The Academy and Literature ,1905 **Birdscapes** Jeremy Mynott, 2009 What draws us to the beauty of a peacock the flight of an eagle or the song of a nightingale Why are birds so significant in our lives and our sense of the world And what do our ways of thinking about and experiencing birds tell us about ourselves Birdscapes is a unique meditation on the variety of human responses to birds from antiquity to today and from casual observers to the globe trotting twitchers who sometimes risk life limb and marriages simply to add new species to their life lists Drawing extensively on literature history philosophy and science Jeremy Mynott puts his own experiences as a birdwatcher in a rich cultural context His sources range from the familiar Thoreau Keats Darwin and Audubon to the unexpected Benjamin Franklin Giacomo Puccini Oscar Wilde and Monty Python Just as unusual are the extensive illustrations which explore our perceptions and representations of birds through

images such as national emblems women's hats professional sports logos and a Christmas biscuit tin as well as classics of bird art Each chapter takes up a new theme from rarity beauty and sound to conservation naming and symbolism and is set in a new place as Mynott travels from his home patch in Suffolk England to his away patch in New York City's Central Park as well as to Russia Australia and Greece Conversational playful and witty Birdscapes gently leads us to reflect on large questions about our relation to birds and the natural world It encourages birders to see their pursuits in a broader human context and it shows nonbirders what they may be missing

What Birdo is that? Libby Robin, 2023-05-30 The idea that a bird is good news and needs all our support is probably the only thing amateur birders professional zoologists and birdscapers people who redesign their gardens to support birdlife have in common But together they form a conservation community that cares about the future of birds and their habitats who are working to heal the damage wrought by those who don't notice birds What Birdo is That reveals how bird people in Australia have gone about their craft across the years Its stories come from wild places at sea as well as on the land from dusty archives from restoration projects gardens and urban wastelands They are human stories but the birds themselves interject and interrupt any self-important anthropocentrism They educate They counter the imperialism of the ever-expanding economies of the new millennium They turn up in unexpected places giving surprise and joy This field guide to Australia's bird people provides a basis for understanding the complex relationship between people and birds in a land of extremes at the forefront of changing climate and habitats

Low-Carbon Birding Javier Caletrío, 2022-09-06 Birdwatching in Britain has grown increasingly dependent on burning fossil fuels Regularly driving long distances to birding hotspots and frequent flying to see exotic species are seen as perfectly normal In the face of the climate crisis however a growing number of birders are reassessing the way they enjoy and study birds In this timely book 30 contributors from young birdwatchers to professional ornithologists explain why and how they are shifting to climate friendlier approaches Low carbon birding they argue is a legitimate and valuable way of enjoying birds Furthermore in itself this can bring many joys some of them unexpected From first encounters with hawfinches to focusing in on birdsong from the Kalahari to the Hebrides the stories told here are not about heroic efforts to save the planet They are simply accounts of everyday humanity in unprecedented times ordinary people with doubts and concerns about how to live a decent life and act responsibly in a rapidly warming world The authenticity of their voices is a testament to the moment of awakening to the climate crisis in British ornithology Above all Low Carbon Birding is an urgent call for birders to leave a better legacy in the skies and across the living world

National Geographic Kids Everything Birds of Prey Blake Hoena, 2015 Introduces the most ferocious raptors to rule the skies from ospreys to vultures to hawks and describes what raptors' lives are like as well as what sets them apart from other birds
