athens and Thessaloniki. The model has to develop a strong industrial sector but to inflate services and it devastated agriculture. At the regional level the uneven growth path that has been adopted perpetuated between urban and tourist areas on the one hand and the rural regions on the other. **Regional Analysis and Policy** Harry Coccossis, Yannis Psycharis, 2008-08-02 Regional development is attracting the attention of policy makers and scientists again as regions, urban centers and rural areas experience substantial pressures particularly in Europe
