Crown Jewel Wilderness Lauren Danner,2021-06-18 Remote rugged and spectacularly majestic with stunning alpine meadows and jagged peaks that soar beyond ten thousand feet North Cascades National Park is one of the Pacific Northwest's crown jewels Now in the first full length account Lauren Danner chronicles its creation just in time for the park's fiftieth anniversary in 2018 The North Cascades range benefited from geographic isolation that shielded its mountains from extensive resource extraction and development Efforts to establish a park began as early as 1892 but gained traction after World War II as economic affluence sparked national interest in wilderness preservation and growing concerns about the impact of harvesting timber to meet escalating postwar housing demands As the environmental movement matured a 1950s Glacier Peak study mobilized conservationists to seek establishment of a national park that prioritized wilderness Concerned about the National Park Service's policy favoring development for tourism and the United States Forest Service's policy promoting logging in the national forests conservationists leveraged a changing political environment and the evolving environmental values of the natural resource agencies to achieve the goal of permanent wilderness protection Their grassroots activism became increasingly sophisticated eventually leading to the compromise that resulted in the 1968 creation of Washington's magnificent third national park **Anglo-American Law Collections** Mortimer D. Lieland,2006 The Arctic National Wildlife Refuge ANWR consists of 19 million acres in north east Alaska It is administered by the Fish and Wildlife Service FWS in the Department of the Interior DOI It is a 1.5 million acre coastal plain on the North Slope of the Brooks Range that is currently viewed as one of the most likely undeveloped US onshore oil and gas prospects According to the US Geological Survey there is even a small chance that taken together the fields on this federal land could hold as much

economically recoverable oil as the giant field at Prudhoe Bay found in 1967 on the coastal plain west of ANWR That state owned portion of the coastal plain is now estimated to have held 11 13 billion barrels of oil The Refuge and especially the coastal plain is home to a wide variety of plants and animals The presence of caribou polar bears grizzly bears wolves migratory birds and many other species in a nearly undisturbed state has led some to call the area America s Serengeti The Refuge and two neighbouring parks in Canada have been proposed for an international park and several species found in the area including polar bears caribou migratory birds and whales are protected by international treaties or agreements The analysis in this book covers first the economic and geological factors that have triggered new interest in development followed by the philosophical biological and environmental quality factors that have triggered opposition to it The book begins with a review of the nature and issues of the ANWR **New Frontiers in Environmental Research** Mark P. Glazer,2006 The environment is considered the surroundings in which an organism operates including air water land natural resources flora fauna humans and their interrelation It is this environment which is both so valuable on the one hand and so endangered on the other And it is people which are by and large ruining the environment both for themselves and for all other organisms This book reviews the latest research in this field which is vital for everyone Library of Congress Catalogs Library of Congress, **Catalog of Printed Books** Bancroft Library,1964 *Book Review Digest* ,1912 **Antiquarian Bookman** ,1967 **Who's who** Henry Robert Addison,Charles Henry Oakes,William John Lawson,Douglas Brooke Wheelton Sladen,1901 An annual biographical dictionary with which is incorporated Men and women of the time **Dictionary Catalog of the Department Library** United States.
