Rejection Of Consequentialism A Philosophical Investigation Of The Considerations Underlying Rival Moral Conceptions:

The Rejection of Consequentialism Samuel Scheffler, 1994-08-11 In contemporary philosophy substantive moral theories are typically classified as either consequentialist or deontological Standard consequentialist theories insist roughly that agents must always act so as to produce the best available outcomes overall Standard deontological theories by contrast maintain that there are some circumstances where one is permitted but not required to produce the best overall results and still other circumstances in which one is positively forbidden to do so Classical utilitarianism is the most familiar consequentialist view but it is widely regarded as an inadequate account of morality Although Professor Scheffler agrees with this assessment he also believes that consequentialism seems initially plausible and that there is a persistent air of paradox surrounding typical deontological views In this book therefore he undertakes to reconsider the rejection of consequentialism He argues that it is possible to provide a rationale for the view that agents need not always produce the best possible overall outcomes and this motivates one departure from consequentialism but he shows that it is surprisingly difficult to provide a satisfactory rationale for the view that there are times when agents must not produce the best possible overall outcomes He goes on to argue for a hitherto neglected type of moral conception according to which agents are always permitted but not always required to produce the best outcomes

Political Realism And International Morality Kenneth Kipnis, Diana T Meyers, 2019-06-26 It is always appropriate to ask whether an expedient foreign policy is morally justifiable just as it is always appropriate to ask whether a morally defensible policy is consistent with the national interest The ongoing dialogue between morality and realpolitik gives much of foreign policy debate its characteristic bite In this collection of essays a distinguished group of philosophers political theorists and lawyers including Russell Hardin and Marshall Cohen explore these contrasting themes In essays that are at once insightful and accessible noted political thinkers examine the tension of the conflicting demands of morality and national self interest in the context of the foundations of international order the possession and use of nuclear weapons recourse to war and the prospects for peace A final postscript addresses the question of the responsibility of intellectuals in the national foreign policy debate This book will appeal to scholars and students in any discipline dealing with international affairs as well as to lay readers who wish to explore the implications of taking morality and reason seriously in foreign policy

British Ethical Theorists from Sidgwick to Ewing Thomas Hurka, 2014-11-06 Thomas Hurka presents the first full historical study of an important strand in the development of modern moral philosophy His subject is a series of British ethical theorists from the late nineteenth century to the mid twentieth century who shared key assumptions that made them a unified and distinctive school The best known of them are Henry Sidgwick G E Moore and W D Ross others include Hastings Rashdall H A Prichard C D Broad and A C Ewing They disagreed on some important topics especially in normative ethics Thus some were consequentialists and others deontologists Sidgwick thought only pleasure is

good while others emphasized perfectionist goods such as knowledge aesthetic appreciation and virtue But all were non naturalists and intuitionists in metaethics holding that moral judgements can be objectively true have a distinctive subject matter and are known by direct insight They also had similar views about how ethical theory should proceed and what are relevant arguments in it their disagreements therefore took place on common ground Hurka recovers the history of this under appreciated group by showing what its members thought how they influenced each other and how their ideas changed through time He also identifies the shared assumptions that made their school unified and distinctive and assesses their contributions critically both when they debated each other and when they agreed One of his themes is that that their general approach to ethics was more fruitful philosophically than many better known ones of both earlier and later times *The Republican Dilemma* Lars J. K. Moen,2024 The first chapter introduces the debate over freedom between republicans and liberals It also sketches the framework I employ throughout the book to analyse and compare republican freedom and the pure negative conception of liberal freedom The chapter ultimately shows how the book is structured so as to demonstrate how the conceptual dispute results in the republican dilemma which is also introduced in the chapter **Law, Economics, and Morality** Eyal Zamir,Barak Medina,2010 This work examines the possibility of combining economic methodology and deontological morality through explicit and direct incorporation of moral constraints into economic models **Metaethics from a First Person Standpoint** Catherine Wilson,2016-01-18 Metaethics from a First Person Standpoint addresses in a novel format the major topics and themes of contemporary metaethics the study of the analysis of moral thought and judgement Metathetics is less concerned with what practices are right or wrong than with what we mean by right and wrong Looking at a wide spectrum of topics including moral language realism and anti realism reasons and motives relativism and moral progress this book engages students and general readers in order to enhance their understanding of morality and moral discourse as cultural practices Catherine Wilson innovatively employs a first person narrator to report step by step an individual s reflections beginning from a position of radical scepticism on the possibility of objective moral knowledge The reader is invited to follow along with this reasoning and to challenge or agree with each major point Incrementally the narrator is led to certain definite conclusions about oughts and norms in connection with self interest prudence social norms and finally morality Scepticism is overcome and the narrator arrives at a good understanding of how moral knowledge and moral progress are possible though frequently long in coming Accessibly written Metaethics from a First Person Standpoint presupposes no prior training in philosophy and is a must read for philosophers students and general readers interested in gaining a better understanding of morality as a personal philosophical quest **A Minimally Good Life** Nicole Hassoun,2024-07-12 What do we owe to each other simply out of respect or concern for our common humanity What can we claim The United Nations Sustainable Development Goals and the Universal Declaration of Human Rights as well as many states constitutions embody competing answers to these questions Different accounts of what we owe to others out of

