Rendering Kyle May, Julia van den Hout, 2012-01-01 As information is distributed and consumed at an increasingly rapid pace one of the most effective or at least pervasive ways to communicate architectural ideas is through renderings Typically a perspectival image that can be understood without any knowledge of architectural drawing conventions the rendering derives power from its accessibility to a wide audience hence its crucial role in design competitions client presentations press releases and other such public forums While these architectural visualizations are certainly nothing new advances in software and hardware have enabled renderings to be made faster and more realistic than ever before This presents both an opportunity and a challenge On the one hand design concepts can now be tested and conveyed with an unprecedented degree of visual accuracy Conversely whether through omission extreme dramatization or even intentional fakery architects now have the ability to realistically depict the impossible Furthermore both clients and public are beginning to expect photorealistic imagery even at the earliest stages of a project when supposed realism can oftentimes belie the fundamentally speculative nature of design Given the importance of these images in mediating between architects and the people they ultimately serve CLOG will critically assess the state of renderings today

 Hegger,Volker Auch-Schwelk,Matthias Fuchs,Thorsten Rosenkranz,2013-02-12 Until now the few existing systematic texts on
 construction materials have primarily been directed at building engineers An overview for architects which also considers
 the importance of construction materials in the sensory perception of architecture including tactile qualities smell color and
 surface structure has not been available With the publication of the Construction Materials Manual all that has changed As a
 basic work aimed equally at the questions and perspectives of architects and building engineers it will bring together all of
 the above mentioned viewpoints It addresses fundamental questions of sustainability including life span environmental
 impact and material cycles while also presenting material innovations All of the principal conventional and innovative
 construction materials are comprehensively documented with attention to their production manufacture fabrication
 treatment surfaces connections and characteristics International examples help to illustrate their use in architecture where a
 building s appearance is often defined by a single material Thus the Construction Materials Manual will support the daily
 work of architects and engineers in the choice of construction materials in a comprehensive and at the same time vivid and
 stimulating manner *Delirio y mas* Rem Koolhaas,2006 This extensive publication by the Spanish Architectural magazine

Architect's Guide to Fame Paul Davies,Torsten Schmiedeknecht,2006-08-11 This lively text provides a candid inquiry into the

contemporary means by which architects get work and for better or worse become famous In response to the reciprocal relationship between publicity and everyday architectural practice this book examines the mechanisms by which architects seek publicity and manage to establish themselves and their work ahead of their colleagues Through the essays of specialist contributors this book enables the reader to understand the complex relationship between what they see as the built environment and the unwritten stories behind how it came about

El paisaje de la arquitectura / The Landscape of Architecture Mayka García-Hípola, 2017-12-13 Para El paisaje de la arquitectura la autora ha superado notablemente la contradicción entre una exposición necesariamente lógico lineal que facilite la inteligibilidad del contenido y la extensa complejidad de este Complejidad ineludible para una solvente descripción y análisis del conocimiento contemporáneo Comprometerse con nuestro tiempo histórico conlleva asumir que el paradigma positivista lógico ha sido envuelto que no desplazado por el paradigma de la complejidad El principio de la causalidad y la independencia de causa efecto del observador es cuestionado por el paradigma complejo para el que en la gestión del conocimiento el propio observador está imputado como un dato o suceso en el propio proceso La profesora García Hípola nos conduce por su ensayo a escenarios teóricos críticos a través de su propia experiencia incluso de su protagonismo en los procesos reflexiones y cuestiones que analiza Es desde esa complejidad desde la que reivindica implícitamente en su texto la transversalidad entre autor espectador docente y creador literalmente en las citas referidas a experiencias sobre la obra de El Bosco o en las que somete al arquitecto a nuevos roles que devienen del comportamiento de la materia como un auténtico ecólogo o los del propio antropólogo que explora la acción del ser humano y sus detritus en el paisaje como en su proyecto para Villajoyosa verdadero tratado de arquitectura de campo In The Landscape of Architecture the author has remarkably surpassed the contradiction between a necessarily logical linear explanation to facilitate the intelligibility of the content and its vast complexity This is an inescapable complexity for a trustworthy description and analysis of contemporary knowledge Commitment to our historical time involves assuming that the logical positivist paradigm has been wrapped not displaced by the paradigm of complexity The principle of causality and the independence between cause and effect of the observer is questioned by the complex paradigm for which in the management of knowledge the observer is ascribed as data or event of the process itself In her essay professor García Hípola leads us to theoretical critical scenarios through her own experience including her protagonism in the processes reflections and issues that she analyzes From this complexity the transversality between author spectator teacher and creator is claimed literally in the quotes of the experiences about Hieronymus Bosch's work or in those where the architect is subjected to new roles that come from matter's behavior as a true ecologist or those of the anthropologist who explores human action and its detritus in the landscape as in her project for Villajoyosa veritable treatise of field architecture
