Creative Dynamics Christina Ljungberg,2012-10-31 How do readers make sense of a picture a photograph or a map in literary narratives in which visual signs play a critical role How do authors accomplish their various objectives in constructing such complex texts What strategies and techniques do they use to project fictional worlds and to provide their readers with the means for orienting themselves there This book investigates the dynamics of the imaginary diagrams created by cartographers photographers and writers of narratives giving ample evidence of how mapping practices have inspired the imagination of a vast number of authors from Thomas More up to contemporary writers A special focus is on the effects created by the projection of photographs into the narrative space and how our seemingly effortless interpretation of photographs and even maps masks complex cognitive processes The theoretical horizon of this study encompasses the fields of cartography mental maps iconicity research and the spatial turn in cultural studies **Modern South Asian Thinkers** Dev Nath Pathak,Sanjeev Kumar H.M,2025-10-30 This exceptional anthology brings together a collection of insightful expositions on modern South Asian thinkers and thoughts Employing an encyclopedic approach this volume delves deep into the intellectual history of South Asia transcending traditional academic perspectives and exploring a rich tapestry of ideas from various sources across time The book departs from the imported ideas of South Asia by delving into the diverse intellectual heritage of the region pertaining to political thinkers social and cultural thinkers and activists Historically the book aids in approaching the enduring social and political challenges in South Asia Drawing from an extensive array of works including polemics commentaries literary accounts politics and poetics modern thoughts in South Asia provide systematic solutions to the perennial issues that shape the region The curatorial consequence of the modern thoughts from the region put together in this compendium is a collective consciousness of South Asia as an offspring of the epistemological interface between region and universe The readers of this book shall arrive at a profound insight into the social political and cultural intricacies the transformative power of ideas and their enduring influence on the development of the region This book would be useful to students researchers and teachers working in the field of political science philosophy history and sociology in
