Regulator No 3 Deadly Justice:

Your 1977 Guide to Firearms Regulation United States. Bureau of Alcohol, Tobacco, and Firearms, 1977 **Your Guide to Federal Firearms Regulation**, 1978 **Your Guide to Firearms Regulation**, **Restorative Justice & Responsive Regulation** John Braithwaite, 2002 Braithwaite's argument against punitive justice systems and for restorative justice systems establishes that there are good theoretical and empirical grounds for anticipating that well designed restorative justice processes will restore victims offenders and communities better than existing criminal justice practices Counterintuitively he also shows that a restorative justice system may deter incapacitate and rehabilitate more effectively than a punitive system This is particularly true when the restorative justice system is embedded in a responsive regulatory framework that opts for deterrence only after restoration repeatedly fails and incapacitation only after escalated deterrence fails Braithwaite's empirical research demonstrates that active deterrence under the dynamic regulatory pyramid that is a hallmark of the restorative justice system he supports is far more effective than the passive deterrence that is notable in the stricter sentencing grid of current criminal justice systems **Decision-making and Radioactive Waste Disposal**

Andrew Newman, Gerry Nagtzaam, 2015-11-19 The International Atomic Energy Agency estimates that nuclear power generation facilities produce about 200 000 cubic meters of low and intermediate level waste each year Vital medical procedures industrial processes and basic science research also produce significant quantities of waste All of this waste must be shielded from the population for extended periods of time Finding suitable locations for disposal facilities is beset by two main problems community responses to siting proposals are generally antagonistic and as a result governments have tended to be reactive in their policy making Decision making and Radioactive Waste Disposal explores these issues utilizing a linear narrative case study approach that critically examines key stakeholder interactions in order to explain how siting decisions for low level waste disposal are made Five countries are featured the US Australia Spain South Korea and Switzerland This book seeks to establish an understanding of the political economic environmental legal and social dimensions of siting across those countries This valuable resource fills a gap in the literature and provides recommendations for future disposal facility siting efforts The book will be of interest to students and scholars of environmental law justice management politics energy and security policy as well as decision makers in government and industry **Project Reports of the National Institute of Law Enforcement and Criminal Justice**, 1971 **Ethics and Engineering** Behnam Taebe, 2021-05-27 The world

population is growing yet we continue to pursue higher levels of well being and as a result increasing energy demands and the destructive effects of climate change are just two of many major threats that we face Engineers play an indispensable role in addressing these challenges and whether they recognize it or not in doing so they will inevitably encounter a whole range of ethical choices and dilemmas This book examines and explains the ethical issues in engineering showing how they affect assessment design sustainability and globalization and explores many recent examples including the Fukushima

Daiichi nuclear disaster Dieselgate naked scanners at airports and biofuel production Detailed but accessible the book will enable advanced engineering students and professional engineers to better identify and address the ethical problems in their practice

Publications of the National Institute of Law Enforcement and Criminal Justice National Institute of Law Enforcement and Criminal Justice,1980 The Human Rights Act and the Criminal Justice and Regulatory Process Jack Beatson,1999-09-01 The UK's new Human Rights Act with its duty to give domestic effect to the European Convention on Human Rights and the jurisprudence of the Strasbourg court will have a significant effect on many aspects of the criminal and regulatory process The papers in this volume arising from the second Cambridge Centre for Public Law conference consider the Act's impact on investigation and surveillance on evidence procedure and the substantive law applied at trials and hearings and at the post trial stage e.g. sentencing and post report action in respect of DTI Inspection Contributions from many of the country's leading criminal and regulatory lawyers both academic and practising make this volume an important and original source for all criminal lawyers

Dual Justice Anthony Grasso,2024-09-17 A far reaching examination of how America came to treat street and corporate crime so differently While America incarcerates its most marginalized citizens at an unparalleled rate the nation has never developed the capacity to consistently prosecute corporate wrongdoing Dual Justice unearths the intertwined histories of these two phenomena and reveals that they constitute more than just modern hypocrisy By examining the carceral and regulatory states' evolutions from 1870 through today Anthony Grasso shows that America's divergent approaches to street and corporate crime share common self-reinforcing origins During the Progressive Era scholars and lawmakers championed naturalized theories of human difference to justify instituting punitive measures for poor offenders and regulatory controls for corporate lawbreakers These ideas laid the foundation for dual justice systems criminal justice institutions harshly governing street crime and regulatory institutions governing corporate misconduct Since then criminal justice and regulatory institutions have developed in tandem to reinforce politically constructed understandings about who counts as a criminal Grasso analyzes the intellectual history policy debates and state and federal institutional reforms that consolidated these ideas along with their racial and class biases into America's legal system
