**The Royal Air Force** Michael Napier, 2018-02-22 A fully illustrated history of the Royal Air Force while on operations publishing to mark the centenary of its foundation in World War I The world's first independent air force the Royal Air Force celebrates its centenary in 2018 In the 100 years since the end of World War I the service has been involved in almost continuous operations around the globe giving the RAF the longest and most wide ranging history of any air force in the world But over the years this history has also become entangled with myths The Royal Air Force A Centenary of Operations sets the record straight dispelling these as it uncovers in both words and photographs the true exploits and accomplishments of RAF personnel over the last 100 years From its formation as an independent service in the dying days of World War I its desperate fight against the Axis air forces in World War II to its commitments during both the Cold War and modern times this is the complete story of how the RAF has defended Britain for a century

**The Royal Air Force at Home** Ian Watson, 2010-06-19 Military public relations endeavors ultimately seek to build a sense of common interests and aims and so generally foster good relations with the people they defend and there in ensure a stable society The armed forces when engaging on any public relations exercise have traditionally sought to provide an entertaining spectacle For years this has been typified by parades bands mock battles drill displays and other relevant feats of military prowess which have captured the imagination of the public and inspired potential recruits The 20th Century brought a new dimension to the field of warfare and subsequently added a new strand to the fabric of public ceremony and displays by the armed forces That new dimension was the arrival of powered flight Display flying began within five years of the Wright Brothers making their milestone first flight The first events staged in Britain which centered on demonstrations by flying machines were organized by the town councils of Blackpool and Doncaster and were held within days of each other in October 1909 1920 was the year that the first of the famed and legendary Hendon Air Pageants was staged and this is where military air shows traditionally began The Hendon Displays were organized and staged by the still fledgling Royal Air Force and it was probably due in no small part to the prestige and spectacle of this fresh new dimension of military pageantry together with other like events held at RAF airfields through the next two decades that the very existence of the RAF was saved from the threat of abolition The history of the RAF's commitment one that compares almost uniquely with other air forces toward display flying through the years after World War II has now come of age This account of their record in this often overlooked but then again traditional field of military customs describes and illustrates the major public RAF events since 1920

**The Royal Air Force Over Florida** A. M. De Quesada, 1998 Before they defended Britain against Hitler's Blitzkrieg many Royal Air Force pilots were sent across the ocean to sunny Florida to receive pilot training Far from the wartime destruction of their homeland these brave pilots some of whom would never return due to accidents that would take their lives received valuable training from the military as well as a warm welcome from the citizens of Florida

*Badges and Uniforms of the Royal Air Force* Malcolm Hobart, 2012-12-19 Throughout the relatively short yet highly distinguished history of the Royal Air Force there has been a tendency for the men and women of the Service to be overshadowed by the glamour of the aircraft Nonetheless it is surprising that there has never before been a complete record of the uniforms and badges of the RAF and its predecessor the Royal Flying Corps Malcolm Hobart and Pen and Sword Books have cooperated to rectify this serious omission with this superbly color illustrated and comprehensive collector s guide Badges of rank and trade are all depicted not only for the flying arms but for ground staff This valuable addition to our Collector series also covers the RAF Reserves and Auxiliary Service Air Training Corps and the Royal Observer Corps

Omissi,1990 Between the world wars the main task of the RAF was to crush tribal rebellions against British rule This study based almost entirely on unpublished documents shows how the independent peacetime role of air policing ensured the survival of the RAF during the lean financial times after WWI Its analysis of rebellion and imperial violence is of interest to a broad audience Distributed by St Martin s Press Annotation copyrighted by Book News Inc Portland OR     The Royal Air Force John Buckley,Paul Beaver,2018-06-22 In 1918 the Royal Air Force became the first major independent air force in the world Formed to serve a strategic need in the most intensive war that Britain had then fought the RAF continued in the inter war era to play a key role in the political and diplomatic world and in defending the Empire During the Second World War the RAF was pivotal in defending Britain from invasion in the Battle of Britain and then in leading the assault on the Axis powers most notably through the contentious bomber offensive against Germany In the post war world the RAF adapted and developed into a force to meet the needs of the United Kingdom during the Cold War the retreat from Empire and most recently in the move to coalition warfare against low intensity threats all against a backdrop of diminishing resources and shifting priorities This is the story of the RAF over the first century of its existence how it has confronted the many challenges and threats it has faced from the Luftwaffe in 1940 through the spectre of nuclear holocaust in the Cold War to the fight against terrorism in the 21st century and how it has contributed to the defence of the United Kingdom throughout that period     **So Far From Home** Robert Kane,2016-09-01 During World War II the US Army Air Forces AAF trained over 21 000 aircrew members from 29 Allied countries The two largest programs 79 percent of those trained were for Britain and France The Royal Air Force RAF fully engaged against the German Air Force by December 1940 was not able to train new aircrews The British government asked the United States to train new pilots until it could get its own flight training program underway Lieutenant General Henry Hap Arnold chief of the Army Air Corps authorized the training of RAF pilots at select airfields in the southeast United States including at Maxwell and Gunter fields near Montgomery Alabama Between June 1941 and February 1943 when the RAF terminated what became known as the Arnold Plan 4 300 of more than 7 800 RAF cadets sent to the United States completed the three phase AAF flight training program Within three months some of the same schools including the phase 2 school at Gunter Field began training Free French Air Force flight cadets By November 1945 when the US government terminated the French training program 2 100 French flight cadets out of the 4 100 who came to the United States had received their wings This book tells for the first time the story of the RAF and Free French

