Managing Service Level Quality Across Wireless And Fixed Networks:

Managing Service Level Quality Peter Massam, 2003-04-11 QoS Quality of Service and Network Management are old topics. However, the fusion of IP style multimedia and wireless networks 3G means that network managers who might previously have dealt with one or the other must now manage and provide service guarantees for the both. This is where Managing Service Level Quality across Wireless and Fixed Networks steps in. It begins by examining the mechanisms that already existed in fixed IP data networks prior to the introduction of probe and agent technology. A look at these later developments is then supplemented with a real world scenario of how real time application performance monitoring can not only provide service level management but can also aid in root cause analysis. This same model is then applied to a wireless environment examining which elements are required to be able to deliver multimedia services across 2nd and 3rd generation mobile networks detailing the components of data networking that will assist in guaranteeing service level performance and the constraints placed on those guarantees when passing services over an air interface to a wireless enabled device. It asks a simple question: will multimedia applications and the guaranteed levels of service required by them work when traversing from fixed to wireless networks? It tracks QoS components and mechanisms of both environments and looks at what will provide the glue in this brave new converged world and also provides empirical data to back up the conclusions drawn. First book available which applies QoS techniques and technologies to wireless mobile networks 3G UMTS. Deals with the search for the real time information that constitutes the customer experience in terms of application performance so that service levels can be verified against measurable and relevant data in a true end to end manner across both fixed and wireless networks. Presents probe and agent technology. Features a real world scenario of how real time application performance monitoring can not only provide service level management but can also aid in root cause analysis. This will be of particular interest to practitioners. Analyses which elements are required in order to deliver multimedia services across 2nd and 3rd generation mobile networks. Details the components of data networking that will assist in guaranteeing service level performance. Essential reading for Wireless and IP data network professionals, practitioners, network managers and architects, technical consultants, quality assessment engineers, infrastructure vendors, application developers, portal designers, wireline operators, lecturers, postgraduates, senior undergraduate students and industry trainees.

Know Your Mind Peter Massam,2023-02-09 This third and final part of the trilogy moves on from growing pains in teenage years and confronting fears to exploring the extraordinary relationship between the mind and the body which can help overcome those same pains and fears culminating in a new philosophical perspective There was no eureka moment but a succession of scenarios experienced some with direct physical impacts others with more subtle and humorous implications for our mental capacity that opened a door into another silent reality where five senses are muted to allow for a sixth to be awakened What began as a collection of thoughts amassed from strangely inexplicable recurrences evolved through research into wider possibilities of the power of the mind and resulted in our protagonist being astonished by the predictability he found and the calm that these experiences instilled in him

Moose Conquering Fear Peter Massam,2022-08-18 It is as easy to fall into a working life as it is into a new relationship from which springs eternal the hope that both will last Choosing safe over fear of losing can result in an increasing sense of uneasiness harder to ignore or dismiss the more prolonged the endurance For George confronting fears was a lifelong skill acquired over many years taking the knocks making ill judged decisions and not learning from past errors all served to muddy the waters Making the harder calls on personal and career transitions seemed to open up a chasm of doubt in his mind but with the right support and a leap of faith in his own abilities the challenges that lay ahead of him became as alluring as a late spring sunset after a rain soaked day
