

A painting of a street scene at dusk or dawn. A large, intense fire is burning in the center of the road, with thick black smoke rising into the sky. Several cars are visible: a red car on the left, a blue car in the center, and a dark car on the right. The street is wet, reflecting the light. In the background, there are trees and a building. The overall mood is dramatic and somber.

Thompson,1989-01-01 The central thesis of this book is that the semantic conception is a logical methodologically and heuristically richer and more accurate account of scientific theorizing and in particular of theorizing in evolutionary biology than the more widely adhered to syntactic conception In this book the author outlines both the conceptions indicating the significant problems with the syntactic conception explains and criticizes two influential syntactic conception accounts of the structure of evolutionary theorizing Thompson also argues that the semantic conception provides a richer and more accurate understanding than the syntactic conception of sociobiological explanation of the testability of sociobiology and of the role of culture and cognition in evolutionary explanations of human behavior Theories of Globalization Barrie Axford,2014-01-09

Theories of Globalization offers students and scholars a comprehensive and critical introduction to the concept of globalization Barrie Axford expertly guides readers through the full range of perspectives on the topic from international political economy to geography global anthropology to cultural and communication studies In so doing he draws out the common threads between competing theories as well as pinpointing the problems that challenge our understanding of globalization Key terms such as globalism and globality are carefully explained and central themes like capitalism governance culture and history explored in full In assessing the contribution made by globalization theory Axford s account also sheds new light on several crucial current issues These range from the changing shape of democracy and citizen engagement with governance to issues surrounding just war and humane intervention and problems relating to empire and post colonialism This wide ranging and detailed new book will be essential reading for students and scholars of international politics sociology and any area where the concept of globalization is discussed and disputed **Embryology, Epigenesis and Evolution** Jason Scott Robert,2004-03-04

Historically philosophers of biology have tended to sidestep the problem of development by focusing primarily on evolutionary biology and more recently on molecular biology and genetics Quite often too development has been misunderstood as simply or even primarily a matter of gene activation and regulation Nowadays a growing number of philosophers of science are focusing their analyses on the complexities of development and in Embryology Epigenesis and Evolution Jason Scott Robert explores the nature of development against current trends in biological theory and practice and looks at the interrelations between development and evolution evo devo an area of resurgent biological interest Clearly written this book should be of interest to students and professionals in the philosophy of science and the philosophy of biology Expository Lectures on Representation Theory Kiyoshi Igusa, Alex Martsinkovsky, Gordana Todorov,2014-01-16 This volume contains the proceedings of the Maurice Auslander Distinguished Lectures and International Conference held April 25 30 2012 in Falmouth MA The representation theory of finite dimensional algebras and related topics especially cluster combinatorics is a very active topic of research This volume contains papers covering both

the history and the latest developments in this topic In particular Otto Kerner gives a review of basic theorems and latest results about wild hereditary algebras Yuri Berest develops the theory of derived representation schemes and Markus Schmidmeier presents new applications of arc diagrams **Handbook of Social Psychology** John DeLamater,2006-11-24

Psychology focusing on processes that occur inside the individual and Sociology focusing on social collectives and social institutions come together in Social Psychology to explore the interface between the two fields The core concerns of social psychology include the impact of one individual on another the impact of a group on its individual members the impact of individuals on the groups in which they participate the impact of one group on another This book is a successor to Social Psychology Social Perspectives and Sociological Perspectives in Social Psychology The current text expands on previous handbooks in social psychology by including recent developments in theory and research and comprehensive coverage of significant theoretical perspectives **Québec Studies in the Philosophy of Science** Mathieu Marion,Robert S.

