**Conflicted American Landscapes** David E. Nye,2021-04-27 How conflicting ideas of nature threaten to fracture America s identity Amber waves of grain purple mountain majesties American invest much of their national identity in sites of natural beauty And yet American lands today are torn by conflicts over science religion identity and politics Creationists believe that the Biblical flood carved landscapes less than 10 000 years ago environmentalists protest pipelines Western states argue that the federal government s land policies throttle free enterprise Native Americans demand protection for sacred sites In this book David Nye looks at Americans irreconcilably conflicting ideas about nature A landscape is conflicted when different groups have different uses for the same location for example when some want to open mining sites that others want to preserve or when suburban development impinges on agriculture Some landscapes are so degraded from careless use that they become toxic anti landscapes Nye traces these conflicts to clashing conceptions of nature ranging from pastoral to Native American to military industrial that cannot be averaged into a compromise Nye argues that today s environmental crisis is rooted in these conflicting ideas about land Depending on your politics global warming is either an inconvenient truth or fake news America s contradictory conceptions of nature are at the heart of a broken national consensus

**America's Assembly Line** David E. Nye, 2015-01-30 From the Model T to today's lean manufacturing the assembly line as crucial yet controversial agent of social and economic transformation The mechanized assembly line was invented in 1913 and has been in continuous operation ever since It is the most familiar form of mass production Both praised as a boon to workers and condemned for exploiting them it has been celebrated and satirized We can still picture Chaplin's little tramp trying to keep up with a factory conveyor belt In America's Assembly Line David Nye examines the industrial innovation that made the United States productive and wealthy in the twentieth century The assembly line developed at the Ford Motor Company in 1913 for the mass production of Model Ts first created and then served an expanding mass market It also transformed industrial labor By 1980 Japan had reinvented the assembly line as a system of lean manufacturing American industry reluctantly adopted the new approach Nye describes this evolution and the new global landscape of increasingly automated factories with fewer industrial jobs in America and questionable working conditions in developing countries A century after Ford's pioneering innovation the assembly line continues to evolve toward more sustainable manufacturing

It provides both undergraduate and postgraduate students of sociology, business, and politics with a firm and enjoyable foundation to this fascinating area of sociology, giving comprehensive coverage of traditional areas of the sub-discipline as well as new trends and developments. The book is divided into three complementary and interconnected sections: investigating work, work and social change, and understanding work. These sections allow readers to explore themes, issues, and approaches by examining how sociologists have thought about and researched work and how the sub-discipline has been influenced by wider society itself. Novel features include separate chapters on researching work, domestic work, unemployment and work, and the representation of work in literary and visual media. *Moving Picture World and View Photographer*, 1916 *Hawkins's Picture of Quebec* Alfred Hawkins, John Charlton Fisher, 1834 The United States and Cambodia, 1969-2000 Kenton J.
