Reincarnation A Study In Human Evolution 191:

Reincarnation: A Study in Human Evolution Théophile Pascal, 2019-12-17 In *Reincarnation A Study in Human Evolution* Thophile Pascal embarks on an insightful exploration of the philosophical and metaphysical implications of reincarnation within the broader context of human development. Written in a scholarly yet accessible style, Pascal's work intricately weaves together historical beliefs, psychological perspectives, and spiritual doctrines, drawing extensively on cross-cultural examples to illustrate how the concept of rebirth has shaped collective human consciousness. The book is notable for its critical examination of reincarnation not merely as a religious tenet but as a significant player in the evolutionary narrative of humanity, engaging with existential questions that resonate across time and cultures. Thophile Pascal, a philosopher and cultural historian, has dedicated his career to the study of metaphysics and the intersection of spirituality with human psychology. His deep interest in various religious traditions and their historical contexts has provided him with a unique lens through which to consider reincarnation as a pivotal concept in understanding humanity's journey. Drawing from his extensive research and personal experiences, Pascal compellingly argues for a renewed appreciation of reincarnation's role in shaping personal and societal identities. This book is highly recommended for scholars of philosophy, psychology, and religious studies, as well as general readers intrigued by the profound questions of existence. Pascal's engaging narrative and thought-provoking analyses make *Reincarnation A Study in Human Evolution* not only an academic endeavor but also a transformative exploration of what it means to be human.

[Reincarnation \(A Study In Human Evolution\)](#) Theophile Pascal, 2012 It is more than 1500 years since the decision of the Council of 543 and condemned to oblivion sublime teachings which ought to have been carefully preserved and handed down to future generations as a beacon amid social reefs, teachings that would have uprooted that frightful egoism which threatens to annihilate the world and instilled patience into the hearts of such as were being crushed beneath the wheel of the cosmic law by showing them the scales of Justice inclining to the side filled with their iniquities of bygone times, teachings which would have been welcomed by the masses and the understanding of which would not have called for any lofty intellectual culture. The key to the secret lies in Evolution which can be accomplished only by means of the continual return of souls to earth. The subject will be divided into four chapters: 1 The Soul and the bodies 2 Reincarnation and the moral law 3 Reincarnation and science 4 Reincarnation and the religious and philosophical consensus of the ages

Reincarnation, a Study of the Human Soul Jerome A. Anderson, 1896 [Accelerating Human Evolution by Theosophical Initiation](#) Yves Mühlematter, 2022-12-19 The main subjects of analysis in the present book are the stages of

initiation in the grand scheme of Theosophical evolution These initiatory steps are connected to an idea of evolutionary self development by means of a set of virtues that are relative to the individual s position on the path of evolution The central thesis is that these stages were translated from the Hindu tradition to the Theosophical tradition through multifaceted hybridization processes in which several Indian members of the Theosophical Society partook Starting with Annie Besant s early Theosophy the stages of initiation are traced through Blavatsky s work to Manilal Dvivedi and T Subba Row both Indian members of the Theosophical Society and then on to the San tana Dharma Text Books In 1898 the English Theosophist Annie Besant and the Indian Theosophist Bhagavan Das together founded the Central Hindu College Benares which became the nucleus around which the Benares Hindu University was instituted in 1915 In this context the San tana Dharma Text Books were published M hlematter shows that the stages of initiation were the blueprint for Annie Besant s pedagogy which she implemented in the Central Hindu College in Benares In doing so he succeeds in making intelligible how esoteric knowledge was transferred to public institutions and how a broader public could be reached as a result The dissertation has been awarded the ESSWE PhD Thesis prize 2022 by the European Society for the Study of Western Esotericism

Rewiring the Human Brain: How Extra-terrestrials Shape Humanity Robin Wellmann,2023-09-29 This book studies strategic goals of advanced extra terrestrial civilisations and the implications they have for planet Earth The theoretical framework is based on logical arguments and statistical considerations The book explains various empirically and statistically confirmed phenomena for which science has currently no convincing explanation These phenomena include the existence of religious beliefs the existence of dreams the existence of the mental disorder schizophrenia the statistical evidence for some parapsychological

phenomena and the fact that the human brain capacity decreased since the human civilisation emerged from hunter gatherers The theory can be outlined as follows A technologically highly advanced civilisation settled Earth millions of years ago and has installed its computational infrastructure under the surface of the Earth The members of the civilisation have uploaded their minds to computers and live in a virtual reality Their technological infrastructure includes facilities for detecting and manipulating electromagnetic signals at arbitrary position on Earth They used intelligent programs for directing evolution on Earth and are now in the process of developing methods for rewiring the human brain This is done with the goal of controlling human thought processes and to prevent humans from becoming a threat for other civilisations The first chapter proves the hypothesis with statistical and logical arguments Putative implications for physics are derived and creativity and mental illnesses are re examined in the context of the developed theory The book then provides a reinterpretation of human history The last chapter illustrates the developed theory with some channelling reports