concern for our common humanity ground divergent accounts of the basic minimum just societies and the international community must help people secure A Minimally Good Life argues that concern for our common humanity requires helping others live minimally good lives when doing so does not require sacrificing our own ability to live well enough This it suggests provides a unified answer to the question of what we must give to and can demand from others as a basic minimum More precisely Nicole Hassoun argues that people must obtain the things that let them secure the relationships pleasures knowledge appreciation worthwhile activities and other things that a reasonable and caring person free from coercion and constraint would set as a minimal standard of justifiable aspiration That is as reasonable caring free people we should put ourselves into each other s shoes and think about what we need to live well enough as each person Hassoun makes this case by engaging with the main competitors in the literature those that offer different accounts of the basic minimum and the limits of our obligations She then defends a new way of helping people in present and future generations reach the sufficiency threshold and of responding to apparent tragedy when helping everyone seems impossible Philippa Foot's Moral Thought John Hacker-Wright,2013-10-24 An accessible introduction to the moral philosophy of Philippa Foot widely regarded as one of the leading moral philosophers of the 20th century **Causation and Responsibility** Michael S. Moore,2010-07-15 The concept of causation is fundamental to ascribing moral and legal responsibility for events Yet the relationship between causation and responsibility remains unclear What precisely is the connection between the concept of causation used in attributing responsibility and the accounts of causal relations offered in the philosophy of science and metaphysics How much of what we call causal responsibility is in truth defined by non causal factors This book argues that much of the legal doctrine on these questions is confused and incoherent and offers the first comprehensive attempt since Hart and Honor to clarify the philosophical background to the legal and moral debates The book first sets out the place of causation in criminal and tort law and outlines the metaphysics presupposed by the legal doctrine It then analyses the best theoretical accounts of causation in the philosophy of science and metaphysics and using these accounts criticises many of the core legal concepts surrounding causation such as intervening causation foreseeability of harm and complicity It considers and rejects the radical proposals to eliminate the notion of causation from law by using risk analysis to attribute responsibility The result of the analysis is a powerful argument for revising our understanding of the role played by causation in the attribution of legal and moral responsibility **Eco-Republic** Melissa Lane,2013-11-24 Ancient lessons for sustainable citizenship An ecologically sustainable society cannot be achieved without citizens who possess the virtues and values that will foster it and who believe that individual actions can indeed make a difference Eco Republic draws on ancient Greek thought and Plato s Republic in particular to put forward a new vision of citizenship that can make such a society a reality Melissa Lane develops a model of a society whose health and sustainability depend on all its citizens recognizing a shared standard of value and shaping their personal goals and habits accordingly Bringing together the moral and political ideas of

the ancients with the latest social and psychological theory Lane illuminates the individual's vital role in social change and articulates new ways of understanding what is harmful and what is valuable what is a benefit and what is a cost and what the relationship between public and private well being ought to be Eco Republic reveals why we must rethink our political imagination if we are to meet the challenges of climate change and other urgent environmental concerns Offering a unique reflection on the ethics and politics of sustainability the book goes beyond standard approaches to virtue ethics in philosophy and current debates about happiness in economics and psychology Eco Republic explains why health is a better standard than happiness for capturing the important links between individual action and social good and diagnoses the reasons why the ancient concept of virtue has been sorely neglected yet is more relevant today than ever
