Manipulation Of Custom From Uprising To Intervention In The Solomon Islands:

The Manipulation of Custom Jon Fraenkel, 2004 An account of the 1998-2003 crisis a critical review of the major interpretations and an investigation of the underlying causes and analyses the post coup period up to the arrival of RAMSI in July 2003 Intro *Public Finance, Conflict, and International Interventions* Tobias Akhtar Haque, 2025-06-20 This book provides a critical analysis of the political and conflict impacts of good governance public finance reforms showing how unintended distributional outcomes can undermine broader state building goals The international community expends enormous resources trying to build good governance institutions in countries emerging from war By ensuring efficiency increasing transparency and enhancing public accountability in the use of public resources the adoption of good governance institutions is assumed to support stability peace and sustainable economic growth Such assumptions however have a limited empirical basis and obscure a more complex reality Drawing from political science and institutional economics and evidence from major state building interventions in Afghanistan Timor Leste and Solomon Islands this book explores the impacts of technocratic good governance reforms in fragile environments Through the lens of public finance reform it illustrates how efforts to achieve efficiency and accountability while often bringing important benefits can also undercut the patronage channels that draw together powerful elites thereby increasing conflict pressures and eroding prospects for sustainable peace This book makes the case for a reconsideration of the good governance agenda and the appropriateness of its application in developing countries experiencing or at risk of war This book will be of interest to students of state building global governance political economy development studies and International Relations **Social Policies in Solomon Islands and Vanuatu** Biman C. Prasad, Paul Kausimae, 2012 Solomon Islands and Vanuatu are two small states that have struggled to develop successful social policies since independence This study traces their social histories and examines factors that have hindered progress Future development requires a move away from traditional social structures and a focus on political stability and economic growth Politics and State Building in Solomon Islands Sinclair Dinnen, Stewart Firth, 2008-05-01 Politics and State Building in Solomon Islands examines a crisis moment in recent Solomon Islands history Contributors examine what happened when unrest engulfed the capital of the small Melanesian country in the aftermath of the 2006 national elections and consider what these events show about the Solomon Islands political system the influence of Asian interests in business and politics and why the crisis is best understood in the context of the country's volatile blend of traditional and modern politics Until the disturbances of April 2006 and subsequent deterioration in bilateral relations between Australia and Solomon Islands under the Sogavare government experts had hailed the Regional Assistance Mission to Solomon Islands RAMSI as an unqualified success Some saw it as a model for cooperative intervention in failing states worldwide Following these developments success seems less certain and aspects of the RAMSI model appear flawed Using the case of Solomon Islands this book raises fundamental questions about the nature of cooperative intervention as a vehicle

for state building asking whether it should be construed as a mainly technical endeavour or whether it is unavoidably a political undertaking with political consequences Providing a critical but balanced analysis Politics and State Building in Solomon Islands has important implications for the wider debate about international state building interventions in failed and failing states Statebuilding and State Formation in the Western Pacific Matthew Allen, Sinclair Dinnen, 2018-04-19 This book provides a rigorous and cross disciplinary analysis of this Melanesian nation at a critical juncture in its post colonial and post conflict history with contributions from leading scholars of Solomon Islands The notion of transition as used to describe the recent drawdown of the decade long Regional Assistance Mission to Solomon Islands RAMSI provides a departure point for considering other transformations social political and economic under way in the archipelagic nation Organised around a central tension between change and continuity two of the book's key themes are the contested narratives of changing state society relations and the changing social relations around land and natural resources engendered by ongoing processes of globalisation and urbanisation Drawing heuristically on RAMSI's genesis in the state building moment that dominated international relations during the first decade of this century the book also examines the critical distinction between state building and state formation in the Solomon Islands context It engages with global scholarly and policy debates on issues such as peacebuilding state building legal pluralism hybrid governance globalisation urbanisation and the governance of natural resources These themes resonate well beyond Solomon Islands and Melanesia and the book will be of interest to a wide range of students scholars and development practitioners This book was previously published as a special issue of The Journal of Pacific History **The Statesman's Yearbook 2025** Palgrave Macmillan, 2025-01-10 Now in its 161st edition The Statesman's Yearbook continues to be the reference work of choice for accurate and reliable information on every country in the world Covering political economic social and cultural aspects the Yearbook is also available online for subscribing institutions **Housing, Land, and Property Rights in Post-Conflict United Nations and Other Peace Operations** Scott Leckie, 2009 This book is about the UN's role in housing land and property rights in countries after violent conflict *Handbook of Governance in Small States* Lino Briguglio, Jessica Byron, Stefano Moncada, Wouter Veenendaal, 2020-12-17 This volume covers a wide spectrum of governance issues relating to small states in a global context While different definitions of governance are given in the chapters most authors associate governance with the setting and implementation of policies aimed at managing a country or territory and with the related institutional structures and interventions by political actors Generally good governance is associated with concepts such as policy effectiveness accountability transparency control of corruption encouragement of citizens voice and gender equality factors which are in turn linked with democracy What emerges from the book is that the societies of small states are being re shaped by various forces outside their control including the globalization process and climate change rendering their governance ever more complex These problems are not solely faced by small states but small country size tends to lead to a higher degree of

exposure to external factors The chapters are grouped into four sections broadly covering political environmental social and economic governance Governance is influenced by many often intertwined factors the division of the book into four parts therefore does not detract from the fact that governance is multifaceted and such division was based on the primary focus of each particular study and its main disciplinary background The expert authors have moreover used a variety of approaches in the studies the subject of small states being well suited to scholarly work from different disciplines using qualitative quantitative and mixed approaches to arrive at useful conclusions

The Quest for the Good Life in Precarious Times
Chris Gregory, Jon Altman, 2018-04-01 The study of the quest for the good life and the morality and value it presupposes is not new To the contrary this is an ancient issue its intellectual history can be traced back to Aristotle In anthropology the study of morality and value has always been a central concern despite the claim of some scholars that the recent upsurge of interest in these issues is new What is novel is how scholars in many disciplines are posing the value question in new ways The global economic alignments of the present pose many political moral and theoretical questions but the central issue the essays in this collection address is how do relatively poor people of the Australia Pacific region survive in current precarious times In looking to answer this question contributors directly engage the values and concepts of their interlocutors At a time when understanding local implications of global processes is taking on new urgency these essays bring finely honed anthropological perspectives to matters of universal human concern they offer radical empirical critique based on intensive fieldwork that will be of great interest to those seeking to comprehend the bigger picture
