Walls,2012-12-06 The NATO Advanced Research Workshop on Quantum Measurements in Optics was held in Cortina d Ampezzo Italy January 21 25 1991 This workshop was attended by 70 participants from 16 different countries The subjects discussed at this workshop concentrated on quantum measurements in optics made possible by the recent advances in the generation and detection of light with low quantum noise These advances have occurred simultaneously with the development of atomic traps capable of trapping a single atom for a considerable period of time The interaction of a single two level atom with the single mode of the electromagnetic field is now possible in high Q microcavities A new field of cavity QED has developed studying the properties of Rydberg atoms in microwave cavities At this meeting we heard the first report of an atomic interferometer where a single atom passing through the two slits exhibits wave like interference phenomena This new field involving the transfer of momentum from photons to atoms has lead to new possibilities for quantum nondemolition measurements on an optical field We heard suggestions for such measurements at this meeting With the new light sources available the possibility of using low quantum noise light in optical communications becomes close to reality The problem of the propagation of quantum light field in optical fibres was actively discussed at this meeting Continuous Quantum Measurements and Path Integrals M.B Mensky,2017-10-19 Advances in technology are taking the accuracy of macroscopic as well as microscopic measurements close to the quantum limit for example in the attempts to detect gravitational waves Interest in continuous quantum measurements has therefore grown considerably in recent years Continuous Quantum Measurements and Path Integrals examines these measurements using Feynman path integrals The path integral theory is developed to provide formulae for concrete physical effects The main conclusion drawn from the theory is that an uncertainty principle exists for processes in addition to the familiar one for states This implies that a
