Digital Equipment Corporation Alan R. Earls, 2004 From its inception in 1957 Digital Equipment Corporation DEC headquartered in Maynard Massachusetts carved itself a role in American business unlike any other company Launched by Massachusetts Institute of Technology engineer Ken Olsen with a 70 000 investment from the country s first venture capital firm DEC rapidly became a pioneer in computer technology In its heyday DEC had a valuation of more than 12 billion and employed approximately one hundred twenty thousand people worldwide making it second only to IBM Its people and technology contributed to making computers increasingly affordable which led directly to the advent of the personal computer the first computer games and computer networks DEC was also a leader in the Internet revolution claiming the dubious distinction of launching the first spam mailing and registering one of the first commercial domain names Through photographs of people events and machines Digital Equipment Corporation tells the story of the unassuming computer

revolutionaries who reshaped the technological world It is written for anyone who is interested in how the present era of computing ubiquity has evolved since the 1940s when IBM chairman Thomas Watson predicted that the whole world might need no more than five computers

How Growth Really Happens Michael H. Best, 2018-06-26 A groundbreaking study that shows how countries can create innovative production based economies for the twenty first century Achieving economic growth is one of today s key challenges In this groundbreaking book Michael Best argues that to understand how successful growth happens we need an economic framework that focuses on production governance and skills This production centric framework is the culmination of three simultaneous journeys The first has been Best s visits to hundreds of factories worldwide starting early as the son of a labor organizer and continuing through his work as an academic and industrial consultant The second is a survey of two hundred years of economic thought from Babbage to Krugman with stops along the way for Marx Marshall Young Penrose Richardson Schumpeter Kuznets Abramovitz Keynes and Jacobs The third is a tour of historical episodes of successful and failed transformations focusing sharply on three core elements the production system business organization and skill formation and their interconnections Best makes the case that government should create the institutional infrastructures needed to support these elements and their interconnections rather than subsidize individual enterprises The power of Best s alternative framework is illustrated by case studies of transformative experiences previously regarded as economic miracles America s World War II industrial buildup Germany s postwar recovery Greater Boston s innovation system Ireland s tech sector boom and the rise of the Asian Tigers and China Accessible and engaging *How Growth Really Happens* is required reading for anyone who wants to advance today s crucial debates about industrial policy free trade outsourcing and the future of work

The Yankee Road: Tracing the Journey of the New England Tribe That Created Modern America James D. McNiven, 2015-03-14 Who is a Yankee and where did the term come from Though shrouded in myth and routinely used as a substitute for American the achievements of the Yankees have influenced nearly every facet of our modern way of life Join author Jim McNiven as he explores the emergence and influence of Yankee culture while traversing an old transcontinental highway reaching from the Atlantic to the Pacific US 20 which he nicknames The Yankee Road The Yankee Road Tracing the Journey of the New England Tribe that Created Modern America combines fascinating history with a travel narrative taking the reader on a journey through the places Yankees and their descendants settled as they expanded westward Using a physical road to connect locations important to the Yankee cultural road McNiven takes us on twenty two side trips into individual stories introducing readers to the origins of such large scale and diverse ideas as conservation public education telegraphy mass production religion and labor reform See familiar places and stories in a Yankee light such as the fight for women s rights in Seneca Falls and Walden Pond that Thoreau made famous Learn about less familiar venues like Route 128 s technology companies that led to the creation of the computer industry and incidentally the Internet and to the Worcester suburb of Shrewsbury where two old women changed the world by making

possible the birth control pill McNiven's first tour goes as far west as the Pennsylvania New York border with more stories to come As we travel The Yankee Road we will meet some of the men and women who made these ideas happen Harry Truman once said I like roads I like to move This is a road book Come on along Raytheon Company Alan R. Earls, Robert E. Edwards, 2005 Raytheon's history is one of the great American success stories Launched in 1922 the Cambridge based company quickly moved to the forefront of innovation in the electronics industry During World War II thousands of Raytheon workers contributed to the war effort supplying eighty percent of the magnetron tubes vital components for U S and British radars developing miniature tubes for the crucial proximity fuse in anti-aircraft shells and providing entire radar systems Although government contracts slowed after World War II Raytheon continued to develop military components including leading edge radars and missiles for America's defenses in the Cold War but it also began to offer a host of civilian products the famous RadaRange the world's first microwave oven televisions marine radars transistors miniature hearing aids and medical equipment

Entrepreneurship and Local Economic Development Bruno Dallago, Ermanno Tortia, 2018-09-05 This book focuses on the nature and role of entrepreneurship in modern developed and emerging economies and societies its relation to governments and universities and its role in the often forgotten informal economy The aim is to position entrepreneurship in the post crisis context and explore how its relation to universities and governments contributes to explain the countries and territories growth performance and resilience or vulnerability to the crisis The accent is particularly on processes and patterns at local level and in small and medium sized enterprises in local economic systems and districts local systems of innovation and the types and configurations of innovation these give origin to With globalization entrepreneurship has become fundamental for the competitiveness of territories and countries for policy management and for development The local dimension is fundamental because of agglomeration economies and effects the advantages of proximity and the nature of knowledge and information Furthermore territories carry to the centre stage tacit knowledge localized social capital embeddedness and interpersonal relations as fundamental components of their endogenous socio economic development and competitiveness When local systems are connected in a horizontal network they contribute to the strength of national and international systems To play a constructive role from this perspective entrepreneurship must avoid local entrenchment and support the local economy to upgrade and be competitive To do this the entrepreneurs interaction and alliance with universities and governments is a must for those countries and localities wanting to emerge This requires that enterprises universities and governments create synergies and spill overs to their mutual advantage
