Regulation And Market Access:

The Regulation of Services and Intellectual Property Bryan C. Mercurio, 2017-07-05 International rules on trade in services and intellectual property are new additions to the multilateral trading system but both have played an important role in the system since their entry. Accompanied by a detailed introduction, this volume contains essays which cover not only the law and jurisprudence of these topics but also the underlying economics and politics behind their incorporation into the multilateral system and continued prominence. The volume provides readers with a comprehensive overview of the development of these controversial and increasingly important areas of international trade law. ECMT Round Tables

(De)Regulation of the Taxi Industry European Conference of Ministers of Transport, 2007-03-01 This Round Table examines the basic case for liberalisation of the taxi industry and reviews experiences with taxi de regulation in OECD and ECMT member countries.

Regulatory Autonomy and International Trade in Services Bregt Natens, 2016-07-27 This book considers how the interplay between multilateral and preferential liberalisation of trade in services increasingly raises concerns both from the perspective of the beneficiaries of such liberalisation whose rights are uncertain and that of regulators whose regulatory autonomy is constrained. The author shows how these concerns lead to vast underutilisation of and strong prejudices against the benefits of services liberalisation. The book meticulously analyses and compares the EU's obligations under the GATS and the services chapters of several RTAs to finally assess the merits of the raised concerns.

The Regulation of International Trade Robert Howse, Antonia Eliason, 2005-08-08 The Regulation of International Trade 2nd Edition introduces the rules and institutions that govern international trade. The authors base their analysis on aspects of the subject from classic and contemporary literature on trade and political economy. This new edition has been fully updated to take account of the most recent developments in International Trade. New issues covered include trade and competition, trade and labour rights, the Multilateral Agreement on Investment, the Basic Telecoms and Financial Services WTO

Agreements, an analysis of the first three years of WTO dispute rulings including those of the Appellate Body. Drawing on the success of the earlier edition, this comprehensive and up to date text will be an invaluable guide to students of economics, law, politics and international relations.

Dynamics of Regulatory Change David Vogel, Robert A. Kagan, 2004-12-31 Critics of globalization claim that economic liberalization leads to a lowering of regulatory standards. As capital and corporations move more freely across national boundaries, a race to the bottom results as governments are forced to weaken labor and environmental standards to retain current contracts or attract new business. The essays in this volume argue that on the contrary, under certain circumstances, global economic integration can actually lead to the strengthening of consumer and environmental standards. This volume extends the argument of David Vogel's book *Trading Up*, which discussed environmental standards by focusing on the impact of globalization on labor rights, women's rights and capital market regulations.
