

Improving fisheries sustainability

State agencies often have less resources than federal agencies, and data limitations represent a critical challenge to fisheries management in the United States

Fisheries Management Index (FMI)

We applied the FMI as a tool to track and evaluate non-federal fisheries management performance, which can help managers prioritize fisheries for management attention

Prioritization → attention → solutions

Management prioritization and partnerships with fishing communities can boost resources and management capabilities, improve data collection, close critical information gaps, and ultimately produce healthier fisheries

Geographic Information Systems in Fisheries Management and Planning Gertjan de Graaf, 2003-01-01 The FAO Inland Water Resources and Aquaculture Service has been active in promoting the use of geographical information systems GIS and remote sensing in fisheries and aquaculture since 1985 However a manual for fisheries biologists in the field to use along with GIS software explaining GIS in a way that is understandable to non GIS users has not been produced until now This manual has been written to overcome this knowledge gap as a do it yourself manual giving a short introduction to GIS software and its applications in fishery science The overall objective is to encourage fishery managers to use GIS to foster the sustainable use of natural resources It is aimed at fisheries biologists aquatic resource managers and decision makers in developing countries who have no knowledge about GIS and will be useful for a broad range of fishery applications Although the manual by no means covers all the possibilities of GIS it touches upon some of the most important features for fisheries management and planning Software and system requirements This technical manual was written for use with ESRI s ArcView 3 x and Spatial Analyst software which are not provided for purchasing this software and for details on system requirements see www.esri.com The two CD ROMs included at the back of the present manual contain spatial data for exercises

Crop Stress and its Management: Perspectives and Strategies B.

Venkateswarlu, Arun K. Shanker, Chitra Shanker, M. Maheswari, 2011-11-22. Crops experience an assortment of environmental stresses which include abiotic viz drought, water logging, salinity, extremes of temperature, high variability in radiation, subtle but perceptible changes in atmospheric gases and biotic viz insects, birds, other pests, weeds, pathogens, viruses and other microbes. The ability to tolerate or adapt and overwinter by effectively countering these stresses is a very multifaceted phenomenon. In addition, the inability to do so, which renders the crops susceptible, is again the result of various exogenous and endogenous interactions in the ecosystem. Both biotic and abiotic stresses occur at various stages of plant development and frequently more than one stress concurrently affects the crop. Stresses result in both universal and definite effects on plant growth and development. One of the imposing tasks for the crop researchers globally is to distinguish and to diminish effects of these stress factors on the performance of crop plants, especially with respect to yield and quality of harvested products. This is of special significance in view of the impending climate change with complex consequences for economically profitable and ecologically and environmentally sound global agriculture. The challenge at the hands of the crop scientist in such a scenario is to promote a competitive and multifunctional agriculture leading to the production of highly nourishing, healthy and secure food and animal feed as well as raw materials for a wide variety of industrial applications. In order to successfully meet this challenge, researchers have to understand the various aspects of these stresses in view of the current

development from molecules to ecosystems The book will focus on broad research areas in relation to these stresses which are in the forefront in contemporary crop stress research