Cohen,2012-12-06 By North American standards philosophy is not new in Quebec the first mention of philosophy lectures given by a Jesuit in the College de Quebec founded 1635 dates from 1665 and the oldest logic manuscript dates from 1679 In English speaking universities such as McGill founded 1829 philosophy began to be taught later during the second half of the 19th century The major influence on English speaking philosophers was at least initially that of Scottish Empiricism On the other hand the strong influence of the Catholic Church on French Canadian society meant that the staff of the faculties of the French speaking universities consisted until recently almost entirely of Thomist philosophers There was accordingly little or no work in modern Formal Logic and Philosophy of Science and precious few contacts between the philosophical communities In the late forties Hugues Leblanc was a young student wanting to learn Formal Logic He could not find anyone in Quebec to teach him and he went to study at Harvard University under the supervision of W V Quine His best friend Maurice L Abbe had left a year earlier for Princeton to study with Alonzo Church After receiving his Ph D from Harvard in 1948 Leblanc started his professional career at Bryn Mawr College where he stayed until 1967 He then went to Temple University where he taught until his retirement in 1992 serving as Chair of the Department of Philosophy from 1973 until 1979 RLE: Responding to Fascism Various,2021-08-05 A set of titles regarding fascism in Germany Italy and Spain in the mid twentieth century

The Nazi Dictatorship (Responding to Fascism Vol 3) Roy Pascal,2010-11 Faced with a political movement that was effectively unparalleled many observers found it extremely difficult to work out exactly what kind of regime they were dealing with whose interests did it serve First published in 1934 The Nazi Dictatorship argues both that the Nazi regime represented a clear break from pre War Prussian militarism and that it was not a passing fad It describes a State of Monopoly Capitalism in which large scale industrial and financial interests are paramount The German Revolution and Political Theory Gaard Kets,James Muldoon,2019-05-02 This book is the first collection within political theory to examine the ideas and debates of the German Revolution of 1918 19 It discusses the political theorists and actors of the revolution and

uncovers an incredibly fertile body of political thought Revolutionary events led to the proliferation of new political strategies theoretical insights and institutional proposals Key questions included the debate between a national assembly and a council system the socialisation of the economy the development of new forms of political representation and the proper role of parliaments political parties and trade unions This book offers novel perspectives on the history of the revolution a thorough engagement with its main thinkers and an analysis of its relevance for contemporary political thought *What Writers Know* Martin Nystrand,2023-07-24 The Present Situation in the Philosophy of Science Friedrich Stadler,2010-05-19 This volume is a serious attempt to open up the subject of European philosophy of science to real thought and provide the structural basis for the interdisciplinary development of its specialist fields but also to provoke reflection on the idea of European philosophy of science This efforts should foster a contemporaneous reflection on what might be meant by philosophy of science in Europe and European philosophy of science and how in fact awareness of it could assist philosophers interpret and motivate their research through a stronger collective identity The overarching aim is to set the background for a collaborative project organising systematising and ultimately forging an identity for European philosophy of science by creating research structures and developing research networks across Europe to promote its development **Epistemology and History** ,2023-08-14 The Boston Medical and Surgical Journal ,1901 **Is Faith in God Reasonable?** Corey Miller,Paul Gould,2014-04-03 The question of whether faith in God is reasonable is of renewed interest in today s academy In light of this interest as well as the rise of militant religion and terrorism and the emergent reaction by neo atheism this volume considers this important question from the views of contemporary scientists philosophers and in a more novel fashion of rhetoricians It is comprised of a public debate between William Lane Craig supporting the position that faith in God is reasonable and Alex Rosenberg arguing against that position Scholars in the aforementioned fields then respond to the debate representing both theistic and atheistic positions The book concludes with rejoinders from Craig and Rosenberg

Science Abstracts. Physics and Electrical Engineering ,1908 *Theory of Electron-Atom Collisions: Part One: Potential Scattering* Philip G. Burke,Charles J. Joachain,1995-04-30 The authors aim to hone the theory of electron atom and electron ion collisions by developing mathematical equations and comparing their results to the wealth of recent experimental data This first of three parts focuses on potential scattering and will serve as an introduction to many of the concepts covered in Parts II and III As these processes occur in so many of the physical sciences researchers in astrophysics atmospheric physics plasma physics and laser physics will all benefit from the monograph
