Education Peter Gordon, Denis Lawton, 2003 Many people assume that kings and queens have generally received a good education perhaps the best that money could buy at the time This book investigates the reality what is known about the education of British sovereigns from the beginning of the Tudor period to the end of the 20th century There have been enormous differences in the seriousness with which education was regarded at different points in history For example Henry VIII and his children were educated at a high point in the Renaissance when educational ideas were regarded as important as well as exciting Queen Elizabeth I was by any standards extremely well educated by contrast Queen Elizabeth II's education has been described as undemanding because her parents wanted her to have a happy childhood Peter Gordon and Denis Lawton have traced changes in royal education through the centuries and related them not only to educational ideas and theories but also to changing political social and religious contexts The monarchy itself has changed as an institution from the semi absolute authority of the Tudors to a much more limited kind of monarchy by the end of the Stuart period after one king had been executed and another exiled to the constitutional monarchy of the 20th century To what extent have such changes made any difference to royal education What is the most appropriate kind of education for future kings and queens in our present day democracy In this book the authors confront these and other such questions and explore some of the answers **The Royal Financial Administration and the Prosecution of Crime in France, 1670-1789** Albert N.

Hamscher, 2012-07-13 The Royal Financial Administration and the Prosecution of Crime in France 1670 1789 explores the French monarchy's role in financing criminal prosecutions in the royal courts of the realm the payment of criminal frais de justice in the vocabulary of the ancien régime between 1670 and 1789 that is from the codification of criminal judicial procedure in the early period of Louis XIV's personal rule to the outbreak of the French Revolution The subject brings together three areas of scholarly inquiry criminal justice royal administration and the management of the crown's finances A central goal of the study is to provide factual information and interpretive insights on each of these topics and to explain the

relationship of each to the others over a long time period The book contributes to existing scholarship in four ways First although each of the major dimensions of the inquiry the operation of the criminal justice system the conduct of the royal administration and the management of the monarchy's finances has a large and increasingly sophisticated historical literature this is the first study to combine them in a systematic way Second the long time period covered in the book not only enables the historian to distinguish gradual from rapid change but it also allows the reader to view how the system functioned in different historical contexts Third the study is based on archival sources throughout France This comprehensive approach permits the identification of elements of a common experience without sacrificing attention to important aspects of regional diversity Finally with respect to the sources themselves the range is broad encompassing regulatory acts and decisions of the king's councils administrative correspondence at the central regional and in some cases local levels financial accounts and related papers and court records from the major appellate courts and from several lower courts as well An appendix of 33 tables lists figures of annual expenditure and other pertinent financial operations for each of the major financial districts of the kingdom
