Register Of International Rivers:

Register of International Rivers Sam Stuart, 2013-09-03 Register of International Rivers comprises international river and lake basins that form a substantial portion of the earth's water resources available for human use and consumption. This Register is prepared by the United Nations Department of Economic and Social Affairs for sessions of the Economic and Social Council's Committee on Natural Resources. This book is divided into seven sections that comprise separate river basins communicating directly with the final recipient of the water including oceans, closed inland seas and lakes. It includes all the world's separate basins shared by two or more countries and in some cases most of the basin area is confined to one country and only a small part of it extends to one or more countries. All data are organized according to five major continental divisions: Africa, North and Central America, South America, Asia and Europe. Two categories of tables are prepared for each major continental subdivision. One is a list of countries sharing river basins with other countries while the other is a list of rivers and lakes forming international boundaries and showing the approximate length of the boundary waters. **Register of International Rivers** United Nations Staff, 1978-07 *REGISTER OF INTERNATIONAL RIVERS*. Centre for Natural Resources, Energy, and Transport (United Nations), Conflict and Cooperation on South Asia's International Rivers Salman M. A. Salman, Kishor Upreti, 2002 Conflict and Cooperation on South Asia's International Rivers traces the development of international water law. This book focuses on the hydro-politics of four countries in the South Asia region: Bangladesh, India, Nepal and Pakistan. It analyzes the problems that these countries have encountered as riparians of international rivers and how they have addressed these problems. In particular, this study reviews the treaty regimes governing the Indus River basin, the Ganges River basin and the Kosi, Gandaki and Mahakali river basins. Each of these regimes is described in depth with special attention devoted to the main problems each of these treaties sought to address. The authors also review the treaty experience and offer observations on bilateralism and multilateralism. **Register of International River Basins** United Nations. Secretary-General, 1977 **Register of International Rivers** United Nations. Dept. of Economic and Social Affairs. Centre For Natural Resource, Energy and Transport, 1978 **Governing International Rivers** Tun Myint, 2012-01-01 Employing a sophisticated understanding of the interplay between states and nonstate actors, Tun Myint develops a convincing account of the evolution of governance systems for the Rhine and Mekong river basins. In the process, he not only adds to our knowledge of water management at the international level but also deepens our appreciation of the various roles that nonstate actors play in international environmental governance. Oran Young, University of California, Santa Barbara. US Comparative studies of great river systems and the politics of their regulation are rare. Far rarer still are comparisons of this historical depth, analytical sophistication, attention to local detail and to the contingencies that make breakthroughs possible. Tun Myint's study of the Rhine and Mekong will inspire and inform future studies of both river and environmental politics. James C. Scott, Yale University, US. This is a must read for

scholars and water governance practitioners as it addresses the underexploited role of non state actors and local citizens in the field of international water governance The book fills in this knowledge gap by offering an inspiring refinement of the theory of polycentricity Evidence is found by well written and attractive in depth case studies dealing with the international clean up of the Rhine and the construction of the Pak Mun Dam in the Mekong basin Carel Dieperink Utrecht University The Netherlands This superb analysis of water governance in the Rhine and Mekong river basins should be read by everyone interested in the challenges of international water management Thomas Bernauer Swiss Federal Institute of Technology ETH Zurich Switzerland This important book employs the theory of polycentricity a system with several centres as an analytical concept to explain the multilayered international environmental governance of river basins It introduces a new methodological framework to deconstruct and investigate the dynamics of citizens states and non state actors in world politics via the context of river basin governance The methodology is tested through in depth field based case studies illustrating how local citizens and industries in the Mekong and Rhine river basins participate in transnational environmental governance at both local and international levels Tun Myint expertly presents both a methodology and theory to conceive polycentricity of world politics as a major intellectual milestone in theorizing world politics Providing nuanced details of cases showing the challenges and feasibilities of incorporating multiple actors into a governance framework the book provides careful analysis into the power of non state actors This book will prove insightful for scholars and postgraduate students in international relations international development global environmental governance and international business administration It will also prove an invaluable resource for practitioners and policymakers *River Basin Organizations in Water Diplomacy* Anoulak Kittikhoun, Susanne Schmeier, 2020-11-19 Will tensions and disputes among states sharing international water courses and lakes turn into active conflicts Addressing this question the book shows that these concerns are more prominent due to the locations and underlying political dynamics of some of these large rivers and the strategic interests of major powers Written by a combination of leading practitioners and academics this book shows that states are more prone to cooperate and manage their transboundary issues over the use of their common water resources through peaceful means and the key institutions they employ are international river basin organizations RBOs Far from being mere technical institutions RBOs are key mechanisms of water diplomacy with capacity and effectiveness varying on four key interrelated factors their legal and institutional development and the influence of their technical and strategic resources The basins analyzed span all continents from both developed and developing basins including the Columbia Great Lakes Colorado Senegal Niger Nile Congo Jordan Helmand Aral Sea Mekong Danube and Rhine Contributing to the academic discourse on transboundary water management and water conflict and cooperation the book provides insights to policy makers on which water diplomacy engagements can be successful the strengths to build on and the pitfalls to avoid so that shared water resources are managed in a cooperative sustainable and stable way Managing Water Conflict Ashok Swain, 2004-06

Water scarcity and the use of international river system resources can not only cause international conflict but can also bring about peace and co operation This book looks at the current stresses and likely future scenarios **Rivers of Fire** Arnon Soffer, Murray Rosovsky, Nina Copaken, 1999-02-24 In a never ending battle to match population growth with food and energy production the countries of the Middle East have been frenziedly developing water resources including international rivers and groundwater without considering their neighbors needs The inevitable result has been more frequent and increasingly bitter conflicts At the same time a halting Arab Israeli peace process spurred by the collapse of the Soviet Union continues Are we indeed entering a new era in a new Middle East Do the region s leaders understand that reality has changed and that a transition is inevitable Focusing on international rivers and ground water in the region this timely study provides thoughtful_if pessimistic_answers to these questions Encompassing all water sources in the Middle East Arnon Soffer thoroughly explores the Nile Tigris Euphrates Jordan Orontes and Litani Rivers as well as international groundwater He also weighs the implications of going to war over water and such unconventional solutions to the water shortage as desalination and importation