**The Royal Air Force: The Trenchard Years, 1918-1929** Ian M. Philpott,2005-07-19 The inter war years between 1918 and 1939 saw the newly created Royal Air Force fighting for its very existence politically being dispatched to the remotest corners of the British Empire and its Protectorates in various policing roles and then finally engaged in a headlong rush to modernize in the face of the new German Fascist regime that was threatening British and European freedom Yet this important period in RAF history and its effect on political and military rationale during the period has never been completely documented This exhaustive and comprehensive reference is the most detailed work to be published on the subject The author gives full information on the changing structure of the Force during the period squadron operations political machinations and their effects the airplanes and their equipment the personnel technical advances in navigation and breakthroughs achieved in engine performance The book is cross referenced

**The Birth of the Royal Air Force in World War I** Charles River Editors, 2017-10-13 Includes pictures Includes contemporary accounts Includes online resources and a bibliography for further reading One of the most important breakthroughs in military technology associated with World War I and certainly the one that continues to capture the public imagination was the use of airplanes which were a virtual novelty a decade before While the war quickly ground to a halt in its first few months the skies above the Western Front became increasingly busy The great powers had already been acquiring aircraft for potential uses but given that aerial warfare had never been a major component of any conflict it is understandable that few on either side had any idea what the planes were capable of doing Furthermore at the start of the war all sides aircraft were ill equipped for combat mostly because the idea that planes might somehow fight was still a novel one and the adaptations had not yet been developed that would allow the aerial battles later in the war As a result aircraft were used almost entirely for reconnaissance early on allowing generals to gain unprecedented levels of information about enemy movements Such intelligence allowed the French to counter German movements in what became the First Battle of the Marne ending Germany's hopes for victory through the Schlieffen plan Similarly in the east German planes were vital in tracking encircling and destroying Russian forces at Tannenberg Some armies such as the French saw air intelligence as a strategic matter with aircraft capable mainly of identifying enemy forces before battle and contributing to advanced preparations The Germans on the other hand believed that aircraft could provide tactical information once battle had commenced Pilots such as Oswald Boelcke Germany's first great aerial officer would fly over enemy positions in two seat aircraft with a spotter in the back identifying Allied positions and using colored lights to direct the fire of artillery on the ground Of course spotting took on great importance because of the growing range and power of artillery Much of the fire from the great guns was aimed indirectly since the gunners could not see their targets and thus relied on intelligence from others to direct them Maps of enemy held territory were often woefully inadequate to start with and with the need to know where moving enemy formations were positioned the business gained an added complexity but aircraft could cut through this by providing up to date intelligence on enemy positions and sending it back to the gun batteries which were lobbing shells over their own front lines The Royal Air Force RAF Britain's legendary air arm was born

in the skies above the First World War The British had previously used balloons for spotting and reconnaissance for decades and in the years leading up to the war planes started seeing military use They mostly provided reconnaissance though experiments were made in using them offensively During the Boer War of 1899 1902 the British Army used the crews of helium filled balloons to plot and help target artillery fire But these were small tentative steps The first patent to fit a machine gun to a plane taken out in 1910 had not yet led to active fighting vehicles and there was no doctrine no tactics and no combat between massed air fleets That changed during World War I as the skies above the Western Front became the crucible in which the preceding fragments of aerial warfare were smelted in the white hot heat of war For the British this meant the creation of a large and unified flying force which by 1918 would become the RAF The Birth of the Royal Air Force in World War I The History and Legacy of British Air Power during the Great War examines the creation and evolution of the RAF over the course of World War I     **"The Royal Air Force as a Career."
