Abstract

What do we gain from the scientific study of religion? One possibility is that religious contexts are unique, and cognition within these contexts is worth understanding. Another possibility is that religion can be viewed as a laboratory for understanding psychology and culture more broadly. Rather than limiting the study of religion to a single context, I argue that the study of religion is useful precisely because it illuminates secular psychological and cultural processes. I first outline my practical approach to psychology and religion, focusing on how people use religion to advance mundane goals. I then discuss several domains in which studying religion has led to important insights, including culture, prejudice, and cognition. This article is an extended version of an Early Career Award address given at the International Association for the Psychology of Religion meeting in 2023 in Groningen, Netherlands.

Keywords

Culture, evolution, morality, religion

Most researchers who study religion are especially interested in belief: Why do people hold certain types of beliefs about deities? What are the consequences of these beliefs? How do people engage with sacred concepts? And how are these sacred concepts different from the secular?

It is perhaps intuitive to think that, for religion to be an important topic of study, it must offer something wholly unique—religious cognition should look in some way distinct from anything we see in secular contexts, or the powerful combinations of emotions religions evoke must be somehow exceptional. Some researchers have used the specialness of religion as justification for why religion is important (Pargament, 2002); similarly, some who view religion as simply reflecting mundane mechanisms agree with the premise that if religion is not special, then it is not worth studying (Funder, 2002).

Believers: Faith in Human Nature Melvin Konner, 2019-09-10 An anthropologist examines the nature of religiosity and how it shapes and benefits humankind *Believers* is a scientist's answer to attacks on faith by some well meaning scientists and philosophers It is a firm rebuke of the Four Horsemen Richard Dawkins Daniel Dennett Sam Harris and Christopher Hitchens known for writing about religion as something irrational and ultimately harmful Anthropologist Melvin Konner who was raised as an Orthodox Jew but has lived his adult life without such faith explores the psychology development brain science evolution and even genetics of the varied religious impulses we experience as a species Conceding that faith is not for everyone he views religious people with a sympathetic eye his own upbringing his apprenticeship in the trance dance religion of the African Bushmen and his friends and explorations in Christian Buddhist Hindu Muslim and other faiths have all shaped his perspective Faith has always manifested itself in different ways some revelatory and comforting some kind and good some ecumenical and cosmopolitan some bigoted coercive and violent But the future Konner argues will both produce more nonbelievers and incline the religious among us holding their own by having larger families to increasingly reject prejudice and aggression A colorful weave of personal stories of religious and irreligious encounters as well as new scientific research *Believers* shows us that religion does much good as well as undoubted harm and that for at least a large minority of humanity the belief in things unseen neither can nor should go away

Principles of Psychology in Religious Context E. Rae Harcum, 2013 This book asserts that the better one understands the causes of behavior the better one can apply that knowledge to produce a better world It describes the mechanisms that cause human

behavior such as freedom of will in a manner consistent with religious beliefs It also asserts that all avenues for studying human behavior like intuition and prayer are acceptable and necessary Thus when studying the agent of human action we must rely on faith logic and intuition in addition to the full use of empirical science Principles of Psychology for People of God begins with a description of the nervous system and continues with chapters on development perception internal states learning memory and the ultimate selection of behaviors Nevertheless it steadfastly emphasizes that behavior is not produced by physical mechanisms alone but also by a non material spirit that can transcend some inheritances and environments
