Production System Clément Morlat, 2020-04-09 Wealth is no longer just an ability to live well in a world shaped by human activities. It is also an ability to push back or defer the limits of a world in biological and climatic closure. This book examines the theoretical conflicts and the power plays which often oppose the socio-political and technical-financial practices of recognition of what intervenes in the production of this wealth, i.e. of what has value. It lays down the principles of a contributory modeling method allowing debates around the concept of development, the building of scenarios, the negotiation of their implementation, and a cross-sectoral reading of their social, ecological, and economic costs. This method, called Dynamic Modeling of Cost Systems, is based on a territorial communication device which articulates political, contractual, and accounting innovations using deliberative and normative digital tools. It combines different local representations of value in order to approach wealth through an integrated analysis of micro, meso, and macro issues. *OECD Digital Economy Outlook 2024 (Volume 2) Strengthening Connectivity, Innovation and Trust* OECD, 2024-11-19 Rapid technological changes characterise the most recent phase of digital transformation, bringing opportunities and risks for the economy and society. Volume 2 of the OECD Digital Economy Outlook 2024 examines new directions in digital priorities, policies, and governance across countries. It further analyses developments in the foundations that support digital transformation: drive digital innovation and foster trust in the digital age. Toward this end, Volume 2 assesses access and connectivity trends and the skills needed to thrive in a digital economy and society. It also explores how to push out the digital technology frontier by harnessing the untapped potential of women. Moreover, it considers how technological innovations can help reach net-zero targets and contribute to protecting the planet. Finally, Volume 2 examines digital security developments and presents new trends in media consumption and trust attitudes toward privacy and control over personal data, and insights into how exposure to additional context influences the ability of individuals to identify the veracity of information online. A Statistical Annex completes the volume. **Proceedings of the 16th International Conference on Soil Mechanics and Geotechnical Engineering**

The Organizing Committee of the 16th ICSMGE, 2005-09-12 The 16th ICSMGE responds to the needs of the engineering and construction community, promoting dialog and exchange between academia and practice in various aspects of soil mechanics and geotechnical engineering. This is reflected in the central theme of the conference: Geotechnology in Harmony with the Global Environment. The proceedings of the conference are of great interest for geo-engineers and researchers in soil mechanics and geotechnical engineering. Volume 1 contains 5 plenary session lectures: the Terzaghi Oration, Heritage Lecture, and 3 papers presented in the major project session. Volumes 2, 3, and 4 contain papers with the following topics: Soil mechanics in general; Infrastructure and mobility; Environmental issues of geotechnical engineering; Enhancing natural disaster reduction systems; Professional practice and education.
